Cleveland, O.-C. K. Sunshine, J. Landsman and others have organized the Double Rubber Tire Co., with a capital stock of \$50,000 paid in. They propose to erect a factory in Akron for the production of the Stein patent pneumatic tire, which is adaptable for use on both bicycles and automobiles.

Downsville, N. Y.-E. V. Merritt has opened a repair shop.

Newark, N. J.-With an authorized capital stock of \$1,000,000 the Airless Pneumatic Tire and Rubber Co. have filed articles of incorporation in the county clerk's office. The concern proposes to place upon the market an airless pneumatic tire, to manufacture and sell motor vehicles, bicycles, bicycle supplies and deal in a general line of rubber goods. The capital stock is divided into 10,000 shares of \$100 each, and fifty shares have been subscribed by George F. Maguire, Herbert D. Cohen and Nathan F. Giffin, all of this city.

Newark, O.—The Hoover-Ball Co. is the name of a new firm, the outgrowth of the Newark cycle store. The members of the firm are H. J. Hoover and E. F. Ball.

Pasadena, Cal.—The Automobile and Bicycle Livery Co. has been incorporated with a capital stock of \$25,000. The directors are Lucy A. Willard, N. T. Horton, J. H. Gipp, A. C. Herrick and John A. Goodrich, all of Pasadena.

Putnam, Conn.-Albinie Delisle will open a repair shop.

Sheboygan, Wis .- The Fairweather-Weigand Co. has been incorporated by Samuel Frampton. Fairweather, Paul Weigand and Samuel Fairweather. The new company will conduct a bicycle and sporting goods store.

Changes and Improvements.

Akron, O.-The B. F. Goodrich Co. is ceeds John Brown, Jr. planning to make an important addition to its already immense factory.

Bangor, Me.-J. Bert Baxter, formerly

with Dame, Stoddard & Kendall, of Boston, a line of skates, cutlery and high grade the business on January 1st. sporting goods, including many novelties.

Batavia, N. Y.—The Batavia Rubber Tire Co. have removed their offices to the office of the Batavia Carriage Wheel Co., and have closed their store in the Pan American Block. Alva M. Colt and Dr. C. W. Gardner, who were respectively treasurer and vice-president of the Batavia Carriage Wheel Co. from its formation to the present year, have resigned.

Boston, Mass.-W. E. Eldridge, once the bia branch, in Boston.

Boston, Mass.—The Equitable Distributing Co. has removed to 74 India Street; it was formerly located at 53 Hanover Street.

Boston, Mass.—Brown & Wales, who for many years were engaged in the cycle jobbing trade, have discontinued that branch of their business. Manager Clark, who was formerly in charge of the department, has associated himself with the E. P. Blake Co., of the same city.

Branford, Conn.-B. M. Prescott has closed his cycle store for the Winter and taken a position.

Brockton, Mass.—Pickard Bros. will erect a four-story building.

Buffalo, N. Y.-Ephraim Bros., proprietors of the Buffalo Tire & Rubber Co., 59 East Genesee Street, and proprietors of the Progressive Store, bicycle department, 331 Main Street, have purchased the stock, fixtures and good will of Finn & Sullivan, 625 districts. Main Street, which business they will con-

Chicopee Falls, Mass. - The American ing Street, closed. Bicycle Co. has leased the old Spalding bicycle factory to the J. Stevens Arms and Tool Co. It will be employed in the manufacture of rifle barrels.

Fergus Falls, Minn.-J. E. Beebe has bought the complete stock of bicycles, sporting goods, musical instruments and repair materials formerly owned by C. W. Wilson, For 1902 they will be made not only with and will conduct the business.

Wellesley, Mass.-Fred A. Fowler, of this village, has purchased the bicycle store in Central Street, formerly owned by W. R.

Genoa, N. Y.-Robert Tabor has closed his repair shop.

Great Barrington, Mass.—Frank Minkler has purchased the business of C. E. Cross. one of the most prosperous manufacturers Great Neck, L. I.—George Bullen suc-

Eimer Co. has closed its store for the will give its entire time to manufacturing Winter.

Hartford, Conn.-J. J. Ward, proprietor has taken charge of M. Abbott Frazar's of the Connecticut Rubber Co., previous to store at 191 Exchange Street, formerly oc- the incorporation of that firm, has sold his cupied by Meyer Levy, and has opened up interest to F. W. Starr and will retire from

> Homer, N. Y.-E. B. Richardson has purchased the business of Quick & Radway. Natick, Mass.-J. A. Purcell & Son have closed their cycle store for the Winter.

> Penn Yan, N. Y .- Whitfield & McCormick's bicycle business has been bought by Wilkins & Ellis, who have conducted a repair shop there for some time. Norway, Me.—H. & E. Sanborn have re-

tired from business.

Jamaica Plain, Mass.-Charles E. Johnquist has closed for the Winter.

St. Johnsbury, Vt.-E. M. Courcheine, lately purchased the Derifield gun and 69 Eastern Avenue, has closed for the Win-

Syracuse, N. Y.-A. G. Bolster, manager largest bicycle dealer in Newark, N. J., of the Syracuse branch of the Fisk Rubber Co., will be at his old stand next season. He has invented an air valve for pressure tanks which he intends to push.

> Rochester, N. Y.-C. J. Conolly, formerly at 47 Exchange Street, has removed to Fitzhugh Hall, where a portion of the building is set aside for bicycles, another portion for automobiles, and the entire floor space ready at any time for conven-

> tions and exhibitions.
> Indianapolis, Ind.—The Indianapolis Automobile & Bicycle Co. is no more. Koehring & Bro. have moved the bicycles to their Virginia Avenue Hardware store.

> West Gardner, Mass.—The cycle store owned by C. A. Adams and L. A. Hartwell has been closed for the Winter.

> New York, N. Y .-- C. B. Barker & Co., who relinquished complete bicycles about a year ago, have taken them on again. They will handle the Crawford in the metropolitan, Long Island and Northern New Jersey

Plainville, Conn.—E. G. Bassett, closed. Plainville, Conn.—George White, Whit-

Ithaca, N. Y .-- J. W. Owen has purchased the repairing business of Nathan-Hanford; the latter will continue to conduct his retail store.

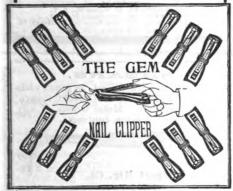

Indianapolis, Ind.—The Indiana Chain Co. have still further improved their chains. swaged centre blocks, but with milled rivets, that will add to their non-stretchability.

Santa Rosa, Cal.-Harry Hulbert has purchased the interest of L. B. Bement in the Cash Cyclery and will continue the business.

Rochester, N. Y.-The Rochester Cycle Mfg. Co., which for many years has been of high and medium-grade machines in Western New York, has gone out of the Hartford, Conn. - The Alexander & bicycle business entirely, and in the future automobiles.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished

STAR GOODS are made in 7 complete lines, Shears, Scissors, Razors, Tailors', Snips, Pruners and Sheep Shears.

There are 7 reasons why they are sold by live merchants, and used by the better class of workers:

1st. Goods branded with a STAR are first quality only.

All STAR brand are made in America, by American work-men.

STAR, the standard for weight, finish and cutting quality.

Not connected with any Trust.

Sold through Hardware trade only.

THE INTERNATIONAL CUTLERY CO.,

4th. Gas tempered STAR brand, retain their edge.

5th. STAR goods are tested, and always run uniform.

6th. Goods less in price than STAR are cheaper in quality also.

7th. STAR material and mechan-ical construction is the safest warrantee.

CHATILLON SPRING SCALES.

Called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

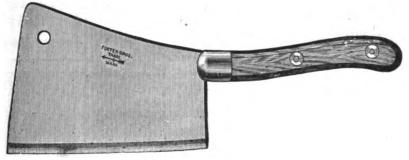

has our name as makers plainly on the dial, thus:

Mork North

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

HARDWARE

One of the handsomest calendars which has reached our office this season was that issued by E. C. Atkins & Co., Indianapolis, Ind., and which depicts in glowing colors twelve of the loveliest flowers of America, being a reproduction of six fine combined designs after Paul de Longpre, every one of which deserves a frame. The company will mail duplicates to those of our readers requesting the same if they will enclose fifty cents for mailing charges, etc.

L. R. May, the well-known cutlery salesman, who for so many years has travelled in the interests of leading importers of cutlery, among whom were McCoy & Sanders, Alfred Field & Co., and vom Cleff & Co., has recently connected himself with Adolph Kastor & Bros., 109 Duane Street, representing which extensive establishment will doubtless enable him to hold trade and largely increase it.

Peck Edge Tool Co., Cohoes, N. Y., are mailing to the Hardware trade a novel calendar, which, while advertising the products of the company, presents in one large group all of the Presidents of the United States, from Washington to McKinley. Included in the handsome illustration as a background is a portrait of President Roosevelt surrounded by numerous scenes that have made his life eventful.

The entire business of the paint department of the H. W. Johns Mfg. Co., 100 William Street, New York, has been taken over by the H. W. Johns Paint Mfg. Co., a new corporation. This will make the Liquid Paint business entirely independent of the products made by the H. W. Johns Mfg. Co. To the present line of liquid paints, white lead, colors in oils and varnishes, a complete line of painters' sundries will be added. The change went into effect in November. The new organization is officered as follows: President, H. W. Johns; vice-president, G. W. Gladwin; treasurer, F. R. Boocock; secretary and general manager, John S. Mowry.

Charles C. James, who for seven years has represented the interests of Baeder, Adamson & Co., has connected himself with the Armour Sand Paper Works, owned and operated by Armour & Co., and will cover the territory of New York, New Jersey and the cities of Baltimore and Philadelphia. His office will be located at 211 Pearl Street, New York.

The Glidden Varnish Co., Cleveland, Ohio, are mailing this year a very attractive calendar, which is an artistic piece of color work, extolling the virtues and many uses of one of their important products "Jap-a-lac." The centre is occupied by a bright little boy of five years having a can of "Jap-a-lac" under his arm, and carrying another in his right hand. The whole scheme is bright with color, and the beauty and natural attitude of the "five-year-old" would command notice wherever placed.

An event of unusual importance in the shooting world occurred at the range of the Massachusetts Rifle Association, Walnut Hill, Mass., Dec. 7th, 1901. Thomas Anderton, the well known pistol shot attempted to break the 50 shot pistol record at 50 yards on the Standard American Target. He was successful in his undertaking, scoring 476 points, which exceeds the former record by one point, the old record of 475 points being held by J. E. Gorman, of San Francisco, Cal. Mr. Anderton used Peters Long Rifle Cartridges in making this new record.

Our readers will notice an article in this issue, of a reminiscent character, from the pen of that veteran Hardwareman, James E. Halsey. There are few old timers still active in the field who antedate his advent in the business, and fewer still who can so readily draw upon the stores of memory for recollections of the good old days when the New York jobber was a power in the land.

The Grand Rapids Refrigerator Co., Grand Rapids, Mich., are distributing to the trade a very handsome and attractive hanging calendar representing a large bowl filled with roses of the several noted varieties that are in demand the country over, the background being in a novel application of bronze. As the advertising in which interest the calendar is distributed, is confined entirely to the back of it, and nothing but the superb flowers and monthly calendar occupies the front, this fine art offering is of the most acceptable kind, and is made deservedly welcome. It certainly deserves consideration and should be asked for by the trade if not already at hand.

The Standard Horse Nail Co., New Brighton, Pa., come to the front this season with a large size hanging calendar exploiting the style of package in which their well-known brand of Horse Nails is marketed. The lifelike looking boxes in characteristic pose ornament the centre of the calendar. It will no doubt serve the purpose for which it is intended, and prove a good reminder during the year of its utility.

We reported in our previous issue that Brown & Wales, Boston, had discontinued their Cycle Jobbing Department. This was an error, as we are informed by the firm that they have no such intention, and will continue that branch of their business as energetically as ever.

The Columbus Bolt Works, Columbus, Ohio, have just finished one of the most successful years they have known in business. A considerable portion of their product now finds a ready market in England, South America, Australia and South Africa.

Schill Bros'. Souvenir Calendar.

The Schill Brothers Co., Crestline, Ohio, issue as a 1902 Calendar and Souvenir an artistic reproduction of an original painting entitled "The Raffle," the original work of art being a masterpiece of a noted artist. They claim there is a moral hidden in the subject, which might in some eyes be regarded with disfavor:

"Every business, from the humblest street vender to the largest manufacturer, or the smallest individual doing business to the largest corporation; the capitalist's investment, the mechanic's skill, the laborer's labor, the attorney's plea for his client, the doctor's treatment of his patient, the child at school, the student at college—all is a raffle, each striving to win."

It is deserving of a place among commercial surroundings from its artistic expression, representing as it does three persons engaged in throwing dice to decide the ownership of a fine goose suspended nearby. The eager expressions on the faces of the participants, and the natural poses of the subjects represented, entitle it to a welcome which it will invariably receive.

Editorial Trade Review.

The successful completion of the first year in the new century brings with it the harbingers of prosperity visible on every hand, giving promise of a continuance of conditions so encouraging to the consumer, the dealer and the manufacturer. The prospects for the present are of a much more promising character than was the case a The iron and steel industries during the twelvemonth just past have reached their most phenomenal output, increasing in such manifold ratios under a continuous demand, resulting in the railroads experiencing the greatest difficulty in handling the increasing Orders of record size requiring increasing transportation facilities results in orders for locomotives and cars that will crowd the order books of the manufacturers for many months to come. This same limit of industrial healthfulness is visible in every direction. The mines are being worked to their utmost capacity; the furnaces under pressure for greater supplies of raw material, are pushed as never before, and the mills with books filled with orders for material needed by our manufacturers in every important line of production, who are increasing the productive area of their plants, with the hope and prospect of controlling as large a slice of our National prosperity as perfect facilities should entitle

Money is plentiful on every hand in ample supply for the purposes of increasing traffic, with phenomenal bank clearings to inspire a condition of commercial confidence, so advantageous to the continuance of many business enterprises now being promoted. The prospects for building were rarely so promising for future expansion; an increasing demand for new buildings, for store and residence purposes, is visible in every important trade centre. The prospects for an unusual demand for Builders' Hardware will have a tendency to strengthen the markets in this legitimate line of Hardware manufacture, which for some time has suffered greatly from too great an amount of competition applied to a large proportion of the production.

Everything points to a year of unchanging activity, with the markets on grain sustained by prices rarely reached by the agriculturist. Improvements will be made by the grain grower that will increase facilities and improve production as well as benefiting the Hardware and Implement dealer through a demand for needed supplies in order to secure all the advantages of a more extended area of crop productiveness.

There is scarcely a line of business connected with the Hardware industry but what the most confident expectations are expressed of the profitable outcome of the present year. Stocks on hand are by no means large in volume. Prices on present business, while firmly held on nearly all leading products, present no speculative tendencies, the advantages looked for from the year's business being perfectly legitimate and derived from a contemplated steady demand, general in its conditions, and founded on the current wants of each centre of commercial activity.

When a review is taken of the general business of the year just past, it would seem as though some credit should be given to these large consolidations, controlling largely the output of leading staples, that so little demoralization of prices resulted from the strike conditions which at one time jeopardized their prosperity. Under the customary state of affairs formerly in vogue, before these vast aggregations of capital so steadily held the balance of power, diverse and rapidly changing quotations would have been the weekly if not daily features of a general market, that in the year just past scarcely gave a sign of a ripple of disturbance, completely eliminating all the elements of speculation from the general trend of trade.

Colonial Administration.

The improvement of the material, mental, and moral condition of the people of a colony, and the methods applied by successful colonizing governments in that work is the subject of a chapter in the work on Colonial Administration, just issued by the Treasury Bureau of Statistics. To answer this in a single sentence would be: The introduction and extension of modern civilization and enlightenment. To answer it in detail would be to show what the great colonizing countries of the world have done for the advancement of their colonies during the nineteenth century—the introduction of roads, railways, irrigation works, river and harbor improvements, and through them the development of production and thus of material prosperity; the encouragement of commerce and the adoption of improved conditions of life; the establishment of reliable and permanent forms of currency, with proper banking facilities for the encouragement of thrift among the natives; the establishment of postal and telegraph service for the encouragement of intercommunication among the people of the colony and between them and the outside world; the establishment of steamship lines to connect the colony with the home country and the

civilized world; the encouragement of education through schools, colleges, newspapers, libraries and churches; the establishment and proper administration of laws and regulations by which public safety and order are assured.

When it is considered that in India alone, where roads were unknown when the British Government assumed control, there are now 150,000 miles of road, of which over 30,000 are "metalled;" that the railways in the British colonies now aggregate 63,549 miles, against 33,000 in 1885, a growth in 15 years exceeding the entire distance around the earth; that the irrigation canals and other works of India are 36,000 miles in extent, and the area irrigated by all methods exceeds 30 million acres, and that although they have cost about 400 million rupees, the value of a single year's crop in the irrigated district above that which it could produce in years of drought is more than the entire cost of the canals, the importance of these public works for the development of agriculture and commerce will be apparent.

When it is further considered that the commerce of the British colonies alone has grown from over 300 million dollars in 1850 to 2,400 million dollars in 1900, their development under the fostering care of an intelligent method of government and the consequent benefit to the natives as well as the consuming world will be appreciated. The fact that the British colonies were able to import 1,150 million dollars' worth of food, clothing, and the comforts of civilized life from other parts of the world in 1899, against 140 million dollars' worth in 1850; the French colonies 160 million dollars' worth in 1899, against 91 million dollars' worth in 1887—an increase of 72.5 per cent. in twelve years—still further emphasizes the increased earning capacity of those colonies and affords some measure of their improved material condition.

When it is further realized that the amount standing to the credit of depositors in savings banks in the British colonies alone, which amounted to 133 million dollars in 1885. had increased to 288 millions in 1899, an additional evidence of the growth of prosperity and thrift among the people of the colonies will be apparent. When it is seen from official reports that in India alone the number of post offices has grown from 753 in 1856 to 29,122 in 1899, and that the number of pieces received by the post offices increased from 75 million in 1860 to 489 million in 1899, the development of intercommunication and of mental as well as business activity among the people may be to some extent measured. Still another evidence of the same is seen in the fact that the telegraph lines in the British colonies have grown from 115,000 miles in 1889 to over 150,000 miles in 1899, thus increasing their length in a single decade by more than the distance around the earth; and that the telephone lines in those colonies now aggregate more than 50,000 miles in When it is further considered that the total numlength. ber of pupils in the schools of India alone is now nearly 4,500,000, against about 3,500,000 in 1888, and that the expenditure for public instruction was, in 1899, 36,215,000 rupees, against 394,000 rupees in 1858, the growth of education and educational facilities will be to some extent realized, while additional evidence of the general intelligence will be found in the fact that the number of vernacular newspapers published in India in 1897 was 758, and the number of books and magazines published in 1898, 7,437, of which 6,236 were in the native language.

The Patent Office.

A number of articles have been published lately deriding inventors and setting forth what seems to me to be a narrow minded view of the patent system of this country.

These articles must have been written by persons who have not given the matter careful thought. Anyone who to-day thinks of American inventors as a set of "Cranks," and of the patent system of this Government as useless, or of little value, is not up to date and should, in the words of the "Coon" song, "Go 'Way Back and Sit Down," or as the Englishman sung it, "Retire to the extreme rear and be seated."

Many of these self-appointed critics glibly state that ninetenths of the inventions for which patents are issued are "failures."

The question of what is a "failure" naturally arises. I would also like to ask where do these critics get their statistics?

I have for years been considering how best to obtain reliable statistics as to what proportion of the large number of patents granted each week cover successful devices, but I have been unable to come to any conviction either as to a practical method of obtaining the proportion of failures or as to just what constitutes "failure." I should be pleased to know how they fix the failures as numbering nine-tenths of the whole number issued?

"I have for years examined the weekly issues of patents and from my knowledge of the various arts I have felt inclined to place the number of successes at about one-half the total, but this is only a guess. I am morally certain, however, that a greater proportion of the issues than one-tenth are successful. I know to almost a certainty that more than one-half the inventions that have passed through my hands in recent years have proven successes, and from many conversations with other attorneys I am led to believe that a general estimate of one-half would not be far wrong.

It is very difficult, too, to define a "success." Each person I have talked to about the matter has seemed to me to have a different idea of the matter. Many confuse it with operativeness, or mechanical success, and many, again, seem to have such an exalted notion of the term "success." To them only those patents that bring fortunes are successful. My own idea is that an invention is successful—not merely mechanically operative, but successful—if it has been developed and tested sufficiently to demonstrate beyond a reasonable doubt that if backed by capital to an amount commensurate with its nature and by reasonable energy it would pay to push it. I do not think any other criterion can be set up. It is not fair to say that only those inventions which are exploited on the market in paying quantities are successful, because the successful exploitation requires many more conditions to be present than merely that the invention be practical and that a need exists for it. No matter how much need exists for a new thing there is much expensive work to be done to create a demand for it, and it is this bugbear that frightens off many intending investors in patents.

It is, no doubt, true that much labor and money are wasted in inventing and developing inventions that are chimerical and impractical, but this evil is fast being lessened with the spread of knowledge by the trade papers and by the elimination of dishonest patent solicitors. We in Washington see fewer and fewer perpetual motion and aerial navigation cranks as the years go by, and I have a firm belief that a real crank will be a curiosity even to us in a few years. But even when the crop of cranks was greatest, which was probably in the '70's and '80's, the waste resulting from their harmless vagaries was so infinitesimally small compared to the wonderful work wrought by the American inventors that it can be eliminated entirely from any estimate of the value of our patent system.

And this wonderful work that is being done by the best patent system and the greatest inventive nation on earth is wholly due to the enthusiasm which these adverse critics make light of. Nothing would be so calamitous to the industries of this nation as that its inventors should lose faith and enthusiasm in their own creations. I have known this faith to carry so many inventors through years of toil and privation to success that I shall never cease to marvel at it as a wonderful provision of nature for our advancement.

Chas. D. Davis.
Of Davis & Davis, Patent Lawyers, New York and Washington.

LEGAL CORRESPONDENCE.

Execution-Judgment By Default.

QUESTION: About two weeks ago I was sitting in my shop talking to a business friend, when a city marshal came in and said he had an execution against me and if I could not pay it he would levy upon my goods at once. I found on inquiry from him that a firm with whom I had a small account had sued me in the Municipal Court and had obtained judgment against me. I was never served with a summons in the case and knew nothing of the matter until the marshal came to my shop with the execution. I paid the execution under protest and took a receipt. Was this judgment properly obtained, when I knew nothing of it? What do you advise?

REPLY: A judgment obtained without the service of summons in one of the ways prescribed by the Code is invalid and can be set aside. We have known of a similar case to yours, where an affidavit was made by a process server that he had served the party with a summons, and upon this affidavit judgment by default was taken and execution thereon issued. It is not unlikely that in your case something similar to this occurred. You may either appeal from this judgment upon affidavits stating that you knew nothing of the action and were never served with a summons, or you may move in the Court where judgment was rendered to open your default or set the judgment aside for the reason stated. We would advise you to appeal.

Attachment—Meaning of "Residence" under New York Statute.

QUESTION: Kindly answer the following question through the column of your paper. Has A a right to get out an attachment against B upon the ground that B is a non-resident of the State of New York, when B owns considerable property in Chicago, and it can be shown that B intends to return to Chicago, but that at present B is staying in New York?

REPLY: The New York Code of Civil Procedure provides that where a party is a non-resident of this State an attachment against his property situated in this State may be issued where certain causes of action exist. The word residence, as it is used in Section 636 of the Code, has been defined by the Courts of this State to mean the abode or place where one actually lives and does not mean necessarily a legal domicile. One's legal domicile is the place they consider as their home and the place to which they intend to return. It is, therefore, plain that, although a person may not have his legal domicile within this State, he may, as far as this Section of the Code goes, be a resident. We are, therefore, of the opinion, that upon the state of facts you present A could not procure a valid attachment against B upon the ground that B was a non-resident of the State, and further, if an attachment upon this ground was obtained it would be vacated or set aside at B's request.

Rights of Property Owners.

QUESTION.—A and B own adjoining property in the city of Worcester, Mass. A lets a contract to C for the foundation of a building on his (A's) land. C erects a derrick on the land of A and asks permission of B to fasten one of the guy ropes on his (B's) land. The permit is refused, but C, with several of his men, come upon the land of B and fasten the rope there under protest of B. Has B the legal right to unfasten the rope and put it back on the land of A, where the derrick is, without applying to the court or city authorithe derrick is, without applying to the court or city authori-

REPLY.—We are of the opinion that upon the facts before us B would have the legal right right to remove the rope fastened upon his land without applying to the court or city authorities, provided that B could so remove the rope in question without committing a breach of the peace. We are of the opinion that the placing of the guy ropes on the land of B constitutes a trespass thereupon, and that B would have

the legal right to remove the rope, as well as any person who comes upon the land, provided the removal of either the person or the rope can be effected without undue violence. Should C, after a removal of the rope, continue to trespass upon the land of B by fastening the guy rope upon the land of B, or in any other way, we are of the opinion that B, upon application to the proper court, could obtain an injunction against C and his employees and agents restraining any of them from again trespassing upon the land of B.

In the event of C disobeying the order of the court, proceedings could be at once instituted by B to punish C for a contempt of court. In New York State, if the disobedience of the order of the court impaired or impeded the rights of B, damages could be assessed against C as well as punishment by imprisonment for the disobedience of the order of the court. Doubtless a provision similar to that contained in the New York statutes affecting the subject of contempt exists in the statutes of the State of Massachusetts.

Farwell, Ozmun, Kirk & Co.'s Fifth Annual Banquet.

The fifth annual banquet given by the wholesale Hardware firm of Farwell, Ozmun, Kirk & Co., St. Paul, Minn., to its employes, at the Ryan Hotel, St. Paul, Dec. 30th, was one of the most successful affairs the company has ever engineered for the entertainment of its large staff of workers.

The banquet took place in the large dining room of the hotel, and over 170 of the force were on hand to partake of the good things, and toast the members of the organization. The tables, three in number, ran the entire length of the room, and a ten-course menu was enjoyed to the utmost by all present.

Music was furnished by Miss Hope's Ladies' Orchestra, a programme of fifteen numbers, popular and classical, being rendered. Vocal numbers of a high class were given by the Orpheus Quartette, and Al. G. Flournoy amused his auditors with his pleasing songs and recitations. President R. A. Kirk, of the firm, was the presiding officer, and delivered the first speech at the conclusion of the feast.

Mr. Kirk said in part:

"We are not here to-night with business as our main object. In fact business has but little place with us within these

"One year ago, as we anxiously forecast the future, we felt that the greatest danger to the satisfactory results of the year then before us, lay in a possible falling market in the last half of the year. That danger was not realized. Favored by reasonably good crops, by the steady hand of great consolidated industries and also aided in this direction by the strikes that occurred, there have been, on the whole, steady markets, and we have come to the close of the year with very firm prices in nearly all lines, and with the prospect of a strong market for so long a period ahead that it would be utterly useless to make a guess as to the probable date when a heavy declining market will set in.

Our house has had a fairly prosperous year. For this we desire to thank most heartily everyone connected with us, who has tried to do his best to advance the interests of the house. Without your help and your hearty co-operation no such result could have been reached.

"We have all made mistakes. We have blundered too frequently—more so, I am sure, than we expect to do in 1902; but it is still true that from the great part of our force—both on the road and in the house—we have had hearty, loyal service—service, I believe, not surpassed by that of any other house in the land."

Mr. Kirk alluded feelingly to the death of Mr. A. J. Galbraith, who had been for nineteen years with the firm, during the latter portion of which he acted as counsel, and also expressed his sorrow at the mortal illness which now confines Mr. George S. Wiseman to his home. Mr. Wiseman has been with Farwell, Ozmun, Kirk & Co. for over twenty years.

In conclusion Mr. Kirk said that it remained for the workers of the company to stand faithfully to their posts and meet their duties unflinchingly that the period for the house during 1902 might be one of which none should be ashamed when

next they gathered around the festive board.

Mr. Charles H. Bigelow, Sr., was the next speaker on the programme, and he, in turn, was followed by Mr. T. T. Batchellor, of the Minneapolis *Hardware Trade*.

Mr. H. P. Hall of the St. Paul *Trade Journal*, spoke on behalf of trade papers, and the programme was concluded with several numbers from Al. G. Flournoy, and the singing of "America" by the entire assembly.

Ninth Annual Banquet of King Hardware Co.

The occasion of the ninth annual banquet to the employes of the King Hardware Co., Atlanta, Ga., which was given at the Kimball House in that city on the evening of Dec. 27, is one that will long be remembered by all those whose privilege it was to be present. The banquet eclipsed all of the preceding ones given by the company, and was a fitting celebration of the prosperity and growth of the company during the years that have passed. A plate was laid for every person in the employ of the King Hardware Co., and with but two exceptions they were all there to accept the hospitality which was tendered them.

The growing idea that the interests and welfare of the employer and the employe are inseparable was strongly illustrated in the spirit of friendliness and equality that prevailed around the banquet board. The owners and proprietors of the Hardware company sat alongside the employes and enjoyed the feast that had been prepared in handsome style. It was a banquet to the employes, but to one listening to the speeches that graced the occasion it seemed that they all were stockholders, such zeal was manifested in the prosperity which the firm is enjoying.

The banquet took place in the private dining room at the Kimball House and began shortly after 7 o'clock. It was after 11 o'clock before the glad company of co-workers dispersed.

A special table had been prepared for the colored employes and they partook of the same menu as the others. There were eight of them. The menu served was a delightful one and was thoroughly enjoyed by all. No wine was served as it is the desire of the employers in the King Hardware Co. to encourage sobriety and temperance among those who have charge of its affairs.

President George E. King graced the chair of toastmaster. When the feasting had advanced to the proper point Mr. King introduced Vice-president W. E. Newill, who made the first speech of the evening and eloquent words welcomed the banqueters and assured them of the firm's good will toward them.

Mr. Newill was followed by T. S. Methvin, one of the company's leading drummers, who spoke on "Why I Travel," in a way that kept his listeners deeply interested all the time he had the floor. He gave some interesting incidents with which he had met during his experience as a traveling man as well as many good pointers to others of the firm who might expect to become drummers at some time.

John E. Clarke spoke on "The Right Way." He told his fellow-laborers how to meet the customers and what the right way to treat them is. Mr. Clarke has been with the King Hardware Co. for many years, and was eminently fitted to speak on the subject assigned him. He is at the head of the house furnishing department.

Other speeches that were roundly applauded were: "What I Would Like," by L. D. Watson, shipping clerk; "Some Cutting Remarks," by John R. Webb, of the cutlery department; "God Wants the Effort," by A. B. Well; "How to Sell Stoves," by C. W. Merritt, and "How a New Man May Succeed," by G. A. Martin.

Dr. Theron H. Rice, of the Central Presbyterian Church, was present and opened the banquet with prayer.

Seventh Annual Banquet of The Gray & Dudley Hardware Co.

The seventh annual banquet of the Gray & Dudley Hardware Co., Nashville, Tenn., was given at the Tulane Hotel Thursday evening, December 26. Covers were laid for 150 men, and the menu was attractively prepared. The occasion has been an event in the life of the employes of the company for a number of years. Seven years ago the guests present numbered forty, traveling salesmen and all. Last night the number of traveling salesmen alone was that great. The growth of the company has been remarkable, and at present it is serving one of the most extensive list of customers in the country.

The employes came to the hotel in a body, marching by divisions, and the Gray & Dudley band furnished some excellent music. Between the courses of the banquet the quartette gave several excellent selections. The vocal music was well-timed, and the voices of the singers harmonized with pleasing effect. The members of the quartette are Mose Womack, Gene Martin, E. S. Buchanan and R. F. Martin.

After the guests had dined R. M. Dudley responded to the first toast: "The Gray & Dudley Hardware Co." He said, in part:

"Heretofore I have acted as toastmaster and endeavored to assist in the entertainment in this capacity, but it has been suggested that I should assume a more important role and a more dignified air, and deliver an address. The suggestion is so ridiculous that it dispels all dignity.

"You will excuse me, if most of my remarks are about the Gray & Dudley Hardware Co. The success of our company has been the wonder and admiration of every patriotic citizen of Nashville, and I am frequently asked, How did you do it? I deny the soft impeachment. I didn't do it, you did it! It was done by co-operation and organization. I believe that every employe of the Gray & Dudley Hardware Co. fully realizes that all our interests are mutual, and this great complination of talent, working mutually for the success of the organization forms almost an irresistible power.

"We have the finest Hardware store in the world, and the largest Hardware business south of the Ohio River, and we are only in our infancy.

"When we organized this business we were advised to go to Memphis or Cincinnati, where they have more railroads and a better river. I admit that we do not possess the railroad facilities we need, but this defect is being rapidly overcome, and I wish to impress you with the fact that while we admit that rivers and railroads are necessary to the commercial development and growth of a city, they are not the only factors in the building up of a great city. If Nashville, located as she is, in the richest country in America, finest climate and other wonderful natural advantages, had in addition to these blessings the shipping facilities of Memphis, there would simply be no Memphis."

The other speakers and their toasts were as follows:

Gen. L. C. Houston, of Georgia, "The Hardware Business;" W. C. Pollard, valedictory and salutatory; Geo. W. Everett, "New Hardware Rhymes;" O. L. Dortch, "Tale of Two States;" J. C. Wimberly, "The Gray & Dudley Hardware Co., in the Delta;" Marvin Mabrey, "The Boys in the Loft;" F. S. Harris, "Texas or Bust;" John M. Pickard and Ernest Sneed, "Our Rival Poets in Two Acts;" W. H. Fickling, "The Finest Hardware Store in the World;" Henry Hill, "Our Daily Statements;" Jake Boyles, "Our Office;" Thomas Dale, "Billing, Past and Present;" F. L. Martin, "Our Traveling Men;" Will Buchanan, "Undisturbed in My Old Territory;" S. P. Shannon, "Why J Am a Bachelor."

George W. Everett, who responded to "New Hardware Rhymes," made a decided hit with his speech and, although possessed of meter which would have horrified Milton, was one

of the funniest things on the programme and made a decided impression.

Marvin Mabrey, whose subject was "The Boys in the Loft," made an excellent speech, and F. S. Harris, who chose for his text "Texas or Bust," told many funny incidents about life in the Lone Star State.

Will Buchanan, who is said to be the only drummer on earth who is satisfied with his territory, responded to a toast on those loved spots where he is familiar with the bark on every tree and knows every man, woman and child on his route.

Thomas Dale, who spoke on billing, and who did not discuss cooing, made a decided hit, and S. P. Shannon explained in eloquent terms the question "Why I am a Bachelor."

There were other speeches and they were all good. It was a very late hour when the body of men adjourned, thanking their hosts for this seventh occasion of good cheer and happiness.

Berger Brothers Co. Have a Slight Fire.

Early on the morning of January 4 fire broke out in the pipe and gutter factory of Berger Bros. Co., Seventeenth and Clearfield Streets, Philadelphia, and gained considerable headway before discovery by the employes of an adjoining works. The fire department was prompt in responding to the alarm and quickly had the fire extinguished, but not until a small section of the second and third floors had been burned through, and the nearby stock damaged. The cause of the fire is unknown, but presumably came from sparks from outside sources, either from passing locomotives or an adjoining forge works. No hands were thrown out of work, and everything will be running in its usual order within a few days. The loss is principally on the building, which as near as can be estimated at present will range from \$1,000 to \$1,500.

National Sweeper Co. make a Change.

The increasing business of the National Sweeper Co., Marion Ind., in their legitimate line, that of Sweepers, has grown to such an extent that it has been decided by the company to dispose of their Wringer department, to which considerable attention has been given in the past, and confine their efforts to the manufacture of Carpet Sweepers exclusively. The Wringer business will be turned over to another company at once, who design putting in one of the most complete rubber plants for the purpose of manufacturing purposes of any company in the country, by the aid of which all the rolls and other rubber parts used in the manufacture of clothes wringers will be made economically and expeditiously. In addition to the rubber plant, a large foundry will be put up to produce the castings necessary in the manufacture of the "Magnet" brand of clothes wringers, embodying a series of improvements that will put them in a position to turn out wringers as good as can be made, at popular prices. In fact, the present plan calls for an expenditure of \$40,000 to \$50,000 for these and other contemplated improvements, and it is believed with the good start that the National Sweeper Co. has already given this branch of their enterprise, a large and profitable business in this line should be built up by those who succeed to this branch of their business. The name of the new company will be announced to the trade at an early date. This move on the part of the National Sweeper Co. will put them in a better position than ever to take care of their fast-growing Sweeper trade, which will absorb their entire time, and efforts will be put forth in the furtherance of the Sweeper business which will no doubt prove greatly to their advantage.

An Attractive and Artistic Calendar.

The Peters Cartridge Co., of Cincinnati, Ohio, has issued a particularly fine and striking calendar for 1902. The

background of the calendar is dark red, over a portion of which are sketches in gold showing a sportsman shooting from a gunning skiff, a hunter behind a rock preparing to make a shot on a deer, and a gunner afield with dog shooting quail. The most striking part of the calendar is a series of circles made up of the heads of Peters' rim and central fire metallic cartridges, and heads of Peters' shotgun shells. Between the outer circles and the next are excellent pictures of feathered game; between two other circles are the heads of furred game, consisting of caribou, cougar, moose, elk, deer, bear, antelope and lynx. The center piece is the head of a big horn, or mountain sheep. The heads of the cartridges are in gold.

This calendar is artistic and will appeal strongly to the sportsman. A reproduction of it is shown in the accompanying illustration, which does not fully show its beauty on account of the absence of the rich colors the calendar contains

The Peters Cartridge Co. wish so far as it is possible to distribute this calendar through the trade, to whom sports-

PETERS CARTRIDGE COMPANY'S CALENDAR.

men may apply for one, but if they are unable to procure the same through this source they can secure one by enclosing six cents for postage to The Peters Cartridge Co., Cincinnati, Ohio, or to the Eastern Department, 80 Chambers Street, New York, T. H. Keller, manager.

"Modern Paintings."

Under the above taking title appears at the present season the usual elegant Christmas greeting from the Sickels, Preston & Nutting Co., Davenport, Iowa, which consists of a portfolia of six reproductions from originals by color photography. The subjects are the "Pacific at Santa Clara," by 0. F. Baker; "A Prince of the Heather," by Ada L. Stewart; "The Horse Market, Normandy," by George Bernier; "Compulsory Education," by Alex. Van Autro and E. R. Maes; "An Interesting Family," by Ed. Musson, and "Contentment," by Theo. Van Sluys. These extremely handsome paintings are 11 x 14 inches in size, and are perfect specimens of modern art. This unique greeting has permanent value, and will beautify many happy homes for a year to come.

"Relentless time, that grasps each happy day, Still gives us joys we add to memory's store; As when the swelling ocean ebbs away, And lays a trail for treasures on the shore."

"Memory's store" brings back to me the good ship Robert Bowne, lying at the foot of Wall Street, "up" for San Francisco, with my old schoolmate, William Paulding, among the passengers, and who begged me to go with him. At that time I was a boy, employed by James M. Weed, Hardware merchant, at 179 Pearl Street, this city. While I could not go with him, and leave a widowed mother, I induced Paulding to take with him a lot of "Allen's" revolvers, the old "pepper box" style then in vogue. Paulding also sent other passengers to invest, and the result was that our stock of revolvers was cleaned out. But I bought all there was in sight, and for a time had "a corner" on them. I cleaned out the stock held by Blunt & Syms and Adam W. Spies, who were then in business on Maiden Lane, near Gold Street. Paulding, I believe, received an appointment in the United We were "chums" at States mint in San Francisco. Bragg's male high school in Crosby Street, prior to this, and I recall that our teacher, when examining the class in Grimshaw's History of the United States, would always give Paulding one particular question to reply to, no matter whether it was in his regular course to answer or not. Our teacher would stop suddenly, and then would ring out, "Paulding, who captured Major Andre?" Paulding rose, with dignity and pride replied: "John Paulding, Isaac Van Wert and David Williams," pronouncing the John Paulding long and loud, and in a lower tone, as well as cutting them short, the other two names, swinging his hands, and looking every inch the grandson of John Paulding, which he was.

How Isaac Bragg did drill us in pounds, shillings and pence, and when I remonstrated with him, would kindly reply that the day would come when I would thank him for it. Isaac Bragg was right, for in the importation of Hardware I found in making calculations of cost, that the instructions drummed into me were then and there invaluable. At that time we imported nearly everything, Clark's hollow ware, James' screws, Griffith's English and German horse nails in 25 lb. bags; Thompson's padlocks, Carpenter's rim locks, Butcher's, Beardshaw's and Jowett's files, Spear & Jackson's saws, Elwell's and Yates' planters' hoes, fry pans, all kinds of gun implements, Eley's and Baldwin's gun wads, Cox's and Eley's, as well as the French "G. D." Percussion Caps, table and pocket cutlery. And steelyards! How these steelyards would "open up!" Originally tied three or six pair in a paper bundle, they would generally have to be repapered, and to get them in ship-shape packages again required the patience of a saint. Now none of us Hardware boys were saints. The task we had on these steelyards would have tried the patience of Job, and although I have read considerable about his trials and tribulations, I fail to find that he ever tried to tie up steelyards. I believe he would have drawn the line at steelvards.

I remember I was set at work once to open a cask of Clark's hollow ware, placed on the fourth floor. The case when headed up was just about as tall as I was. All alone I went to work at it, and to reach the bottom tier of saucepans I was compelled to get inside of the cask and from thence throw them out. It was getting late, and I was getting tired. In closing the store, I was not missed. In fact, I did not miss myself, for the first I knew it was morning,

and never since have I enjoyed a sweeter sleep than I did that night, inside of that big English cask.

James' blunt screws was another "job" we were called upon to repaper, for fully 25 per cent. of an importation of them were in need of it. How different at the present day. Hardly an article that I have mentioned is now imported, all made in "God's country," made better, done up in better shape, and exported in large quantities. Who would think of importing James' blunt screws to place alongside of the production of the American Screw Co., foreign files alongside of our own "Nicholsons," or Spear and Jackson hand saws, when he can obtain the incomparable "Disstons." I would here say to my friend "Sam" Disston (who, bye the bye, is getting along in years himself, but still retains his pleasant smile) that I recollect his uncle Henry very well. Mr. Henry Disston would call upon the trade about twice a year, interview our gentlemanly buyer, and endeavor to "work in" some of Disston's saws. Our good natured buyer would generally tell Mr. Disston that our customers wanted Spear & Jackson's goods, or Taylor's, or Beardshaw's, whereupon Mr. Disston would quickly grab his small sample case in his hand, say "Good day," and also, "The time will come when they will want Disston's." Henry Disston was right, and told the truth then as he always did. We export these goods now to every clime, and the last time I was in London (England), I saw Disston's goods in the window of an ironmonger. Ironmonger is what our English cousins style a Hardware dealer. Another article that in my younger days was largely imported, was iron squares. But George Briggs introduced American steel squares and knocked the foreigners out in short order. Some of "Brades'" trowels are still imported, but "Rose," of Philadelphia, has the call from first-class mechanics the world over.

In my early days I took a great penchant to run to fires, and when the "old post office bell" rang out the alarm, if there was any way in the world for me to get off, I took advantage of it, and many are the times I have been scolded by the head salesman for so doing. But the "head of the firm" never censured me, and I will say in all candor that if I was away for an hour I always worked twice as hard upon my return. Who can blame me for taking an interest in the old Volunteer Fire Department, when such old and honorable Hardware merchants as the following "run wid der merchine." There was Adam W. Spies, president of the Stuyvesant Insurance Co., and a member of No. 5 Engine Co.; Robert Thompson, another Hardware merchant, and William H. Smith, of the firm of Henry Young & Co., both members of Engine 5; Warren Bliven, a member of Engine Co. No. 42. Van Nostrand, who kept a Hardware store, corner of Beekman and Pearl streets, was also a member of the Department. I was present at the Hague Street explosion, in February, 1850, about 10 minutes after it occurred, being on my way to open the store at 179 Pearl Street, where I was then employed.

The method of doing business in those days was quite different from the present. We then had our Spring and Fall seasons, when customers would lay in a six months' stock, buying on four, six and even eight months' time, giving their notes for the same, and the banks then would cheerfully take such notes, as collateral security for discounts. How a bank president of the present day, would look at a customer offering such paper. He would be put down as

"non compos." Most of our buyers kept general stores, and were not classified or restricted to one class of goods, as at the present, and a strictly retail Hardware store was comparatively unknown. Country merchants dealt in dry as well as wet goods, sold pork and peanuts, Hardware as well as hats and shoes.

Greenways, Henry & Smith, Don Alonzo Cushman, and Grant & Barton were among the heaviest dry goods jobbers: Wolfe & Gillespie, Wolfe & Bishop, and Ingoldsby & Halstead in Hardware; B. M. & E. A. Whitlock & Co., Strang, Murray & Co. and Hotchkiss, Fenner & Bennett in groceries. I forget many others, but must not omit to mention the genial "Bob" Hyslop, of the firm of Hyslop Bros., Hardware merchants, then in Pearl Street, opposite Cedar. Mr. Robert Hyslop complained to my employer about the boys in his store; said he could not get any one of them to do what they were told to do, without asking "a why or a wherefore." My boss told him he had a boy that would do precisely as he was told, even to throwing goods out of the door, if ordered so to do, and would ask no questions. "Bob" said he would "go a dinner" on that, one of the best that Clark & Brown could produce. Innocent youth that I was, of course overheard this conversation, and determined that my employer should win that bet, even if it cost me my life; but they must "question my integrity never." So when ordered to throw a three dozen package of Wostenholm's pocket knives out of the door on Pearl Street, I obeyed with alacrity, taking particular care to throw it in a puddle of water, and returned within the store as demurely as though the incident were an ordinary occurrence. I was then ordered to pick the package up, and strip the outside papers off, which I promptly did, and the inside packages were none the worse for their bath. I have never forgotten this little incident, and have always acted upon the principle of obeying orders. I recommend to the young men of the present day to do likewise. My employer complimented me for my promptness in carrying out his command, and while I advise my young friends, as above, let me say to employers,

"Spare not thy hand when approbation giving, Nor hold thy tongue till life away has sped: A single word of praise unto the living Is worth a panegyric on the dead."

JAMES E. HALSEY.

New Attractions For 1902.

A very useful and attractive novelty for the new year is the "Perfect" Mucilage Bottle just placed on the market by Cushman & Denison, of 240 West Twenty-third Street, New York. This is an article that is almost a necessity for every one using a desk. It is shaped like the ordinary mucilage bottle, but has a compartment containing water. The evaporation of the water prevents the mucilage thickening or spoiling so that it is always ready for use when wanted. The bottle is made of aluminum and practically indestructible, so that although its first cost is 50 cents, its durability and its economy of mucilage alone make it a cheap investment. When the saving of time and trouble, in having the mucilage always ready, is considered, a busy man cannot afford to be without a "Perfect" Mucilage Bottle.

Another novelty is called the "Perfect" Sealer and Stapler. This is a small device for securely fastening an envelope with a metal seal. The seal securely fastens the flap of the envelope to the body without injuring the contents or enclosures in any way. It can also be used as a stapler to fasten papers together. As it costs but \$1 with a box of 100 seals, it will not only serve a double purpose but at a lower cost than the ordinary stapling machine. Send a postal card to Cushman & Denison for a fuller description of these and other timesaving devices, and also ask about a special offer they are making to enable business men to become acquainted with the merit of their goods.

Gas Stove Trust is Formed.

JANUARY 10, 1902.

O. P. Moon, manager of the National Vapor Stove and Mfg. Co., announced recently that the "combine" of the gasoline and gas stove companies had at last been effected and the new organization would be known as the American Stove Company.

Although the combination has been settled, yet the organization is far from being complete. Some plants will be closed down, but the last one to be shut down will be the one in Cleveland, as it is the most complete in the "combine," the best equipped, and is operated at a lower cost. Besides these facts the company has the two best stoves, the direct action gas stoves and the insurance gasoline stove. The manufacture of these stoves will be continued, and the "combine" will probably enlarge the plant as needed and not only retain the men now employed, but send men here who are experienced.

The companies in the "combine" are: The Ringen Stove Co., the Quick Meal Stove Co., the Twin Burner Stove Co., of St. Louis; George M. Clark & Co., of Chicago; the Monarch Vapor Stove Co., of Mansfield; Schneider & Trenkamp, the Dangler Stove and Mfg. Co., the Standard Lighting Co., of Cleveland, and the National Vapor Stove and Mfg. Co., of Lorain. The company has filed papers of incorporation in New Jersey, with a capital stock of \$125,000. The incorporators are Clifford W. Perkins, A. S. Meeker, and K. K. McLaren.

The Lake Erie Specialty Mfg. Co.

The Lake Erie Specialty Mfg. Co., Geneva, Ohio, has lately been organized under the laws of that State. The following are the officers of the concern: T. H. Russell, president; E. M. Converse, vice-president; V. L. Atkins, secretary; C. I. Chamberlain, treasurer, and J. H. Lyons, superintendent. The company will manufacture a line of Plumbers' Brass Goods, which will include Lyons' Special Patented Goods. At present they are ready to quote prices on and supply promptly Fuller Bath Cocks, Fuller Basin Cocks, Stop and Waste Cocks, Still Cocks and compression work of all kinds. As fast as competent men can be secured and more machinery can be installed, they will increase the line on this class of goods, and bathroom fixtures in general, so as to make it as complete as any in the industry. We are advised that the company have a well equipped plant and intend producing a superior line of goods, the enterprise being amply financed, and the business managed by experienced men.

Splitting up Cycle Trust.

Another step in separating the various branches of the American Bicycle Co. under new companies was completed recently, when papers were taken out in New Jersey incorporating the American Bicycle Mfg. Co. and the International Motor Car Co. The formation of these two companies practically makes the original American Bicycle Company a stockholding company, for nearly all its assets are now owned by subsidiary companies.

It was stated in official quarters that the new American Bicycle Mfg. Co., which is capitalized at \$8,000,000, will operate and own all the bicycle plants of the old New Jersey corporation. The International Motor Car Co. will manage the automobile branch of the Bicycle Trust, a branch which has become an important part of its business. The capital of this company is \$2,000,000.

As was the case in the formation of the other companies' operating departments, the stocks and securities are owned by the American Bicycle Company. In each company the Board of Directors is as follows: Joseph E. Bromley, R. Lindsay Coleman, George Pope, Theodore E. Merseles and Paul Walton. All are American Bicycle Co. directors excepting the last named, who is a Jersey City man. George Pope was elected president of the motor company, and J. E. Bromley president of the bicycle company.

CHANGAN CHANGA

RECENT TRADE PUBLICATIONS.

Wisconsin Wheel Works, Racine Junction, Wis. Catalogue No. 9 of the Mitchell Bicycles and Motorcycles manufactured by this plant. Small size catalogue, oblong in form, of 24 pages, devoted to the exploiting of the Mitchell Motorcycle and Mitchell Bicycles as well. Full descriptions are given of every part connected with these desirable specialties which is demanded by those handling the same. They also issue a vest-pocket booklet on the Mitchell Motorcycle, giving directions for operating the same, illustrations of the various parts, and interspersed with good advice worthy of being read and carefully considered by all those handling motorcycles.

IDEAL Mrg. Co., Detroit, Mich. Booklet devoted to "Facts About the Volumeter Worth Knowing," having reference to the special product of this concern, and filled with information that makes it a very useful pamphlet to have around, at the same time inspiring one with the belief that it is one of the most important appliances to be part and parcel of the open-tank system of architectural development.

Sterling White Light Gas Lamp Co., 405 Locust Street, Sterling, Ill. 20-page booklet catalogue, in which is illustrated and described the Incandescent Vapor Gas Lamp manufactured by this company in a large variety of styles, suitable for all the possible wants of the trade, whether for domestic or store use. The pamphlet is fully illustrated, list prices being given in every instance, the entire catalogue being subject to discount. Full description is given of the details of construction, methods of manufacturing and details of cost as regards the expense of running this description of light.

SEARCH LIGHT MFG. Co., 175 E. Division Street, Chicago, Ill. Booklet catalogue of 12 pages, illustrating and describing to the fullest extent the Search Light Vapor Lamp, which is manufactured by this company. It is shown in a number of varieties of attractive styles from the single light to the three and four light chandelier, indicating a popular line of gasoline lamps suitable for the demand now prevailing.

SNELL Mfg. Co., Fiskdale, Mass., John H. Graham & Co., 113 Chambers Street, New York, Selling Agents. Illustrated catalogue and price list of 32 pages, printed on excellent paper, fully illustrated, with list prices complete. In its contents will be found all the known products of this company, including Carpenters' Augers and Bits, Ship Augers and Bits, Boring Machines and Carpenters' Tools. The Snell Mfg. Co. is one of the oldest concerns in the industry, and their name on a tool is always an indication of the best quality. They still retain the confidence of the trade, and this to our recollection is the most ambitious catalogue they have ever issued. It should largely increase the sale of their goods, and every Hardware dealer should be in possession of a copy.

MILLER LOCK Co., Frankford, Philadelphia. 38-page catalogue, which is called their Export Edition No. 17, in which full-size and miniature cuts are given of their entire product in the way of locks, together with sufficient description, catalogue numbers and everything complete except list prices. The weight for export purposes is given; also the weight in gross pounds of case lots of 25 dozen each. A very useful catalogue for the export trade.

LAWRENCE MFG. Co., Toledo, Ohio. Booklet catalogue of 26 pages of Dairy Supplies and other specialties of that character, including in its contents Star Cream Separators, Dairy Pails, Strainer Pails, Sap Buckets, Cream Can Setters, Swing Churns, Barrel Churns and Butter Workers. It includes a large variety of Milk Cans, running all the way from the four-quart size to the usual and customary 10-gallon size. This concern manufactures a full line of dairy supplies that would make this catalogue of importance to those handling the same.

Leader Mfg. Co., Hartford, Conn. Pamphlet catalogue, oblong in shape, 64 pages, showing a large line of specialties in Housefurnishings and other lines manufactured by this incorporated company, who also represent several other manufacturers whose specialties are embodied in the same catalogue. The catalogue is filled to repletion with desirable goods for every Hardware store in the country, and the dealer who has not already had one forwarded to him should request the same.

GRAND RAPIDS REFRIGERATOR Co., Grand Rapids, Mich., manufacturers of the Leonard Cleanable and Champion line of refrigerators, have recently issued their catalogue for the season of 1902. It contains 116 pages and almost as many elegant half-tone illustrations of their entire line, which is one of the largest manufactured in the country. The paper upon which this catalogue is printed is of high grade enamel coated, and on this the half-tone cuts are handsomely printed. A complete description of each style of refrigerator is fully and explicitly given, together with the weight and size of same. These refrigerators contain many points of excellence and merit, which is evident from the enormous sales of them that have been made in the past few years. Only recently this firm have found it necessary to erect another large factory building, 100 x 100 feet square, seven stories high, giving them an additional floor space of 80,000 square feet, and which, in addition to their old plant, gives them a total floor space of 205,000 square feet. Having this immense capacity the firm is enabled to manufacture great quantities of refrigerators ahead, enabling them to fill orders for the coming season on short notice.

In regard to the Leonard cleanable refrigerator, they say:

"We have made a complete departure from the ordinary style of ornamentation of refrigerators. We now depend entirely upon the natural beauty of quarter sawed oak, surrounded by a deep frame work of beaded moulding in all the front panels. This is more in keeping with the present style of high grade furniture and it is appreciated by buyers of refrigerators as a gem of the cabinetmaker's art. The finish is golden oak. Our new sliding adjustable shelves can be placed at any height desired without the aid of tools, by simply changing the guide strip on which the shelves slide from one slot to another. We are continuing the use of all our special features, such as the air-tight lock, the self-cleaning trap, the moveable flues for cleanliness, and the eight walls for insulation with mineral wool filling. We line these refrigerators either with zinc or real porcelain enamel. This is not white paint on galvanized iron, as used by some manufacturers, but the real vitreous porcelain on sheet steel, same as the blue and white kitchenware with which all are so familiar. The difference between this material and paint is vital to the durability and cleanliness of the refrigerator."

NEW GOODS AND SPECIALTIES.

Sanitary Dustless Floor Brush.

Milwaukee Dustless Brush Co., Milwaukee, Wis., are placing on the market through the Hardware and housefurnishing goods trade particularly, something entirely new in the way of a dust brush which possesses characteristics novel in conception that should give it a large and extended sale throughout the country. We give an illustration of this new brush herewith. It is constructed with a reservoir in its back which holds kerosene oil, from which one row of special fibre draws the oil down just fast enough to deaden the dust, roll it up into little balls and make it lie on the floor. The kerosene will feed just fast enough to accomplish this. There is an arrangement on the brush by which you can regulate the feed of the oil to meet the condition of your

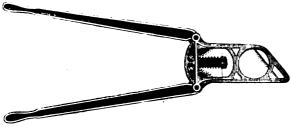

SANITARY DUSTLESS BRUSH.

floor. It is claimed that no fear need be entertained that the kerosene when used through the brush will leave the slightest stain or odor on the floor. These brushes are made in various sizes and styles for the purpose of sweeping offices, stores, halls, schools and public buildings. The company also make a brush on the same principle out of genuine Russia bristle. This bristle brush, however, is only to be used on hard wood, tile or other hard surfaces, and is sold with a guarantee, which should greatly increase its sale. It has been found that the Milwaukee Dustless Brush reduces the dust caused by sweeping upwards of 97 per cent. as compared with old methods. This is made the subject of an extended report of the Health Department of the City of Milwaukee, which the manufacturers will gladly mail upon request, a report which emphasizes the value of kerosene as a dust layer, and would give convincing proof of its importance and value for the purpose indicated.

Newton & McGee Patent Dehorners.

H. H. Brown Mfg. Co., Decatur, Ill., are placing on the market through the Hardware trade the improved Dehorner manufactured under the Newton & McGce patent, of which they are the sole manufacturers. It is claimed to be

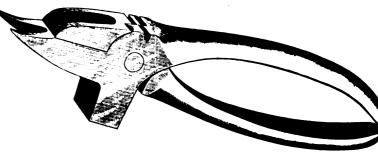

PATENT DEHORNER.

the latest improved Dehorner, and possesses one-third more power than any old style Dehorner previously made. As will be noticed in the illustration herewith, this new Dehorner has longer handles, has no rivets in the frame, and the blade is made upon an improved plan. It is claimed to cut perfectly smooth, heals very quickly, and causes the animal very little pain. The frames are made of malleable iron, and the blades of the best steel. It is made in four

styles of knives: No. 1, Calf Knife, intended for calves only, has a two-inch opening; No. 1, Revolving Cut, has a 3½ inch opening; No. 2, Draw Cut, for medium aged cattle, has a 3½-inch opening, and No. 3, intended for either old or young cattle, has a 4¼-inch opening. It is made interchangeable, so that extra parts may be at any time provided at a moderate cost. The knives are guaranteed, so that any break from a flaw or other defect, will be replaced without any expense to the purchaser.

Sterling Fence Tool.

Among the numerous specialties manufactured by the Sterling Wrench Co., Rockford, Ill., that meet with a ready sale in the stock of the Hardware dealer, the Sterling Fence

STERLING FENCE TOOL.

Tool is one that presents many features of utility. We give an illustration of this handy tool herewith. This Fence Tool may also be called a staple puller. It is especially effective in the building of barb wire fence. With it the operator can pull a staple without effort, cut his wire and drive his staple again. At the same time the operator has in his possession a strong and very effective pair of pliers, which will enable him to make a perfect splice. It is a good, strong, desirable tool, made of the best grade of cast steel, and oil tempered. It has met with a ready sale wherever introduced, and should be in every Hardware store handling barb wire fencing and the appliances with which it is constructed. It is made in one size only, the tool weighing about two pounds.

Tower Picture Adjuster.

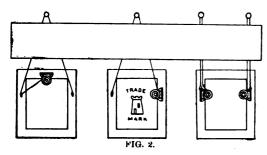

Grand Rapids Brass Co., Grand Rapids, Mich., are introducing through the Hardware and housefurnishing goods trade something entirely new in the way of a picture frame

FIG 1.

adjuster, which we illustrate in this article. This device is adapted to be secured to the back of picture frames. In the illustrations we give several methods of using the Adjuster. The cord can be shortened or lengthened by lifting the thumb piece, and simply turning the reel or ratchet. By the use of this simple method, the necessity for the cutting of

the cord that may be a trifle too long is done away with. It will also facilitate the hanging of the picture in a proper manner. In use the wire cord is put through a hole in the

reel and knotted. For very small, light frames the Adjuster is put at the top. On extra heavy pictures it would be more desirable to use two Adjusters, one on each side, by which method they can be regularly suspended by a vertical adjustment of the cord.

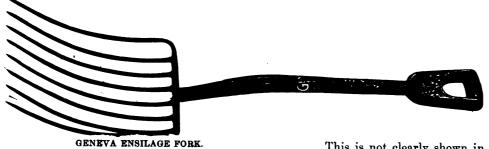

"Geneva" Ensilage Fork.

Geneva Tool Co., Geneva, Ohio, are placing upon the market a new article that will doubtless meet with an extended sale. It is their new Ensilage Fork, No. EOSD. It is manufactured from the best quality of steel adapted for the purpose, and before adopting the fork as part of their

handles are of a square pattern, finished at the end. The blades are referred to as hand made, being hammered from bars of the best grade of imported cast steel, and are claimed to be hardened and tempered with as much care as is used in the tempering of the best razors. The manufacturers state that this process of manufacture enables them to guarantee every blade to be perfectly satisfactory. The knives are made with blades from 5 to 16 inches by ½ inch. The company also make many other styles of butcher and kitchen knives, as well as paring, putty and bread knives and spatulas.

Phillips' Screen Doors.

A. J. Phillips Co., Fenton, Mich., have added to the large number of patterns of Screen Doors, with the manufacture of which they have been identified for so long a period, a number of new and desirable styles suitable for the coming season. They are extremely modern in style and equipment. We present herewith two illustrations that will convey some idea of their beauty of design and style of finish. The style "XY" (Fig. 1) is made from pine, natural finish, having two coats of varnish. Twenty artistic beechwood spindles are used at the top and centre of the door, as will be noticed in the illustration. The scroll work is extremely modest in character, and harmonizes very nicely with the turned work. In each of the corner brackets is a beaded ball of beechwood.

regular line, a number of special designs were submitted to prominent farmers in different sections of the country in order to obtain what would be considered a most desirable article for the purpose in point of style, shape, width, capacity, etc. Universal approval was given to the style finally adopted, an illustration of which we present herewith. It was decided that this fork was "just right," having the correct hang, the proper width, and provided with ample capacity for its use. It is manufactured with wood D handles, as will be noticed in the illustration, strap ferrules; the tines are polished, the upper portion being given a blue finish. The fork is provided with eight tines, each of which is 15 inches long, and the width at the points is 131/2 inches. This conveys an excellent idea of its suitablity in the way of capacity for the transferring of ensilage. There is no doubt but what it will meet with an extended sale, as it is an article that has been required by the agriculturist for a long Samples will be furnished upon request. They are marketed at a list price of \$24 per dozen.

Hartzell Skinning Knives.

Emmert Hartzell Cutlery Co., Gettysburg, Pa., are manufacturing a complete line of skinning knives, one of which is shown in the accompanying cut. A notable feature of

HARTZELL SKINNING KNIFE.

these knives is a broader blade than ordinary all the way through and particularly near the point. This feature is represented as permitting a longer cut to be given with the same stroke than with knives having narrower blades. The This is not clearly shown in the cut, but is quite attractive in reality, the pattern of the door being a very pleasing one. The style "Z" (Fig. 2) is similar in construction, the lower half being filled with double "fans" of beechwood rods, which

FIG 1.

FIG. 2.

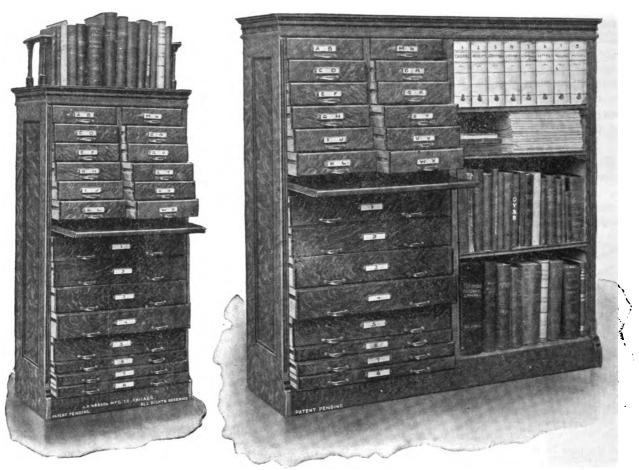

radiate from a fine beechwood rosette, in which the rods are glued. The wire cloth in the lower half of the door is well protected. These doors are made for the Eastern trade seven-eighths inch thick, with four-inch stiles. For the Western trade they are made 1½ inch thick, with three-inch stiles, and are sold by all the principal jobbers throughout the country.

Warren's Catalogue Cabinets.

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, have just completed two designs of Catalogue Cabinets which appeal to every Hardware dealer in the country, as many merchants are desirous of saving all valuable printed matter that reaches them, and which they frequently discard for want of a suitable place in which to keep it for immediate reference. Few dealers but would be glad to commence the new year with the advantages given by a cabinet so cleverly

half common. The present earnings are given at \$375,000 per annum, while large economies are expected to be effected. The estimate is \$100,000. The company appears to be very conservatively organized. The details of the consolidation will be closed up in New York this week. Following is the list of the companies included in the combination:

Standard Pneumatic Tool Company of Chicago, including all foreign or domestic patents (excepting England) and their two manufacturing plants at Aurora, Ill.

WARREN'S CATALOGUE CABINETS

constructed. In their circular they note its many conveniences, and say: "In the study of design and arrangement of these Cabinets, an incident occurred that greatly aided us through a call at another office desiring a cabinet that would relieve the desk, its top, its writing space, its drawers, the office table, the shelves and the floor from a variety of miscellaneous printed matter, circulars, price lists, periodicals, catalogues, letter heads, envelopes, and stationery of all descriptions, electrotypes, small samples, etc., a cabinet to be so constructed that there would be suitable space for all, each separate, so that any information can be quickly obtained or article found. Everything was "corraled," separated into bunches and correct space allotted to each. The result was a cabinet originated from actual necessity, forming one that responds in a most practical way to the daily demands for information through its variety of arrangement, thus making it desirable for every office. The service it renders will reimburse the investment in a short time, virtually making the purchase a loan for a brief period."

Pneumatic Tool Companies Combine.

Plans have been completed, says the Chicago Inter-Ocean, for the consolidation of 85 per cent. of the pneumatic drill business and 70 per cent. of the pneumatic power business throughout the world, the consolidation being worked from the United States. One of the principal companies is the Standard Pneumatic Tool Company of Chicago.

The company will be capitalized for \$5,000,000, one-half of which will be 7 per cent. cumulative preferred and oneThe International Pneumatic Tool Company, Limited, of London, England. Including English patents and their works at Chippenham, Wiltshire, England.

Philadelphia Pneumatic Tool Company of Philadelphia, Pa. Including all foreign and domestic patents and their works at Philadelphia, Pa.

Standard Railway Equipment Company, St. Louis, Mo. Including all foreign and domestic patents and their manufacturing plant at St. Louis, Mo.

Our Farming Implements in Russia.

The sale of American agricultural machines and implements during 1901 was the largest on record in the Russian empire, according to the annual report of United States Consul Heenan at Odessa, which will be published in full in the volume entitled "Commercial Relations for 1901," issued by the State Department. Mr. Heenan says that the increased tariff exacted by Russia on certain American products in retaliation for the American tax on Russian sugar, had not up to the date of his report, November 9, made much impression on the imports of those articles, but he adds that it is probably too early to determine the effect of the Russian increased tariff.

Mr. Heenan says that such machines as harvesters, binders, mowers, reapers and horse rakes of American make are so well and so favorably known as to defy serious competition in Russia, but that, on the other hand, there are a number of other agricultural implements such as plows, drills, seeding machines, etc., of American make which are not to be found in the empire. These latter, he says, would find a ready sale in Russia if patience and energy were used in their presentation to the agriculturists of the empire.

REVIEW OF THE MARKETS.

Wire Nails: The low quotations so prevalent in the market at the time of our previous issue have been strengthened by the fact that few, if any, recent quotations indicate a weak market. Many orders are being placed at present prices for future delivery, and the largest buyers, it is thought, will soon be in the market with season specifications, as dealers' stocks are reported quite light, and stability in quotations is earnestly to be desired. Quotations that represent the present market are: Carload lots f. o. b. Pittsburgh, \$2.00 to \$2.05.

New York. The local market is extremely quiet, with quotations as follows: Small lots from store, \$2.25 to \$2.30. Carloads on dock, \$2.25.

Cut Nails: The demand is quite limited in character, the low price of Wire Nails undoubtedly affecting sales. Prices for December were reaffirmed for January. The market is represented by the following general quotations:

 Carload lots
 \$2.05

 Less than carloads
 2.10

F. o. b. Pitsburgh, plus the actual freight to point of destination, terms 60 days, or 2 per cent. off in 10 days.

New York. Cut Nails are only in limited demand. Agents for the mills have agreed to a price of \$2.25 for nails from store, which is being adhered to. Jobbers obtain the same prices in a regular way, with an occasional cut of 2 cents a keg. The following prices represent the market:

Barb Wire: While orders are coming forward, with a promise of a greater activity at an early date, slight concessions from established quotations are occasionally heard from on large specifications. The stocks at mill are understood to be quite light, and belief is held that a brisker demand will greatly strengthen the market. Quotations are as follows, representing the market: F. o. b. Pitsburgh, terms 60 days, or 2 per cent. discount for cash in ten days:

To jobbers in	carload lots, H	ainted	\$2,60
44		alvanized	
"	less than carlo	ad lots. Painted	2.65
**	**	Galvani	zed 2.95
To retailers i	n carload lots,	Painted	2.70
**	"	Galvanized	3.00
"	less than carlo	ad lots, Painte	d 2.80
••			fred 210

Ellwood and Baker Wire is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plain Wire: A growing demand for Plain Wire is generally noticeable. It is fully as good as was anticipated, the manufacturers' requirements keeping the market in a satisfactory conditions. Regular quotations may be named as follows: F. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in ten days:

То	jobbers in carload lots	\$2.25	\$2.65
	" less than carload lots		2.70
To	retailers in carlots	2.35	2.75
	" less than carload lots	2.45	2.85

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the advances indicated in the following table:

	Plain Fen	ce wn	re Auve	ınces	(Cate	cn	wei	gnts)	
No	s.							Galva	anized.
- 6	to 9B	ase					:	\$0.40	extra.
10	\$	0.05 a		over					**

12	and 121/2	.25	**	**	".			.40	"
13		.25	**	**				.40	"
14		.25	44	••	٠٠ .	.		.40	**
15		.45	**	4.6	٠٠.			.75	**
16		.55	**	**	٠٠.			.75	**
17		.70	44	• •	٠٠.	. 		1.00	44
18		.85	**	• •	•• .			1.00	"

Horseshies: At a meeting of the associated horseshoe manufacturers on January 3, the price of all shoes was advanced 10 cents per keg. This makes the base price for Iron Horseshoes \$3.60 per keg, and of steel, \$3.35 per keg. To these prices freight from Pittsburgh to destination is added. In making this advance the manufacturers refer to the increased cost of coal, iron and steel during the past six months as justifying an advance of about 20 cents, but it was deemed advisable to be governed by a more conservative policy and make only the small advance referred to.

Copper and Brass: The market for the various manufactures of Copper and Brass has experienced some special reductions since the first of the year, in sympathy with the several declines in the quotations of Ingot Copper. Sheet Copper has declined 3 cents per pound, from 21 cents base to 18 cents, as at present. Sheet Brass and Brazed Tubes are each 5 per cent. lower, and Brass Wire and Rods 7½ per cent. lower, from the various lists at present governing these goods. Seamless Brass Tubes have declined 3 cents, but no change has as yet been made in Copper Rivets and Burrs.

Putnam Horse Nails: Putnam Nail Co., Neponset, Boston, Mass., in a circular relating to prices, January 1, announce that in deference to a demand from the trade they have determined to put up their regular Putnam Nail with a sharp point under the brand of Putnam Hot Forged and Sharp Pointed Nail. These goods will be made of the same iron and by the same process as the old reliable Putnam Nail, and will be packed in the regular Putnam boxes, with only the necessary change in the nomenclature to distinguish the Hammer Pointed from the Sharp Pointed Putnam Nail. Both styles of Nails are sold from the following list, which is subject to a discount of 33 1-3 per cent to jobbers:

No.	12 \$0.18	11 .18	10 .18	.19	.20	.21	.23
No.	5 \$0.26	41 <u>4</u> 35	4 50	3 1 00	2 2 00	1 3 00	

Neponset Sharp Pointed Horseshoe Nails are now quoted at a uniform price of 12 cents a pound, all sizes from 5 to 10, instead of being sold by list and discount as before. The above prices are subject to a cash discount of 2 per cent. if settlement is made on or before the 10th of each month for previous month's purchases. Freight will be allowed to points east of the Rocky Mountains in lots of eight boxes, f. o. b. to place of delivery, provided it does not exceed \$1 per 100 pounds from Boston or 70 cents from Chicago warehouse.

New Britain, Conn., The Stanley Rule and Level Co. and 107 Chambers Street New York, under date of January first have issued their new Price List No. 28, quoting revised discount on many of their goods. The list prices on Boxwood and Ivory Rules have been thoroughly revised, and an entirely new list has been adopted, with radical changes in the discounts. Boxwood Rules are now quoted at a base discount of 60 per cent. in place of 75 per cent. previously used. Changes have been made in list prices of Plumbs and Levels, Pocket Levels, T Bevels No. 25, Try Squares No. 20 and Planes. List prices on Wooden Plumbs and Levels have been revised, so that a base discount of 40 per cent replaces the old discount of 70 per cent. T Bevels and Try Squares in the revision are now quoted at 33 1-3 per cent., instead of 60 per cent. Many of the standard Bailey and Stanley Planes, both from wood and iron, have ben regrouped and new

prices made subject to base discounts of 20 and 25 per cent. in place of 50 per cent. given in previous price list. The company issue a condensed price list, giving the numbers and list prices of the various goods referred to in their illustrated price list shortly to be issued.

Cordage: The Rope market remains substantially without change. We continue the quotations named previously, which may be said to represent the market:

	Pounds. Cents.
Manila, 7-16 inch and larger	13
% inch	131/2
¼ inch and 5-16	
Sisal, 7-16 inch and larger	91/4
% inch	
$\frac{1}{4}$ inch and 5-16 inch	101/4
Lath Yarn, medium and coarse	
Jute Rope, No. 1	
No. 2	6

Linsced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....63 cents per gallon. In lots of 5 barrels or more......62 cents per gallon.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

THE CLEVELAND TRADE.

1902 opens favorably for manufacturers; for the first time for many years, they have few orders entered at low prices. One-half of the products of manufacturers are usually contracted for before January 1st, and for several years advance in price has made such contracts unprofitable. What contracts are entered at this year are largely at full prices, so that speculation is largely eliminated. The indications point to steady prices, and business can well afford to dispense with the gain of advances if it can be relieved from the loss of declines. It is expected that combinations can and will tend to avoid extremes.

The true test of business is success in normal terms. Recklessness often wins over business methods when it is favored with radical changes.

Whatever promotes and encourages compliance with the law of business is beneficent, for the law will assert itself sooner or later and the innocent will suffer with the guilty.

Prosperity among the manufacturers makes prosperity among the laborers, and this creates a demand, upon which mercantile, agricultural, and professional classes depend for business. When our balance of trade in the single year will buy the entire property of two such cities as Cleveland, the country seems to be on the way to wealth. We have, for a century been borrowers in Europe and have recently been beginning to pay our debts. When this is completed we shall become a creditor nation, and the demand for investments must largely increase. Our marvelous ability to absorb the immense amount of stocks that have been issued in the past

few years is surprising, and this expansion will continue so long as money is seeking investment. The inclination for better living is making necessities of luxuries, and vastly increasing expenses. What the wealthy once regarded as luxuries are fast becoming necessities among the intelligent laboring class. The surrender in large amounts by National Banks of their circulation should warn us of the danger of our present system. The Government, to relieve the money market, is paying a premium for its 2 per cent. bonds, thus decreasing the basis of circulation and inducing the banks to reduce it. The people, in this way, are paying a premium to reduce the circulation, and are at a large expense to pump from the spigot into the bung hole.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

The new year opens with business in a very satisfactory condition, and the first half of the year will equal or surpass any equal period in the iron and steel trade, so far as human foresight can tell anything of the future.

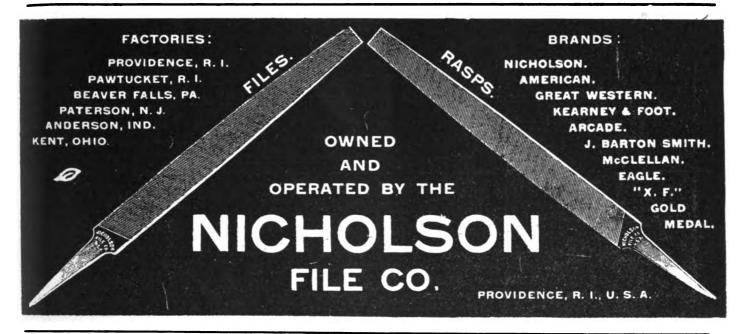

It would seem as though there is no good reason why the present prosperity should not continue indefinitely, but we know this has not been the history of the past, and although the strong combinations may be able to hold prices from soaring to the breaking point so rapidly, as of yore, yet we cannot hope that panics and consequent depressions have been entirely obliterated. The best we can hope for is that they will not be so violent nor so frequent as we have grown to expect.

The Logan-Gregg Hardware Co. celebrated their seventieth anniversary by their annual dinner to the employes, given Thursday evening, January 2. The entire force gathered in the first floor of the salesroom, which had been cleared of samples for the occasion; popular songs, an entertainment by a legerdemain artist, and addresses, filled up the time, with a very good history of the company's doings for the past year, written by one of "the boys," Good feeling prevailed.

LOGAN-GREGG HARDWARE Co.

THE BIRMINGHAM TRADE.

The year 1901 has passed into history, leaving behind a remarkable record, having been a year when all manufacturers of Iron and Steel products have reached their largest outputs. So large in fact that the railroads have experienced difficulty to provide transportation for the same and have for this reason retarded desired movements and curtailed the distribu-This no doubt will encourage the railroads to place large orders for locomotives and cars, and all the iron and steel works to prepare for larger outputs, which is a strong prophecy for the continued good business far into the new year, 1902, and when we finally reach the period when production overtakes and outruns home consumption, as we surely will, then we will be all the better prepared to compete in the outside markets of the world. Confining our remarks more particularly to our own district, we find the mines, furnaces, and mills all take to their capacity and are running full time with crowded order books. Our railroads find they need more locomotives and more rolling stock to handle the business offered them. Our bank clearings are larger than ever before, and the hardware trade and kindred lines are keeping pace with other things. We find the architects all busy, which means good work for the contractors and dealers in builders' supplies. We now have two nice office buildings under contract and further prospects of buildings that are up to date and in keeping with the general progress. The people who depend upon agriculture are somewhat disappointed in short crops and low price of cotton, while hay and corn which they are shipping in from the West are commanding high prices. There are some short pieces of railroads under contract, which help to keep up trade and demand for supplies in that line. We anticipate another active year, and hope we have several prosperous years still ahead of us. We are

glad to see that those prophets who predicted a quick return to low prices have been mistaken. The fact is that we have a new condition of things, so that the history of the past is not so good a guide as formerly.

We now have a sound system of finance with plenty of money and with confidence strong, and the large manufacturing interests are in fewer hands and under wiser management, who, no doubt, have a due regard for the public interest and will use every effort to hold down prices to a normal and profitable basis, and not discourage any new development which may be projected should prices become unreasonable. May Hardware be blest with a large portion of prosperity as our greatest of all countries advances to the lead of all nations.

Moore & Handley Hardware Co.

THE COLUMBUS TRADE.

The old year is out and the new year in. We hope no Hardware dealer is out, but all in, with a good balance on the profit side of the ledger. We also trust that everyone is feeling so well satisfied with the past three years' business as to make him anxious for the fray in 1902. One good thing to remember is, that no one can get all the business, and by cutting prices to the point where it will not make you any money is not good policy. The other fellow may meet your price and he may not. We have known dealers to advise customers to buy certain goods from their competitors, but caution them at the same time to come back for the rest of the items on the list and they would save them money, and it works, as a rule. Goods are in great demand, and every retailer in the country can make money if he is "on to his job." Unfortunately, there are some men in the mercantile business who should be doing something else. For instance, sawing wood. They are the fellows who demoralize prices. They have possibly been farmers. They see their home merchant raking in the shekels and think it is all profit, so they buy some one out at a long price and immediately begin to undersell their competitor. They have not figured on the cost of doing business, and after a few years the good farm they traded for the stock of goods has all been absorbed, or in other words "swiped." This very thing has happened in nearly every community. A man of this kind came to us to buy a stock order, half down and half when he made it. We asked him how much stock he wanted. He did not know. We wanted to put the notion out of his head and suggested \$1,000 (as \$500 was his pile). He thought that would do. We asked him how much he could sell in a year. He thought \$300. We then figured he might make 25 per cent. gross profit and had him put down the rent, taxes, insurance and living expenses. We told him he might be able to pay rent,

taxes and insurance, and, of course, he would live, but we would have to have cash for all the goods he bought from us. We did not sell him, but some one did. The man still lives and the party who sold him lives and waits.

On looking over last year's business there are many pleasant things to recall. Trade has been all we could ask for. Prices have not been demoralized more than is usual. There always have been and always will be leaders that are sold without profit. This is sad but true. We believe, however, that jobbers have been annoyed more the past year than ordinarily. It has been utterly impossible to get goods as fast as you could sell them. Even after shipment the transportation companies have been very slow in deliveries. Only in December one of the Trunk lines entering our city not only lost track of a car of nails, but for two days did not know where the train was. At least they so reported to us. We felt like singing the song, "He is a liar," because they can't lose a whole freight train in Ohio. There is no wilderness large enough except near Toledo, and this train came from the East. We hope manufacturers can supply the demand this year and railroad companies will lose no trains.

Orders are being placed freely for Spring goods, and the outlook is very encouraging. A prosperous year for all Hardware dealers is our wish.

THE SMITH BROS. HARDWARE Co.

THE DAVENPORT TRADE.

Robert Sickels, our worthy president, paid us his usual annual visit and has returned to New York. Wish he would make his visits quarterly. Market is unsettled in some staple lines, but many inquiries are coming in for car and mixed carloads of these goods. A few retail dealers are in town, but are buying sparingly, and are evidently here more to familiarize themselves with the new year prices than for laying in large stocks at present. December trade was good, and compared favorably with previous seasons. There is an effort being made to secure the repeal of the bankrupt law. If it cannot be repealed, it should at least be modified. There are no failures to report, and collections are fairly satisfactory. Much new building is promised, and indications are favorable for the Hardware as well as other lines of trade.

Yeast-I just saw your wife in the other room.

Crimsonbeak—Talking?

"Yes; I heard her say, as I passed, that she had arrived at a conclusion."

"Well, she hasn't done anything of the sort. She's talking yet."—Yonkers Statesman.

STANLEY RULE & LEVEL CO.

NEW BRITAIN, CONN., U. S. A.

Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

THE ST. PAUL TRADE.

With the advent of the new year, we look back over the last with pleasure in a business way, and feel that 1902 has in store as favorable prospects as the year just past. It seems to us that nothing can greatly disturb the market, and that our country, in its great prosperity, will consume as many, if not more, goods in this new year than in the one just gone.

C. W. HACKETT HARDWARE Co.

THE GRAPHITE TRADE.

There is very little new that we can say relative to the Graphite Trade. We are in the same position that we have been for many months back. In other words, we are doing our best to catch up with back orders, very many of which we have been obliged to carry over into the new year. We have bought considerable property, and have already begun to prepare for additions to several departments in our business. 1901 was a satisfactory year to us, and 1902 seems to promise equally well.

JOSEPH DIXON CRUCIBLE Co.

THE TOPEKA TRADE.

The business of the year 1901 is practically closed—the first year of the twentieth century will soon be ended.

Looking back over the twelve months, the writer for one, finds abundant reasons for gratitude and good will. No calamity has overtaken us as citizens of the State or Nation—our grains and live stock, our farm products of every sort, our lands and our labor, our skill and our industry, all have brought the most remunerative "prices" known for years.

Stability and confidence have been the features of trade, and certainly if you have conducted your affairs with business prudence you must have prospered.

Permit me to cordially assure you in behalf of my employers and myself that we rejoice with you. If you have prospered, we, too, have prospered with you.

The ethics of business are such in these days that the very fibre of business solidity is founded upon faith and mutually intimate relations of the most reciprocal character. It is well it is so—and the writer may be pardoned if he again renews his compact with his customers, in behalf of their interests as well as his employers, to steadily keep in mind this single purpose of faithfulness.

If one keeps faith with others, he will keep faith with himself

Entering upon the year 1902 I hope to retain for my employers and myself your confidence, your good will, and your valued patronage. The year just ended has been highly satisfactory, indeed, and for your generous favors, I heartily thank you.

With the compliments of the season, I beg to remain, cordially yours,

H. C. Rushmore.

Topeka, Kansas, December 27, 1901.

THE SAN FRANCISCO TRADE.

This second day of the new year finds the San Francisco trade in a jolly good humor, but too busy stock-taking, was the general remark, "to talk trade news and gossip before next week; in the meantime, however," remarked several representative Hardwaremen to your correspondent, "you may tell the editor of Hardware that we wish him and his paper and everybody connected with it, including both its advertisers and readers, as Happy a New Year as was 1901. And this, we take it, judged from a point of view based in our last year's experience, is a greeting kindly enough for anybody, unless they be swine-ishly inclined."

"Things on the Pacific Coast in the Hardware way are all right," remarked a jobber. "In making up the annual review report of American trade, as given out last week by Bradstreets, declaring 1901 to be 'a record breaker' among the five preceding years of commercial expansion enjoyed by the United States, the Pacific Coast was not found lacking in any particular to be counted in in making up this 'record breaking' record as applied to all America."

The address of Secretary Henry Gracey, of the California State Association of Retail Hardware Dealers, before the San Francisco and Oakland Retail Hardware Dealers' Association appears on another page.

INDUSTRIAL PRESS ASSOCIATION.

Primitive Farming Tools in Turkey.

The agricultural implements in use in Asiatic Turkey are practically identical with those employed in Biblical times. About the only modern apparatus is the fanning mill, introduced some years since by American missionaries. A somewhat rude, but effective, imitation of the American type is largely used. The operations of plowing, harrowing, cultivating, reaping, and thrashing are all performed with primitive appliances.

There is a marked demand for American tools, their strength and lightness recommending them above all competitors. The same remark applies to machinery in general.

Miss Budd—Is an amethyst supposed to be unlucky?

Mrs. Malaprop—Well, if he ain't he oughter be. Anybody that don't believe in God don't deserve to have any luck."—
Ex.

Address of Henry Gracey.

Owing to the unavoidable absence of President O. F. Sites, of the California State Retail Hardware Association from last month's second annual banquet of the San Francisco and Oakland Retail Hardware Association, the State society's secretary, Henry Gracey, was pressed into service without advance notice to respond to Mr. Sites' toast, "State Association Work," and on the spur of the moment, Mr. Gracey responded, winning generous applause with his off-hand speech, substantially as follows:

Mr. President and Fellow Hardwaremen:

The fifteenth of next February the California State Retail Hardware Association will be one year old. The object of this formation was and is to systematically district and organize the State into local associations of our fellow tradesmen, preparatory to becoming affiliated with the State body.

The State Executive Committee, up to the present time, has been untiring in an effort at organizing our brothers in the trade throughout California, circulars bearing upon the importance of organization and affiliation having, from time to time, been sent to every retail Hardware dealer. And it is a fact, to the great credit of the State Executive Committeemen, that they often neglected and at times left their business to canvass our vast commonwealth to interest retail Hardware dealers in the association work.

At the time of the organization of the State association there were but two local societies in our line representing the State, the Pacific Retail Hardware Association, with head-quarters at Marysville, and the San Francisco and Oakland Retail Hardware Association, their combined membership aggregating 98 dealers. To-day, after less than ten months' work, we have three additional local bodies, the Central Retail Hardware Association, with headquarters at Salinas; San Joaquin Valley Retail Hardware Association, with Fresno for headquarters, and Southern California Retail Hardware and Improvement Association, headquarters being at Los Angeles.

These five well-organized local bodies, built up within the limits of three districts of the State, have a membership of over four hundred retail Hardware dealers. And the good work of dividing the whole of our great State into districts and organizing in them the local retail Hardwaremen, is in active progression. I am pleased to be able to say that a majority of the most prominent dealers in the State belong to and are active in our association work.

The future hope for the existence and usefulness of the State organization depends upon our future acts and the impression these acts leave in the minds of our wavering brothers. And so, each one of the enthusiastic 400 now organized is feeling a sense of personal responsibility for the success of the work, and warming up to it with a desire to become acquainted, each with the other, and to devote much of the same zeal, industry and intelligence to the work as each one shows in his own home store business.

I know that we can all be relied upon to bring out of this association enterprise results that will convince the most skeptical that there is merit in the cause; that there is a great need in the retail Hardware ranks for a State organization of this kind, to be identified as a living portion of the greater power—the National Association.

I believe, gentlemen, we are of like opinion, that we now are face to face with new conditions, not too difficult to successfully meet and manage, however, if we will but become a unit. The manufacturers and jobbers are not only not unfriendly toward us, but on the contrary, very friendly. They realize our value and want our business. But the catalogue houses and department stores are more brisk than we have been, and have already put themselves in shape to do business broadly and for cash. We have been following old lines; they have marked out new ones.

The manufacturer and jobber want customers that will make them the most money in the shortest time, so it seems to me advisable at this time to consider the newest and improved methods which will tend to make us more valuable to our manufacturing and jobbing friends and thus naturally bring them over closer to our side, rather than adopt an aggressive course, now or at any time, unless so compelled to do. Who are the legitimate distributers of factory products; we do our business legitimately and on close margins. But all the people are not patronizing these great city department stores, and some who did have been cured.

While we feel the stings of their competition, we are assured that these houses are feeling our awakening, and the better we unite, and the quicker we put cash and sympathy with the National Association, the nearer we will get to the jobber and manufacturer, and the better will we be hated by the piratical catalogue houses and department stores.

The retail Hardware merchant who believes he can paddle his own conoe, just as he has always been doing or as his father did, will be apt to wake up to find the bottom ripped out of his canoe, and sink, as was reported McGinty did, "to the bottom of the sea." Our pressing need is this State organization, and the strongest one that can be formed, composed of men of the trade who can mix with intelligent freedom among their fellows, men who can answer our wavering brother's inquiry as to what has been and can be accomplished by organization.

If what I have said had been publicly uttered twelve years ago, it would have fallen on deaf ears, but now, midst our new conditions and the piratical competition that has brought about many changes, I see it in your faces and attention that you are hearing me with favor.

In conclusion, I will say that the jobbers are the retailers' natural friends. They have studied trade conditions closer and better than we have, and they are in closer touch with the manufacturer than we can hope to get. They realize that our business is more or less demoralized, and they know why it is so, for they frequently are in contact with the same competition and know the difficulties incident to the common enemy. I hope we may ever consider that we have no more loyal friends than our sort of fellows of the Hardware jobbing trade.

Business Methods in use in Russia.

The Germans are probably the only people who have a thorough knowledge of Russia in a business way, and they are said to suffer very few losses. Commercial agencies such as Dun's and Bradstreet's are not allowed in Russia. The Germans have a system of their own, and there are agencies in Berlin which can give the business rating of almost any firm in Russia. These agencies are said to receive quarterly returns regarding business houses in this country. It is not surprising, therefore, that the Germans should control so large a portion of the Russian trade.

The Germans have agents in the principal towns of Russia, and these agents subdivide large areas in the various provinces, and each subdivision has an agent who is responsible to the principal in the large towns. These agents in every instance speak German as well as Russian. In addition to this, travelers are sent at least twice each year from Germany to visit the various agents and to keep account of the business done. Goods are sold on long credit, and are, as a rule, amply secured. This system is the result of many years of careful study and observation on the part of official as well as business Germany. Our business men would do well to take the Germans and their methods in Russia as models.

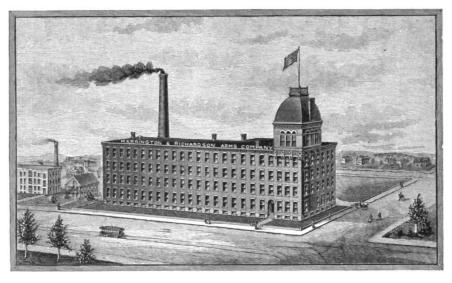

Æ

Don't never trust a feller that's always suspectin' somebody else.

Growth of a Great Business.

F. Wesson and Gilbert H. Harrington, in 1871, started at 18 Manchester Street, Worcester, Mass., in a very small way to manufacture one style of a single action revolver fitted with a shell ejecting device invented and patented by Mr. Harrington. It is believed to have been the first successful device applied to revolvers for ejecting empty shells without removing the cylinder. Mr. Wesson's interest was bought out in 1874 by Mr. Harrington, who shortly afterward

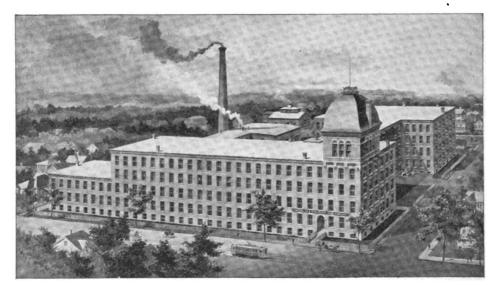

was at stake on each one. In 1893, the erection of the present main four story and basement factory building, at the corner of Park Avenue, Chandler and Abbott Streets, was begun, and it was completed in the Spring of the following year. It covered an area of 50 by 1800 feet, affording accommodations for the 250 men then employed. A two-story and basement addition, 50 by 60 feet, was built in 1900, and another addition, 50 by 90 feet in area, and four stories and basement in height, has just been completed. The

HARRINGTON & RICHARDSON ARMS CO'S FIRST FACTORY.

formed a partnership with William A. Richardson, under the firm name of Harrington & Richardson. The business was rapidly growing, and in 1876, it became necessary to move to more commodious quarters at 31 Hermon Street. Four years later, the firm became sole licensees to manufacture in the United States, under the double barrel hammerless shot guns, famous Anson & Deeley patents. These guns ranged in price from \$85 to \$300, and during the five years

present number of employes is over 500. Their catalogue now shows 157 separate and distinct revolvers besides autimatic and non-ejecting single guns in two gauges, with both steel and twist barrels. About January 1 they will also be able to supply these guns in 20 gauge. They manufacture what is without doubt the most complete line of fire arms on the market, and the great demand for their revolvers and and guns is proof of it.

PRESENT PLANT OF HARRINGTON & RICHARDSON ARMS CO.

they were manufactured, won an enviable reputation for durability, simplicity, accuracy and finish.

In 1888, the business was incorporated as the Harrington & Richardson Arms Co., since which time it has had a steady and healthy growth, due to the fact that the H. & R. revolvers are made with the same precision and accuracy in every part that would be required in constructing a fine watch, and hence have achieved a reputation that is the envy of all firearms manufacturers. It is a business built up on honor, and each revolver or gun manufactured by the company is made with the same care and the same regard to absolute safety as though the entire reputation of the company

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED DEC. 23, 1901.

309,533. Saw Tooth Swaging Device, J. E. Emerson, Beaver Falls, Pa.

309,551. Tin Seaming Machine, W. A. List, Wheeling, W. Va.

689,564. WRENCH, G. Partillo, Sarnia, Canada.

689,569. Door Hanger, J. E. Ahlvin, Joliet, Ill.

689,580. DETACHABLE SAW HANDLE, H. Evans, Buffalo, N. Y.

689,692. Construction of Wrench Handles, F. Searle, assignor to Loring Coes & Co., Inc., Worcester, Mass. Corporation of Mass.

PATENTS EXPIRED DEC. 30, 1901.

309,856. HANGER FOR A PAIR OF DOORS, E. N. Hutchins, Lawrence, Mass.

309,863. Pocket Knife, B. McGovern, Bridgeport, Conn.

309,868. Auger, H. Olson, Olesburg, Kans.

309,876. RATCHET DRILL, C. Reising, Plantsville, assignor to Peck, Stow & Wilcox Co., Southington, Conn.

309,932. Door Check, M. H. Crane, assignor to Crane & Breed Mfg. Co., Cincinnati, Ohio.

309,963. Lock, E. Korbel and L. Kurz, New York, N. Y.

309,988. FASTENING FOR MEETING RAILS OF SASHES, T. S.

Smith, assignor to C. H. Rentz, New Haven, Conn.

310,033. Adjustable Butt Hinge, R. G. S. Collamore, Boston, Mass.

PATENTS ISSUED DEC. 31, 1901.

689,846. Can Opener, J. Beauchemin, Waterloo, Canada.

689,851. ICE SKATE, R. Bustin, St. Johns, Canada.

689,880. Mfg. of Knife Blades, R. Herder, Ohligs, Germany.

689,945. Lemon Squeezer, A. Baumgarten, Freeport, Ill.

690,056. SASH FASTENER, E. A. Hills, Wethersfield, Conn.

690,090. Coffee Pot, A. M. Amos, Buffalo, N. Y.

690,118. CAN OPENER, R. W. Newton, Newton Center, Mass.

The United States Heads In The Procession.

The standing of the United States with her neighbors, and especially with those of Europe, is illustrated by some statements made by the London Daily Mail Year Book for 1902, a copy of which has just reached the Treasury Bureau of Statistics. In its various chapters it discusses various features of conditions in the United States. Under the head of Wealth, it places the United States at the head of the list of great nations, the figures of wealth being: United States, £16,350,000,000; United Kingdom, £11,806,000,000; France, £9,690,000,000; Germany, £8,052,000,000, and Russia, £6,425,000,000. While the United States heads this list of countries in its wealth, it shows the smallest national indebtedness, the figures being:

United States	
Germany	651,000,000 706,000,000
Russia	711,000,000 1 239,000,000
The percentage of debt to wealth is given	
United States	
Germany	8.1 "
Russia	11.1

Under the head of Commercial Competition it says that "the first year of the twentieth century opened badly for two of the four leading industrial nations." The trade of the United States was good and showed no decline from the boom-

ing period of 1899 and 1900, but rather, in most industries a continuance of the boom of which the United States has had so disproportionately large a share, and France, which had responded less expansively to the boom, remained unaffected by the decline and progress elsewhere. In England and Germany, however, the decline was felt acutely.

Under the head of the World's Wheat Crop it shows the United States far ahead of any other country in the production of wheat, the estimate of the world's crop for 1901 being:

United States90	millions	Quarters (*)
Russia		••

Spain	**	
Roumania		
Rulgaria12	**	**
Germany	**	44
United Kingdom 7	**	44
Australia 7	**	44
Quarter equals 8 bushels.		

Under the head "Fight for the Iron Trade," it calls attention to the fact that the United States is now the world's largest producer of pig iron and steel, and says, "It will be noted that the United Kingdom has lost ground, producing 396,749 tons less in 1900 than in 1899, the total for Great Britain being nearly 5,000,000 tons less than in America. An unsatisfactory feature in the British iron and steel trade is that in 1900 we imported more iron and steel than in any previous year, and exported less, while the United States exported more than ever." The tables accompanying this statement shows the pig iron production of 1900 to be:

United States 13,789,242 United Kingdom 8,908,570 Germany 8,494,852 France 2,609,494 Russia 2,821,000 and of steel	tons.

Germany	**
France 1,624,046	44
Russia	"

The Untted States Co.

The United States Co., a New York corporation for manufacturing and jobbing Hardware, has just been organized in this city, with offices at 13 to 21 Park Row, beginning with a capital stock of \$50,000. The incorporators and officers are as follows: Fred H. Cozzens, president; Horace C. Hutchins, vice-president and treasurer, and R. W. Hall, secretary.

Mr. Cozzens, the president, was secretary of the National Association of Retail Hardware Dealers in 1900, and in that capacity was brought into personal contact with many of the leading retail dealers of the Middle West, and his attention was directed to the ruinous competition these merchants were compelled to meet in the shape of catalogue houses, department and racket stores, who, buying direct from the manufacturer at just about jobbers' prices, were enabled to resell to the consumer at very little more than the ordinary retail dealer was compelled to pay his jobber, and appreciating the vital importance of some plan whereby the retail dealer could be enabled to meet this competition on a sound basis, decided to undertake the inauguration of a plan which would permit the goods to be placed in the retailer's hands at figures which would enable him to meet any and all competition regardless of the source. To accomplish this end, the United States Co. has been organized. Warehouses will be maintained in Chicago and New York, where necessary stock will be carried.

Mr. H. C. Hutchins, vice-president, will have direct charge of the Sales Department, in which he has had an extensive experience in handling the retail trade, and he is, therefore, especially qualified to undertake the work.

JUST THE RIGHT SIZE TO DO GOOD WORK.

REDUCES DUST 97%

The result of a test by the Milwaukee Health Department proves the superiority of dustless sweeping over all other methods.

Che World's Only Sanitary Dustless Floor Brush

is a patented device having attached to it a reservoir which contains kerosene oil. This oil is absorbed by the specially prepared fibre in the brush, causing just sufficient moisture to roll the dust into balls or pellets instead of rising in the air.

The World's Only is sanitary, destroys germs, prevents disease, sweeps cleaner, quicker, better than any other broom or brush.

We want a dealer in every town to represent us.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardward trade only, and for such quantities as are usually purchased by retail dealer. They are carefully revised and represent quotations at which purchases can b made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

BOOKS YOU NEED IN YOUR BUSINESS.

Universal Dictionary of Weights and Measures,

Ancient and Modern, reduced to standards of the U.S. By J. H. Alexander—New Edition—Enlarged—Cloth Binding, \$3.50

Link and Valve Motions Simplified,

Illustrated with 20 wood-cuts and 20 lithographic plates, together with a travel scale, and numerous useful tables. By W. S. Auchincloss—13th Edition—Revised—Cloth Bound, \$2.00

The Mechanics' Friend,

A Collection of Receipts and Practical Suggestions relating to Aquaria, Bronzing, Cements, Drawing, Dyes, Electricity, Gilding, Glass Working, etc., etc. By W. E. A. Axon-Wood Cuts and Diagrams—Cloth, \$1.50

Hydraulic Motors, Turbines and Pressure En-

gines For the use of Engineers, Manufacturers and Students. By G. R. Bodmer—204 Illustrations—Cloth, \$5.00

Machinists' and Steam Engineers' Practical Cal-

Culator Useful Rules and Problems arithmetically solved, and general information applicable to Shop Tools, Mill Gearing, Pulleys and Shafts, Steam Boilers and Engines, Tables and Instructions for Screw Cutting, etc. By D. B. Dixon—Morocco - \$2.00

Dictionary of Manufactures,

Mining, Machinery and the Industrial Arts—By Geo. Dodd—Cloth Binding,

Skeleton Structures

Applied to the building of Steel and Iron Bridges—By Olaus Henirci—Illustrated,

Iron Truss Bridges for Railroads,

The Method for Calculating Strains in Trusses, with a careful comparison of the most prominent trusses, in reference to economy in combination, etc. By Col. Wm. E. Merrill, U. S. A.—Illustrated—Cloth,

Metal Turning,

By a Foreman Pattern Maker—Illustrated with 8r engravings—Cloth Binding, • \$1.50

Modern Moulding and Pattern Making,

A Practical Treatise upon Pattern, Shop and Laundry Work; Embracing Moulding of Pulleys, Spur Gears, Worm Gears, Balance Wheels, etc. etc. Latest improvements in American Cupolas, Large collection of carefully selected Rules and Tables for every day use in Office, Pattern Shop and Laundry. By Joseph P. Mullin, M. E.—Illustrated—Cloth,

Toothed Gearing,

A Practical Hand Book for Offices and Workshops by a Foreman Pattern maker. 184 Illustrations—Cloth, \$2.25

Standard Electrical Dictionary,

A Popular Dictionary of words and terms used in the practice of electric engineering—350 Illustrations. By T. O'Connor Sloane—Cloth Bound, \$2.50

Electrical Transmission of Energy,

A Manual for the Design of Electrical Circuits. By H. V. Abbott—Cloth Binding

Electric Lamps and Electric Lighting,

Being a Course of Four Lectures delivered at the Royal Institution. By Prof. J. A. Fleming—Fully Illustrated—Cloth Bound,

WILL BE SENT POST PAID ON RECEIPT OF PRICE NAMED.

We will always be glad to furnish quotations on any technical work not found in the above fist.

STAR GOODS are made in 7 complete lines, Shears, Scissors, Razors, Tailors', Snips, Pruners and Sheep Shears.

There are 7 reasons why they are sold by live merchants, and used by the better class of workers:

1st. Goods branded with a STAR are first quality only.

All STAR brand are made in America, by American work-

3d. STAR, the standard for weight, finish and cutting quality.

Not connected with any Trust.

Sold through Hardware trade only.

4th. Gas tempered STAR brand, retain their edge.

5th. STAR goods are tested, and always run uniform.

6th. Goods less in price than STAR are cheaper in quality also.

7th. S'AR material and mechan-ical construction is the safest warrantee.

WHY IS THE THE BEST ROTARY

WASHING MACHINE?

-It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.

noiseless.

The tub is made of Louisiana Red Cypress Lamber, cherry finish; the legs are solid with tub (not removable, breakable legs fastened with screws).

The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot srap-suds, and cleaning them without rubbing them to pieces.

This washer is made by experienced mechanics, and will out-last any other washer on the market.

The tub has a wringer box fastened with steel brackets.

The lid on the tub closes tight, no escape of steam.

Manufactured by H. F. BRAMMER MFG. CO., DAVENPORT, IOWA.

HARDWARE

F. E. Myers & Bro., Ashland, Ohio, the manufacturers of the celebrated Myers pumps and hay tools, have just completed the erection of a large raw material storehouse. It is a three-story brick, 50x160 feet, of modern architecture. They are also increasing the capacity of their power plant by placing a 400 h. p. automatic high speed engine, a battery of Wilcox & Babcock boilers, two extra large dynamos and additional motors. These additions will make their power, light and storage capacity nearly one-third greater than here-tofore.

C. T. Williamson Wire Novelty Co., Camp and Mulberry Streets, Newark, N. J., have recently issued an important 60-page catalogue, which embraces their entire line. The completeness of this large-size pamphlet indicates the almost endless variety of Corkscrews, Hooks, Champagne Taps and Bent Wire goods that are now manufactured by these pioneer makers of this profitable line for the dealer to handle. The trade interested in the sale of specialties of this character are invited to write for their new catalogue, which the company, upon request, will gladly mail free of expense.

William W. Matthias, for some years traveling salesman for The Eagle File Co., at Middletown, N. Y., and more recently sales manager of the J. Barton Smith Co., of Philadelphia, was, on January 1, appointed assistant manager of the New York Knife Co.'s factories at Walden, N. Y.

•

Among the number of special features distributed by the J. D. Warren Mfg. Co., Chicago, to keep the name of their Hardware Shelving before the people, they are distributing this year a very handsome little memorandum book with a celluloid cover, on the outside of which reproductions of Roman art are given, and also a reduced illustration of the interior of the "handsomest Hardware store in the United States." Among the pages for memorandum will be found a list of antidotes for poisons, list of foreign coins with their value in United States money, tables of foreign weights and measures, with their American equivalents, interest tables from 6 to 20 per cent., official population of the United States, one hundred largest cities in the world, rates of postage, etc. These handsome and handy booklets will be forwarded to the trade on application, and they indicate a degree of usefulness that would make such application a very desirable thing to make. We have also received from the above company a useful and attractive hanging calendar exploiting the products for which they are famed from one end of the country to the other, illustrating in the center their magnificent product, showing the Gray & Dudley Hardware store in all its artistic excellence.

F. E. Myers & Bro., Ashland, Ohio, issue, as usual, a catalogue calendar which is practically a duplicate of those they distribute annually, to assist in the work that their regular catalogue is supposed to initiate. It is a large hanger with views of the firm's works shown graphically on the upper portion, while the remaining space is filled with cuts of the Myers product, embracing as it does Pumps, Haying Tools, Door Hangers and a large and extensive line of specialties. The cuts are all carefully numbered, in order that reference may be made to the general catalogue issued by the firm, to this extent forming a valuable adjunct. The calendar itself occupies the center of the hanger, where a space is left in the lower part to put in the dealer's name, if necessary.

Charles F. Guyon, who since 1896 has had his headquarters in London, representing the Monarch Cycle Co., and during the past year or two the interests of Markt & Co., has since January 1 been connected with the export business of Alfred Field & Co., 93 Chambers Street, New York, in whose interests he sailed on the *Teutonic* for Liverpool January 15th. The thorough knowledge which his long residence abroad has gained him in connection with this important branch of the Hardware business will make his present connection mutually advantageous.

Snell Mfg. Co., Fiskdale, Mass., are distributing at this season of the year a very artistic hanging calendar adorned with a reproduction of a painting called "The Elopement," by M. Wunsck. This is printed in a number of colors, and gives the calendar an air of artistic excellence that should be extremely apt to insure a prominent place in the office for its location.

The Holiday special number of Farm Machinery of St. Louis, under the editorial management of C. K. Reifsnider, was one of the handsomest and most attractive special numbers that have reached our editorial sanctum. They illustrate in their columns, in a very original manner, with fine half-tone engravings, portraits of the prominent men in the line of farm machinery and agricultural implements, the portraits forming part of a larger illustration, in which the homes of the gentlemen are also shown. These are profusely illustrated throughout the special number, and form a very attractive feature, and indicate by the universally handsome homes occupied by these gentlemen the profitable nature of the business enterprises with which they are connected. Reference is made to the fact that the advertising patronage of the paper has grown to such an extent of late to make it necessary to increase the size of the pages more in conformity with other papers devoted to the advertising of the same line of manufactures. It certainly indicates a degree of prosperity that we are pleased to note, and congratulate Brother Reifsnider on the fact that he is keeping well abreast of the prosperous times.

William M. Levyn, Hillman, Mich., desires the catalogues of the manufacturers of Stoves and Ranges, Hardware Specialties, Builders' Hardware and Cutlery. Having embarked in business with a view to carrying a complete stock embracing the above lines, he hopes to be favored with the class of assistance that good catalogues always present.

We acknowledge the receipt of the superb illustrated Special Edition of the Chattanooga Tradesman, which is their twenty-third annual number. It is one complete in every respect with ably written articles, many of which are finely illustrated, and all of which are of a character that will command attention by their excellence. Among these may be mentioned the following: "The Southern Coal Oil Fields," by Woodhead-Graham-Bowron; "The Need of the South for American Ships," M. A. Hanna; "The South from a Northern View Point," J. C. Bayles; "From a Northern View Point," editorial; "Investments in Southern Forests," C. A. Schenck, Ph. D. We are pleased to note the signs of abundant prosperity that are visible in the advertising pages of our esteemed contemporary, and trust that this year will be one producing equally gratifying results.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Extremely gratifying reports come from the manufacturers of leading lines of goods distributed by the Hardware trade. The orders received from the jobbing interests since inventories have been completed, and necessary plans laid out for future achievement, are sure indications of an active industrial year, progressive as to volume and detail, and aggressive as to methods and the accomplishment of specified results.

Orders already booked for immediate delivery are not regarded as being representative of the sum total of possible requirements, but as representing items of stock too light in volume to do more than open the season's business with larger specifications to follow when specified dates of delivery can be agreed upon on which to base the entire traffic of the season. Manufacturers who are giving a long look ahead see nothing but an eager, active market that will keep business moving through regular channels under a well-developed demand of gratifying dimensions. They are consequently producing stocks of leading goods in appreciable quantities as a reserve when possible to assist in meeting the views of the buyers as to deliveries, feeling confident that fuller stocks than usual will be the feature of Spring trade throughout the country.

While extravagant changes in price on staple Hardware lines are not looked for to any great degree by the level-headed buyers, the known condition as to orders already booked in the iron and steel lines for months

ahead exerts an encouraging influence that serious declines in prices on goods relying on these metals for their production need scarcely be anticipated. on some goods have been held so nearly uniform in quotation, while wide fluctuations upward have taken place in the raw material from which they are manufactured would warrant the assumption that the current profit was larger than generally supposed. In the case of wire nails this has been largely discounted by the later prices agreed upon to steady the market, and less apprehension is felt that outside competition will materially discourage the market. The indicated steadiness of the wire nail market at the present time has stimulated good orders, stocks being uniformly low in the trade, and it is hoped the future market will prove as steady as that of a year ago. The trade generally are buying wire nails with confidence, and this stimulus is felt in many other lines of Hardware in a way extremely beneficial to wider distribution.

With the general Hardware markets in their present healthful condition, orders from the jobbers will place stocks in better conditions for early delivery than was the case a year ago. Knowing by experience how many sales were lost from lack of stock to supply on demand, the dealers, both wholesale and retail, will not this year be accused of an unprofitable conservatism. As a nation we are growing so rapidly, and with so many diversified wants that are multiplied on every hand as profits enable us to purchase, comparisons with the past are falling into desuetude, and original calculations as to possible volume of trade must be made for each successive season.

There are a few lines of goods which hold the market at prices regarded by the entire trade as being unremunerative to the manufacturer, and naturally to the jobbers, whose special "quantity discounts" fade into nothingness when a state of affairs like this prevails. These lines should be averaged up by the leading makers in order to strengthen a weak market, and thus make sellers confident enough of the future to ask a profit on the present. Such goods are suggested as Wood Screws, Poultry Netting, Wire Cloth, Steel Goods, etc. A general revision of prices similar to that adopted on the Stanley Rule and Level Co. goods, under the above circumstances becomes practicable, when list prices and discounts are materially changed, and the trade cuts loose entirely from old, unprofitable conditions.

The Great Canals of the World.

"Great Canals of the World" is the title of a study prepared by the Treasury Bureau of Statistics for publication in the forthcoming volume of the Monthly Summary of Commerce and Finance. It shows the commerce, cost and dimensions of the great canals of the world, especially those connecting great bodies of water and which may be properly termed ship canals.

Ship canals connecting great bodies of water and of sufficient dimensions to accommodate the great modern vessels plying upon such waters are of comparatively recent production and few in number. The one great example of works of this character which has been a sufficient length of time in existence and operation to supply satisfactory data as to cost of maintenance and operation and practical value to the commerce of the world is the Suez canal, and for this the available statistics begin with the year 1870, while its new and enlarged dimensions only date from the year 1896.

For the Sault Ste. Marie canal, connecting Lake Superior with Lake Huron, statistics date from 1855, though for the canal in its present form they cover but about four years. Statistics of the Welland canal date from 1867, but for the canal in its present enlarged form cover only two years of operation. The other great ship canals of the world are of much more recent construction, and data regarding their operation, therefore, cover a comparatively brief term, and in some cases are scarcely at present available in detail.

The artificial waterways which may properly be termed ship canals are nine in number, viz.:

- 1. The Suez canal, begun in 1859 and completed in 1869;
- 2. The Cronstadt and St. Petersburg canal, begun in 1877 and completed in 1890;
- 3. The Corinth canal, begun in 1884 and completed in 1893;
 - 4. The Manchester ship canal, completed in 1894;
- 5. The Kaiser Wilhelm canal, connecting the Baltic and North Seas, completed in 1895;
- 6. The Elve and Trave canal, connecting the North Sea and Baltic, opened in 1900;
- 7. The Welland canal, connecting Lake Erie with Lake Ontario:
- 8 and 9. The two canals, United States and Canadian, respectively, connecting Lake Superior with Lake Huron.

The description which is given of each of these great waterways shows that the length of the Suez canal is about 90 miles, the cost \$100,000,000, the present depth 31 feet, width at bottom 108 feet and at the surface 420 feet, and that the number of vessels passing through it has grown from 486 in 1870 to 1,494 in 1875, 2,026 in 1880, 3,389 in 1890, and 3,441 in 1900. The tolls charged are about \$2 per net registered ton.

The Cronstadt and St. Petersburg canal, which gives a passageway for great vessels to St. Petersburg, is 16 miles long, including the deepening of the bay channel, 20½ feet in depth, and the total cost estimated at \$10,000,000.

The Corinth canal, which connects the Gulf of Corinth with the Gulf of Aegina, is 4 miles in length, 26½ feet in depth, 72 feet wide at the bottom, cost about \$5,000,000, and reduces the sailing distance about 175 miles. The average tolls charged are 18 cents per ton and 20 cents per passenger.

The Manchester ship canal, which connects Manchester, Eng., with the Mersey river and Liverpool, was opened in 1894. Its length is 35½ miles, depth 26 feet, width at bottom 120 feet and at the surface 175 feet, and cost \$75,000,000. The commerce on the canal shows a growth from 879,204 tons in 1895 to 1,492,320 tons in 1900.

The Kaiser Wilhelm canal, which connects the Baltic and North Sea through Germany, is 61 miles in length, 29½ feet in depth, 72 feet wide at the bottom, 190 feet wide at the surface, and cost about \$40,000,000. The number of vessels passing through it has increased from 19,960 in 1897 to 29,095 in 1900, of which number 16,776 were sailing vessels. The tonnage in 1897 was 1,848,458, and in 1900, 4,282,094 tons. An additional canal connecting the same bodies of water by way of the Elbe and Trave rivers was opened in 1900. Its length is 41 miles, depth about 10 feet, width 72 feet, and cost \$6,000,000.

The great North Holland canal, which connects Amsterdam with the sea, cut in 1845, but deepened at a later date, has now a depth of 20 feet, a width of 125 feet at the surface. The Caledonian canal, which connects the Atlantic and North Sea through the north of Scotland, is 17 feet in depth, 50 feet in width at the bottom, 250 miles long, cost \$7,000,000, and is at its highest point 94 feet about sea level. The canal du Midi, cut through France from Toulouse on the Garonne to Cette on the Mediterranean, a distance of 150 miles, is $6\frac{1}{2}$ feet deep, 60 feet wide, and 600 feet above

sea level at its highest point, and has 114 locks; total cost, \$3.500.000.

In America the canals connecting the Great Lakes are the principal ship canals, and are three in number: The Welland canal, originally constructed in 1833 and enlarged in 1871 and 1900; the Sault Ste. Marie, or St. Mary's river canal, opened in 1855 and enlarged in 1897; and the Canadian canal at St. Mary's river, opened in 1895. The American and Canadian canals at St. Mary's Falls are practically identical in location and dimensions, and are used interchangeably by vessels engaged in commerce, as convenience may dictate. The depth of the canals at the St. Mary's river is sufficient to accommodate vessels drawing 20 feet of water. The American canal was originally constructed by the State of Michigan, but subsequently taken charge of by the United States and enlarged at a cost of \$2,150,000. The cost of the Welland canal was about \$30,000,000, largely due to the fact that 25 locks are required in surmounting the rise of 327 feet in the distance of 27 miles. The number of vessels passing through the canals at St. Mary's river has greatly increased during the past few years, while the number passing through the Welland canal has materially decreased; the number passing through the St. Mary's canals being, in 1873, 2,517, and in 1901, 20,041, of which 15,837 passed through the United States canal, and 4,204 through the Canadian. The number of vessels passing through the Welland canal has decreased from 6,425 in 1873 to 2,202 in 1899. The marked contrast between the business of the St. Mary's Falls and Welland canals is largely due to the fact that the freights originating in the Lake Superior district are chiefly discharged at Lake Erie ports, and those destined for the Lake Superior region are chiefly produced in the section contiguous to Lake Erie, the Lake Superior freights being chiefly iron, copper and grain, and the Lake Erie freights for Lake Superior, coal and manufactures. The business of the St. Mary's Falls canals by far surpasses in volume that of any other canal of the world, the freight tonnage of the American and Canadian canals combined being in 1901, 24,626,976 registered tons, while the net tonnage of the Suez canal in 1900 was 9,378,152 tons, and that of the Kaiser Wilhelm canal 4,282,094 tons.

Death of Marcellus Hartley.

Marcellus Hartley died suddenly January 8, in the directors' room of the American Surety Co., 100 Broadway, New York, while attending a meeting of the company's executive committee, of which he was a member.

Marcellus Hartley was born in this city September 28, 1828, his father being the late Robert M. Hartley, himself remarkable for work among a large number of charitable institutions and movements. After receiving his education at one of the classical schools in this city, Marcellus entered the counting room of Francis Tomes & Sons, leading importers and dealers in guns and fancy Hardware. It was because of this early training in the handling of guns that the young man grasped that knowledge which was destined to make him invaluable to the United States Government during the Civil War. Also, until the very end he remained identified with one of the largest gun and arms establishments in the country.

After acquiring a knowledge of the business in connection with J. Rutsen Schuyler and Malcolm Graham, associated with the house of Young, Smith & Co., Mr. Hartley established in 1854 the firm of Schuyler, Hartley & Graham, which continued until the retirement of Mr. Schuyler in 1876, when it was known as Hartley & Graham. In 1898 Mr. Graham died, and the firm was then incorporated with Mr. Hartley as its president, the name being changed to the M. Hartley Co.

It was in the early days of the Civil War that Mr. Hartley was called upon by Edwin M. Stanton to take charge of an

important service in the Government. The Union troops were sorely in need of arms and ammunition of modern make, the Confederates were receiving their arms and ammunition from abroad, and it was necessary to send to Europe a man who thoroughly understood the business of selecting fit weapons and also one who would prevent the Confederates from getting the arms which foreigners were only too willing to sell to them.

As the agent of the Government abroad Mr. Hartley was commissioned a brigadier general, with plenary power, opening for him an unlimited credit with Baring Bros. of London, the fiscal agents of the Government there. Throughout his service during the war many millions of dollars' worth of purchases were made for the Government by Brig. Gen. Hartley, who, at great pecuniary sacrifice to himself, accepted the post, receiving only the salary of his rank.

By remarkable sagacity, his close attention to business, and by his earnestness and an indomitable will, Mr. Hartley added to his business interests in the course of time, until he became identified as president, director or trustee with no less than fifteen well-known corporations. Among these were the American Deposit and Loan Co., the American District Telegraph Co., the American Surety Co., the Audit Company of New York, the Bridgeport Gun Implement Co., the Equitable Life Assurance Society, the Fifth Ave. Trust Co., the German-American Bank, the Lincoln National Bank, the Manhattan Railway Co., the Mercantile Trust Co., the Remington Arms Co., the Union Metallic Cartridge Co., the Western National Bank, and the Westinghouse Electrical Mfg Co. The latest great enterprise with which Mr. Hartley was identified was in the organization of the International Bank, of which he was president.

Mr. Hartley was a member of many clubs and societies, both social and scientific. He was one of the early members of the Union League Club, and for more than thirty years was a firm supporter of that organization. He was also a member of the Lawyers' Club and a patron of the American Museum of National History and the Metropolitan Museum of Art. He was also a member of the following: The American Fine Arts Society, the Presbyterian Union, the New England Society, the Republican Club, and the Essex County Club of Orange, N. J.

Mr. Hartley married Miss Frances Chester White, daughter of the late Dr. S. Pomeroy White of this city. The couple had four children, but only one, a married daughter, the wife of George W. Jenkins, president of the American Deposit and Loan Co., survives him. The eldest daughter married Norman Dodge, and a twin daughter James Stokes.

At the funeral services, either as pallbearers or friends, were many of the best known men in New York and other cities in financial and other great business and professional enterprises.

Metal Preservation.

The Joseph Dixon Crucible Co., Jersey City, N. J., give interesting information concerning the protective painting of the Union Railroad Bridge, which crosses the Monongahela river at Pittsburgh (Rankin), Pa. The associate engineers were Messrs. Emil Swensson, designer and engineer of construction, and Wm. H. Smith, chief engineer, Carnegie Steel Co. The total weight of this bridge is 5,135 tons, and it has a total length of 2,328 feet. Designed for carrying molten metal from the Carrie Furnace to the steel mill and raw materials to the furnaces, this notable steel structure is subjected to heat from the molten metal, sulphur fumes from locomotives and river steamers, also from the adjoining furnaces and steel mills. No other steel bridge in all the world is exposed to so many and severe destructive agencies. The best metal preservative was necessary, and the eminent engineers selected for its protection Dixon's Silica-Graphite Paint, as manufactured by the Joseph Dixon Crucible Co.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

Amount Recoverable in Action for Negligence Causing Death QUESTION: About a year ago my son, a boy of fifteen years of age, was run over by a cable car in New York City and killed. I have never brought suit, but a friend has recently suggested that I do so. Kindly inform me whether there is any limit as to the amount that can be recovered in a case of this kind, and also how long I have in which to commence suit.

REPLY: Under the common law no cause of action existed to recover damages for the death of a person caused by the negligence of another. The Legislature of this State recognizing the faulty condition of the common law passed a statute creating a cause of action in a case of this kind, but limited the amount of recovery to \$5,000. This statute remained in force for some time until the saying that under the law of this State it was cheaper to kill than to wound became quite common. This statute was superseded by our present statute in which no amount is fixed as a limit of recovery. The period of time within which this action must be brought under Section 1,902 of the New York Code of Civil Procedure is two years after the decedent's death.

Power of Executive Committee of Corporation.

QUESTION: I would like some information on the following question: I am one of three members of the Executive Committee of a corporation. The corporation has a Board of Directors whose duty it is to appoint an Executive Committee consisting of three members, whose business it shall be to determine the amount of salary to be paid officers of the corporation, to make contracts and to determine all matters affecting the business and policy of the corporation. A short time ago I as a member of this committee made a contract with an individual in Liverpool. We are having some difficulty with this person, and I desire to know whether I had the right to make this contract alone without the express knowledge of the other two members of the committee. had general authority from the other two members of the committee to make contracts of this general character. If I had no authority to make this contract could the person with whom I made it enforce it against the corporation?

REPLY: We are of the opinion that where the Board of Directors of a Corporation elect or appoint an Executive Committee consisting of three or more members and delegate to them powers which as a general rule would be vested in the Board of Directors, this executive committee has no power in turn to delegate the power with which they were vested to another person or to one of its members. A case somewhat similar in point of theory was recently decided by the Appellate Division of the New York Supreme Court, First Department, which held that a contract made by one member of the Executive Committee constituted as you have described was void, for the reason that the committee had no power to delegate the performance of an act involving discretion to one of its members.

QUESTION: A salesman from a publishing house called upon one of our employees and induced him to subscribe to a set of books, amounting in value to \$39.60, to be paid for by installments. He agreed to take the books and signed an order for the same on one of the publishing company's printed blanks. Before any of the books were delivered he wrote the publishing company, cancelling the order, and stating he did not desire the books. They, however, shipped the books, but he refused to receive them from the express company, and the books, consequently, never have been in his possession. A lawyer, claiming to act under instruction of the publishing house, has written, threatening him with a suit if he does not pay for the books. Have they a valid claim against him, and could they collect the amount?

REPLY: Upon the facts stated, we are of the opinion that if your employee agreed to purchase books from a certain publishing house, that the publishing house would have a

cause of action against your employee for damages for the breach of his contract. A valid contract came into existence at the time the employee accepted the terms of the agreement and signed the contract, and we are of the opinion that the publishing house has the right to insist upon the performance of the contract, and are entitled to the benefit of their bargain, if they desire to proceed along these lines.

Foundry Molding Materials.

One of the most important features of foundry practice lies in the selection and proper combination of molding materials, for the character of the casting is so largely dependent upon the mold that the slightest deviation in any point is very liable to impair or ruin the whole work, which would mean a heavy loss to the foundry owner. So exacting are the requirements in molding that foundry owners strive to obtain the most reliable men for the work and foundry molders now command high wages. The art of molding, for an art it may well be called, has made rapid strides during the past decade or so and the proper materials and their combination in order to secure specific results have through long series of experiments been determined to a certainty.

The leading materials which enter into foundry molding, as practiced to-day, are sand, clays, blacking, coal-dust and a substance to bring about cohesiveness in the mold, various substances being now used for this purpose. A fine homogeneous argillaceous sand is commonly employed in casting, the physical qualities desired being elasticity, strength and a certain degree of fineness. In order to admit of molding around the pattern the molding material must be plastic, and it must also have sufficient strength to stand when the pattern has been removed, and at the same time it must be able to resist the molten mass when poured into the mold. The presence of too much iron and clay will cause the mold to shrink and crack when subjected to intense heat in casting, while if these substances are not present in sufficient quantities the mold will dry and crumble and is liable to collapse. A microscopic examination of a grain of sand shows that it is coated with a thin film of clay which gives the desired results mentioned above. While the chemical composition of a molding sand is a matter of importance the physical properties are looked to with more care by molders. In order of their importance the four requisities of a molding sand are refractoriness, porosity, fineness and the property of bonding. The first mentioned quality depends largely upon the absence of such fluxing materials as calcium carbonate, alkalies and iron oxides, artificial mixtures being generally resorted to in order to prepare molds for the various kinds of molding. Sands containing limes or alkalies in the form of free calcite or feldspar are sometimes liable to fusion in the heavier casts, and in this case it is customary to coat the surface of the mold with a graphite preparation. While molding sands vary for different kinds of work the general average of the sands used in the foundries of this country contain from 80 per cent. to 85 per cent. of silica, 7 per cent. to 10 per cent. of alumina, 2 per cent. to 4.5 per cent. of ferric oxide, about 2.5 per cent. of water, something over 1 per cent. of calcium carbonate, less than 1 per cent. of magnesia and a slight trace of potassium, manganese and organic matter.

Sands suitable for ordinary molding are found in nearly every locality, the sands for finer work being confined, however, to a few parts of the country, some of the sand used in bronze casting being imported from Europe. Alluvial sands are usually used for common molding purposes. The term "green sand" is applied in molding to argillaceous sand in an undried state and which is used as it comes from the ground. The term "dry sand" is used in contradistinction, and dry sand molding is better suited than green sand to molding pipes, cylinders, shafts, columns, etc.

Loam in the form of clay comes next to sand in molding.

Plumbago forms the blacking used in preparing molds, but of late years a patent blacking in the form of pure carbon distilled from paraffine has come into wide use. Mineral carbon or lead and charcoal are sometimes used. In foundry facing, feldspar, chalk and many other mineral substances are to be avoided. Core and core ventilation is an important feature in molding and parting sand is used to prevent the separated parts of the molds from uniting. In addition to the regular sand prepared for this purpose red brick dust, free sand, blast furnace slag, culm and other materials are used for parting sand.

The manufacture of coal dust for foundry purposes, commonly called "foundry facing," forms an important industry in different parts of the country, particularly in the bituminous coal fields. Numerous plants for the manufacture of coal dust for foundry purposes are located in the Pittsburgh coal field. The Pittsburgh Coal Co. is a large manufacturer, and the Westinghouse Co. also operates a big plant for the manufacture of the material for its own use. This material is made from slack refuse coal ground into different grades of fineness to suit the different kinds of foundry molding. In casting, this coal dust burns out and thus passages in the molds are formed for the circulation of air and the escape of gases.

Talc or soapstone is an important material in foundry molding. This material is a necessary one in the preparation of every mold, the magnesia and lime contained in it giving a refractory result. The lime also helps to cement the sand and other constituents and gives a plastic and a cohesive result which causes vitrification at a high temperature. In steel molding, greater resistance in the molds is required on account of the excessive heat, and in brass, bronze and aluminum casting special molding formulas are observed.

About the great foundries of the Pittsburgh district are to be seen many interesting features of molding, for, like in other great centers of the iron and steel and allied industries, the foundry business has here been reduced to a science. All kinds of castings made anywhere in the world are made in the foundries of Pittsburgh, the great Westinghouse foundries being the largest in the world. The castings made run all the way from the heaviest war ordinance and the greatest machinery for industrial purposes down to the most intricate casting.

W. G. Irwin.

The South Carolina Inter-State and West Indian Exposition.

The great plan and scope of the South Carolina Inter-State and West Indian Exposition, at Charleston, is realized by very few from the fact that there has been, comparatively speaking, but little general exploitation of the undertaking. Its buildings are larger than Omaha, Atlanta or Nashville, and the floor space in many of them equals the Pan-American. In several buildings there is yet some available space, and a few lines of manufactures are not represented at all. The Exposition will not be fully completed, or at its best, before the latter part of January, and the largest attendance will be in February, March, April and May, when the Florida travel will increase it. Everything points to a financial success. The attendance from three hundred miles of adjacent territory will be unprecedented, as the railroad companies have undertaken to put every man, woman and child, that is able to travel, upon the Exposition grounds at a phenomenally low rate. Board and expenses for a week will be correspondingly low. Many exhibitors will, doubtless, reap better results here than from other expositions, where visitors went for "flying trips" and saw the Exposition but once or twice. Here they will make a week of it.

In 1834, the first practical application of the hot blast in the manufacture of pig iron was made in New Jersey.

The Mitchell Motor Cycle.

The Motor Cycle, almost unknown eighteen months ago, certainly not considered in the light of a practical business reality, is making rapid strides to popularity. A consideration of why this is so is both interesting and instructive. A great desire for some form of power driven vehicle has grown up as the various types of automobiles have been developed. This desire, however strong, cannot always be gratified, principally on account of the great cost of these machines, and right here comes in the motor cycle, at a fifth to a hundredth of the cost. For many purposes of business and pleasure it answers perfectly. It is simple, safe, and costs infinitely less

be teething. The one item of saving a large percentage on your fire insurance will of itself repay the item of dues many times over. Last year the membership who availed themselves of this privilege saved 35 per cent., and it looks as though they would save more this year.

There are about three classes of dealers in the Hardware business in Wisconsin. First: The up-to-date, live dealer, who is able to see the benefits of co-operation and don't believe the treasurer swipes all the dues. Second: The knowit-all, who needs no help, sends back drafts made on him for unpaid dues, and needs no help to manage his business, but he is a little growler just the same. Third: The indifferent one, who is pegging along in the same old rut, and probably will until death makes a change. Which class are you in?

MITCHELL MOTOR CYCLE.

to operate it and care for than the big vehicle. As an example of the rapidly growing interest in these machines it might be stated that at the annual Stanley show in England there was shown but one motor bicycle a year ago, while at the one recently held one hundred and ten were on exhibition.

The Wisconsin Wheel Works, Racine, Wis., have the distinction of having placed on the American market in their Mitchell Motor Bicycle (see illustration herewith) the first really practical machine at a popular and reasonable price, which meets in the highest degree the requirements of the public in power of motor, for combating hills, sand and wind, and in speed varying from five to thirty-five miles per hour.

The Mitchell, in addition to being powerful and speedy, is simple and very strong in its component parts. This company has shipped its motor bicycles to all parts of the world, in many cases to customers entirely lacking in knowledge of gasoline motors and motor cycles, and always with complete success. That their faith is strong is shown by a perusal of their guarantee. Mitchell Motor Cycles are sent out with the express understanding that if they are not satisfactory when operated according to the instructions accompanying each machine, money will be cheerfully refunded. The financial strength and known liberality of this concern makes their agency extremely valuable to be had at this time. One exclusive agent in a place and that one well taken care of is their rule. For catalogues and other information, address Department H, care of the manufacturers as above.

Wisconsin Retail Hardware Dealers' Association.

C. A. Peck, Berlin, Wis., secretary of the Wisconsin Retail Hardware Association, has issued a handsome souvenir pamphlet embracing the call for the annual convention to be held at Milwaukee, February 5-6. Mr. Peck, under the head of "A Few Words With You," says:

To non-members: Let me again most cordially invite you to "come with us and we will do you good." Don't wait until the meeting, but mail the secretary \$2 to-day and that pays your dues until 1903. Don't try to save pennies by losing dollars. If you wait until you come into the annual meeting you may not come. Trade may keep you at home. You may feel too poor. You may have the smallpox, or the baby may

PROGRAM.

WEDNESDAY, FEBRUARY 5, 1902.

11:00 A. M. Meeting of the executive committee.

1:30 P. M. Payment of dues. 2:00 P. M. Roll call.

Reading of minutes.

President's address.

Announcement of committees on transportation, resolutions, grievances, reception, legislation, auditing and question box.

Annual report of secretary.

Annual report of treasurer.

Paper: "How to Build Up a Good Retail Business," Fred Kusel, Watertown.

Election of officers by ballot.

Announcement of question box.

Report of committee on National Union, Schlaffer and Nash.

Adjournment.

THURSDAY, FEBRUARY 6, 1902.

Good time. No business.

8:30 A. M. Payment of dues.

9:00 A. M. Report of special committee on Constitution. Question box.

Paper, Scofield, Sturgeon Bay.

Reception and remarks by visitors.

Paper by Merbach, Ripon: "Some of the Evils of the Trade."

Reports of committees.

Question box.

Adjournment.

2:00 P. M. Discussion of report of committee on Consti-

Paper: "H. L. McNamara, "Relation of Traveling Men to Retailers."

Paper: "O. P. Schlaffer, "Benefits of National Union."

Discussion.

Unfinished business.

Adjournment.

Iowa Retail Hardware Dealers' Association.

The program for the Fourth Annual Meeting of the Iowa Retail Hardware Dealers' Association, to be held in Des Moines, February 18-19-20, has been completed. It is replete with papers on bright topics and promises to be one of the most interesting that has ever been carried out by the association. The reports of the various officers will first demand the attention of the association, and it is expected that they will tell of a year of prosperity and give out much of greatest interest to the members of the organization.

PROGRAM.

TUESDAY, FEBRUARY 18, 2:30 P. M.

Organization.

Report of secretary.

Report of treasurer.

Appointment of committees.

7:30 р. м.

Meeting of the executive committee in parlors of Savery Hotel.

WEDNESDAY, FEBRUARY 19, 9 A. M.

Enrolling new members.

President's address.

Papers—"Benefits of Organization," H. A. Cole, Council Bluffs; C. R. Keating, Mt. Ayr.

Discussion.

Adjournment.

AFTERNOON SESSION, 2:30 P. M.

Paper, "Credits," S. R. Miles, Mason City.

Discussion.

Paper, "The Relation of Jobber and Retail Dealer," C. F. Schmidt, Marshalltown.

Discussion.

Adjournment.

EVENING SESSION, 7:30 P. M.

General discussion of topics suggested by the members of the association.

THURSDAY, FEBRUARY 20, 9 A. M.

Paper, "Trusts in the Relation to the Retail Dealer," George Staehler, Earlville.

Discussion.

Paper, "Our Competitors," L. Lindenberg, Dubuque. Adjournment.

AFTERNOON SESSION, 2:30 P. M.

Election of officers.

Question box.

Adjournment.

THE OFFICERS.

The officers of the association for the term of 1901-2 are as follows:

President-W. A. McIntire, Ottumwa.

Vice-President-E. G. Penrose, Tama.

Secretary—W. H. Keating, Ottumwa.

Treasurer-George S. Lister, Manchester.

Executive Committee—Jacob Seither, Keokuk; A. C. Heynew, Miles; L. Lindenberg, Dubuque; F. A. Marvin, Waukon; E. G. Penrose, Tama; W. A. McIntire, Ottumwa; L. H. Gutz, Des Moines; M. W. Keating, Afton; H. A. Cole, Council Bluffs; Harry Vincent, Fort Dodge; W. H. Millard, Cherokee.

Grievance Committee—E. P. Messer, Sheldon; S. R. Miles, Mason City; S. M. Doxsee, Algona; George S. Lister, Manchester; Frank Kupper, Burlington.

Michigan Retail Hardware Dealers' Association.

A called meeting of the executive committee of the Michigan Retail Hardware Dealers' Association was held at the Hotel Cadillac, Detroit, January 13th, pursuant to the call of the president. The following members were present: President H. C. Minnie, Messrs. Potter of Alpena, Popp of

Saginaw, Pipp of Otsego, Scott of Marine City, Harshaw of Delray, and Treasurer H. C. Weber, and the secretary. Mr. Chandler of Coldwater arrived too late to participate in the deliberations of the meeting. After an informal discussion as to the place of holding the next meeting, it was unanimously decided to hold it in Detroit, August 13th and 14th, at the Hotel Cadillac.

Various plans for increasing the membership were discussed, and it was finally, on motion of H. C. Weber, decided to make a general offer of \$1.00 cash for each new member obtained to vote on the following special prizes for those obtaining the largest list:

1st. A prize of \$25.00, open to all who turned in 12 or more new members, to be awarded to the one securing the highest number. Contestants for the \$25,00 prize are barred from participating in either the \$15.00 or \$10.00 prizes.

2d. A prize of \$15.00, open to all who secure 8 or more new members, to be awarded to the one securing the highest number. Contestants for the \$15.00 prize are not allowed to participate in the \$10.00 prize.

3d. A prize of \$10.00, open to all who secure 5 or more new members, to be awarded to the one securing the highest number.

On motion the president was instructed to appoint a committee who should have charge of the program for the August convention, and who should act in conjunction with the president and the assistant secretary. President Minnie appointed Messrs. Weber, Popp and Scott as members of that committee.

On motion the secretary was instructed to send to all members a list of the proceedings of this meeting, with that section of the by-laws relating to membership, in which he was to call especial attention to the prizes and awards for securing new members. He was also instructed to send a letter to the various Hardware traveling men in Michigan, calling their attention to these awards, and urging them to co-operate in securing new members.

Secretary Fred H. Cozzens being now engaged in the wholesale Hardware business in New York, he stated that he could not equitably longer maintain his relations with the organization, and he therefore tendered his resignation, to take immediate effect, which was accepted after a resolution of thanks and appreciation had been unanimously passed. A further resolution, voting the sum of \$100.00 in further recognition of his services in behalf of the retail Hardware trade, was also unanimously passed.

A resolution was also unanimously passed stating that it was the sense of the meeting that the sales of builders' Hardware to the consumer by the jobbers of Michigan were becoming altogether too frequent, and expressing it as the unanimous sense of the meeting that wherever such sales are made by the jobber, a proper commission or credit shall be given a retail dealer who does business within the normal selling district where the sale takes place. The secretary was requested to send a copy of these resolutions to all jobbers in Michigan, and to request their co-operation in having it enforced.

H. C. Weber was then elected secretary to fill the unexpired term caused by the resignation of Secretary Cozzens, with authority to appoint an assistant secretary, which he did at once, appointing Clarence A. Day, assistant treasurer of the Trade Journal Association, in such capacity. Meeting then adjourned.

Never Touched Him.

Shorts—The papers misstated some details of that accident to-day.

Longs—How so?

Shorts—They stated that the tramp who stole a ride on a mudscow was washed overboard—he wasn't. I saw him when they pulled him out and he was just as dirty as when he left the boat.—Harlem Life.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED DEC. 16, 1901.

309,205. METHOD OF SECURING CABINET LOCKS IN PLACE, G. B. Cowles, New Britain, Conn., assignor to Corbin Cabinet Lock Co., same place.

309,215. Dustpan, L. B. Fletcher, Troy, N. Y.

309,253. WHEEL FOR ROLLER SKATES, S. R. Rust, Pine Meadow, Conn.

309,254. Roller Skates, S. R. & A. E. Rust, Pine Meadow, Conn.

309,276. BIT HOLDER, H. Wilson, Kingston, Pa.

309,280. Soldering Iron, A. F. Zimmerling, Milwaukee, Wis.

309,300. Sash Holder, J. F. Hamilton, Connersville, Ind.

309,313. Augur Handle, W. A. Peck, Rowe, Mass.

309,356. Carving Fork Guard, G. H. L. Packwood, Tampa, Fla.

309,400. Joiner's Plane, G. D. Mosher, Birmingham, Conn.

PATENTS ISSUED DEC. 17, 1901.

688,825. Burglar Alarm for Windows, H. G. Clark, Chicago, Ill.

688,933 & 688,934. Lock and Latch, J. Couture, Montreal, Canada.

688,952. Plumb, C. D. Janssen, Torrington, Conn.

688,957. Spring Hinge, C. S. Locke, Joliet, Ill.

688,969. Plane, S. R. & A. E. Rust, Pine Meadow, Conn.

689,049. Table Cutlery, I. Hirsch, Chicago, Ill.

PATENTS EXPIRED DEC. 9, 1901.

308,880. Door Check, E. F. Decker, Albany, N. Y.

308,892. SAD IRON, C. J. Haas, Flint, Mich.

308,893. Saw Swage, D. B. Hanson, St. Louis, Mo.

308,901. Egg Beater, O. Kitchell, Valparaiso, Ind.

308,910. Wooden Scoop Shovel, J. L. Locke, Grand Rapids, Mich.

308,934. Tool Handle, H. H. Trenor, New York, N. Y.

308,938. Cock or FAUCET, W. J. Wilson, Chelsea, Mass.

309,105, 309,106. Spring Hinge, J. H. Shaw, assignor to Sargent & Co., both New Haven, Conn.

PATENTS ISSUED DEC. 10, 1901.

688,347. Combined Calipers and Depthgage, A. Schuler, Chicago, Ill.

688,362. Coffee Mill, J. S. Tarr, Cleveland, Ohio.

688,418. CLOTHESWRINGER, M. P. Janisch, assignor, Automatic Wringer Co., Waupun, Wis.

688,496. Tubular Lantern, H. J. Vogel, assignor to the firm of Wm. Vogel & Bros., Brooklyn, N. Y.

688,497. Level, F. Weiman, Chicago, Ill.

PATENTS EXPIRED JANUARY 13, 1902.

310,557. Spring Balance Curtain Fixture, W. N. Buckley, Meriden, Conn.

310,564. Combined Sash Holder and Weather Strip, A. J. Davis, Hartford, Mich.

310,657. STEAM COOKER, H. A. Eaton, Manchester, Me.

310,752. Door CHECK, A. B. Walker, Canton, Ohio.

310,840. COMBINED LEAD PENCIL TIP AND TAPE MEASURE, I. B. Millner, Washington, D. C.

310,844. Door Check, E. Niggli, San Antonio, Tex.

PATENTS ISSUED JANUARY 14, 1902.

690,925. NIPPERS, G. J. Capewell, Hartford, Conn.

690,933. BENDING AND CUTTING PLIERS, S. M. Decker, Malden, Mass.

690,972. SAD IRON, A. Luethi, Lakemills, Wis.

690,983. CHERRY STONE, C. P. Mosher, Philadelphia, Pa.

691,046. Wrench Handle, F. L. Coes, Worcester, Mass.

691,077. BUTT HINGE, F. W. L. Schafer, Los Banos, Cal.

691,237. Handsaw, W. C. Buell, Indianapolis, Ind., assignor to E. C. Atkins & Co., Indianapolis, Ind., Corporation of Indiana.

PATENTS EXPIRED JANUARY 6, 1901.

310,163. Plane, W. F. Achenbach, Reading, Pa.

310,179. Door Closer, E. H. Brown, New York, N. Y.

310,204. COFFEE POT, L. P. Jenks, Boston, Mass.

310,221. Tubular Lantern, T. Phillips, Orillia, Ontario, Canada.

310,229. Door Hanger, O. Seeley, Syracuse, N. Y., assignor to E. C. Stearns & Co., same place.

310,292. CALIPERS, F. Lilja, Springfield, Mass.

310,349. CHAMFERING PLANE, R. V. Wicks, Brooklyn, N. Y.

310,352. Transom Lifter, J. F. Wollensak, Chicago, Ill. 310,409. Spring Hinge, W. Gillfillan, New Haven, Conn., assignor to Sargent & Co., same place.

310,439. Combined Knife and Scissors, M. Kamak, New York.

PATENTS ISSUED JANUARY 7, 1901.

690,391. WRENCH, F. P. Bates, Indianapolis, Ind.

690,417. WEATHER STRIP, G. W. Golden, Detroit, Mich.

690,440. Sash Fastener, J. A. Kemp, Farmington Hill, Pa.

690,533. MEAT TENDERER, R. Stone, Catawba, Wis.

690,537. CHANGEABLE COMBINATION KEY LOCK, W. H. Taylor, assignor to Yale & Towne Mfg. Co., Stamford, Conn.

690,555. Door Stop, W. V. Bleha, St. Louis, Mo.

690,647. RATCHET WRENCH, W. T. Garrett, Cedarville, Cal.

The Merchants' Association of New York.

The annual meeting of members of The Merchants' Association of New York was held on January 14th, at which meeting five directors of the board of fifteen were elected to succeed those whose terms expired at that time. The newly elected directors are George F. Crane, of Baring, Magoun & Co.; Adolph Openhym, of William Openhym & Sons; George L. Duval, of Beeche, Duval & Co.; each to succeed himself; and George Fredk. Vietor, of Vietor & Achelis, to succeed Alvah Trowbridge; and Herbert L. Satterlee to succeed Hon. John H. Starin.

There were also three vacancies in the board, created by the resignations of Messrs. William E. Tefft, Corcellus H. Hackett and Meyer Jonasson, who were unable to longer give the time and attention necessary to the increasing work of the association. These vacancies were filled, under the provisions of the by-laws, by the board of directors who elected, to succeed the members who had resigned, Messrs. Henry R. Towne, president Yale & Towne Mfg. Co.; W. A. Marble, vice-president R. & G. Corset Co., and W. E. Curtis, formerly Assistant Secretary of the Treasury under Mr. Cleveland.

There was a meeting of the board of directors prior to the annual meeting of the members of the association, at which a number of subjects were considered and acted upon.

Old Officers Re-elected.

The annual election of officers of the Simmons Hardware Co. was held January 8, and resulted in the re-election of all of the old officers, as follows: W. D. Simmons, president; J. E. Pitcher, first vice-president; J. E. Smith, second vice-president; A. E. Dunn, treasurer; George R. Barclay, assistant treasurer; F. N. Johnson, traffic manager; A. W. Douglass, secretary; and D. H. Simmons, assistant secretary. Advisory board, E. C. Simmons and Isaac W Morton.

RECENT TRADE PUBLICATIONS.

F. MEYROSE LAMP AND Mrg. Co., St. Louis, Mo. 20-page catalogue, oblong in shape, of Lamps and Lanterns manufactured by this concern. The catalogue is fully illustrated with a large variety of Lanterns and Lamps in all the customary styles, from the ordinary tubular lantern to the large size house and store lamps of the Rochester pattern.

MICHIGAN BARREL Co., Grand Rapids, Mich. 74-page catalogue of the line of Refrigerators that are marketed under the names of Yukon, Economic and Chilkoot. This catalogue is printed on excellent paper, beautifully illustrated and fully describing a complete line of desirable goods, well worthy the attention of the Hardware dealer.

ALASKA REFRIGERATOR Co., Muskegon, Mich. 88-page catalogue, well printed on coated paper, fully illustrated, showing a large variety of Household Sideboard Refrigerators and Ice Chests for grocers, butchers, florists, etc., separate catalogue being issued covering a line of white enameled and tile-lined Refrigerators which they manufacture. The catalogue is complete in all its details, covering a line that embodies the cheapest styles as well as the high-grade artistic product that is now so greatly in vogue with the trade.

P. J. Connoy, Philadelphia, Pa. 24-page catalogue covering the line of Automatic Refrigerator Door Fasteners and Locks, Hinges and Refrigerator Trimmings that have long been manufactured by him, which include the regular Refrigerator Door Fastener of the drop pattern, the automatic Refrigerator Door Fastener, both plain and fancy; Refrigerator Hinges, Faucets, Ice House Levers, and Brass Refrigerator Hinges and Hinge Hasps in a large variety.

STANDARD TOOL Co., Cleveland, Ohio. A very artistic and handsome little booklet, illustrating and describing the goods manufactured by this well-known concern, evidently intended to be distributed through foreign countries, the entire text being printed in Spanish. Each page has a tint block, making the typographical appearance of the booklet exceedingly unique.

WALTER W. WOODRUFF & Sons Co., Mt. Carmel, Conn. Full size Hardware catalogue of the product of this company, forming a pamphlet of 144 pages. These goods are more particularly in the line of Carriage Goods, although a number of regular Hardware specialties are also embodied in the contents of the catalogue.

ANTHONY WAYNE Mrg. Co., Fort Wayne, Ind., and St. Louis, Mo. Pamphlet catalogue, oblong in shape, 32 pages, well printed on coated paper, fully illustrated, showing the large variety of washing machines made by this old-established company. It describes in a complete manner and fully illustrates the several parts of each machine, which are numbered so that ready repairs may be ordered if needed. A very useful catalogue for the dealer.

CRESCENT MFG. Co., Fremont, Ohio. Pamphlet catalogue, oblong in form, 24 pages, embracing a large line of Cutlery and Household Specialties, that would prove attractive to every dealer in Hardware. This includes a large variety of Bread Knives, Ice Picks, Kitchen Knives generally, Ice Chisels and Mincing Knives, Screw Drivers and Kitchen Sets; Pruning Shears in large variety; Grass Shears, and a full line of Buckeye Favorite Shears, Scissors, etc., from the Straight Trimmer to Ladies' Scissors.

A. J. PHILLIPS Co., Fenton, Mich., are distributing an envelope size catalogue for the Spring trade of 1902, covering their line of Screen Doors, Window Screens and other novelties with the manufacture of which they have long been identified. The Doors and Screens are fully illustrated, and all the numerous advantages set forth giving correct ideas of the sizes, dimensions, styles, wood and finish of each particular one. In connection therewith, list prices are given, the catalogue number by which they may be ordered, and also a telegraphic code by the use of which "rush" orders may be economically forwarded to the factory. This part of the methods for ordering has been very carefully attended to. and is extremely complete. This company manufacture a large line of other specialties of wire and wood, including Coat and Suit Hangers, Wardrobe and Closet equipment, Clothes Horses, Kitchen Cabinets, Towel Racks, Boys' Stilts, Snow Shovels, Stable Cleaners, Kitchen Shelves, etc.

STURGES, CORNISH & BURN Co., Chicago, Ill. Envelope size catalogue, embracing in its contents their line of All Steel, Heavily Tinned Milk Cans, which includes their standard pattern of railroad and cheese factory Milk Cans, together with their extensive Dairy line. The line of Milk Cans to which this catalogue is devoted are made from extra heavy steel with wired edge, the neck being drawn from one piece of especially prepared steel. They are provided with malleable, noiseless drop handles, with a seamless stamped steel breast, and a wrought steel bumping band to prevent it being jammed in. Every part is tinned and re-tinned before being put together, and any imperfections in the tinning are immediately corrected before the can is made up. The soldering of the inside seams, it is claimed, is loaded; that is, pure solder is floated into them in large quantities, making them as smooth as glass, and leaving no shoulders, rough spots or crevices where sour milk or dirt can collect. The productions of this progressive company are worthy the attention of every Hardware concern handling such goods, and the catalogue will be forwarded on application, and will be found an interesting one.

CHALLENGE REFRIGERATOR Co., Grand Haven, Mich. Catalogue for 1902 of the "Victor" Hardwood Refrigerator, and also the "Triumph" White Enamel Lined Refrigerator. This is a 40-page pamphlet catalogue, printed on coated paper, fully illustrated throughout. Full descriptions are given of each individual refrigerator, with telegraphic code, weight and the pounds of ice that each refrigerator will contain, together with the dimensions and list prices, making it an extremely useful and handy catalogue from which to order. They also send a separate catalogue of their Challenge Iceberg Refrigerator, which represents a high-grade refrigerator, in the latest style of ornamentation and improvement, which would impress the buyer as being one of the most important lines on the market. The catalogue is one of 56 pages, filled complete with excellent illustrations showing the great variety made under this name, and the style of ornamentation, and full description is given of the many improvements that make this line of goods one worthy of the attention of the Hardware dealer.

NATIONAL NECK YOKE Co., Rock Island, Ill. Catalogue covering the line of specialties manufactured by this concern, consisting of Neck Yoke Centres in large variety, together with Neck Yokes complete, Swivel Yoke Attachments, Carriage Curtain Patch Fasteners, etc.

PERSONAL SERVICE SERVI

Boss Rotary Washer.

Boss Washing Machine Co., Cincinnati, Ohio, are the manufacturers of the Boss Rotary Washer, of which we give two illustrations herewith. This washer has an entirely new rotary movement. In response to a desire of the housefurnishing goods trade in general for a rotary washing machine which should be built with more than a full revolution to the pin-wheel before reversing each time, the

BOSS ROTARY WASHER.-FIG. 1.

manufacturers have in the construction of this machine spared no expense nor time in perfecting a rotary principle that would answer fully the requirements of the market, all

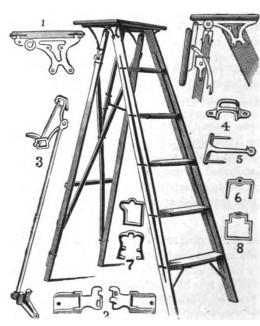

BOSS ROTARY WASHEB.-FIG. 2.

of which can be fully adjudged on investigation of the principle underlying the construction of the Boss Rotary Washer. It is extremely simple in its mechanism. The gearing is composed of only four castings, all of which are

intermeshed, thereby insuring absolutely immediate and concurrent action of all parts when any one part is in motion. One very important feature is in the fact that there is no lost motion, which is the principal cause of breakage in many other styles of rotary washers. Each cog and all of the castings are extra heavy, which together with the simplicity of the mechanism, would entirely overcome all danger of breakage of any parts. The manufacturers desire agents for the sale of this machine in every town, to whom they will furnish a full guarantee, and they desire correspondence with dealers upon the subject of terms, prices and territory, which will be promptly responded to.

Udell's "Excelsior" Step Ladder.

Udell Works, Indianapolis, Ind., among the numerous woodenware specialties that they are manufacturing, are distributing through the Hardware and Housefurnishing Goods trade Udell's Excelsior Step Ladder, illustration of which, and its several parts, we present in this article. It is manufactured from clear white Norway pine, an effort being made by the manufacturers to select all of the stock necessary with a view to having it as perfect as possible before putting it into the ladder. The castings are made of malle-

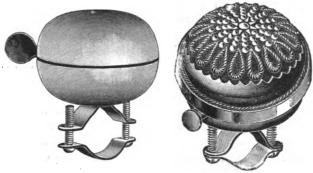

EXCELSIOR STEP LADDER.

able iron and well japanned, the steps being fastened with anchor-shaped iron, as shown in Fig. 5 in the illustration we give. The top steps are eight inches wide, and held firmly by the brackets shown in Fig. 1 in the illustration, the legs being locked in any position by the brace shown in Fig. 3. The manufacturers state that they have always taken a pride in this particular grade of ladder, it being the best possible to turn out and one of their specialties on which the trade has been annually increasing ever since the inauguration of their business. They manufacture a large line of step ladders, embodying various special advantages, and running in price from 9 cents to 30 cents per foot, but for general sales the "Excelsior" has invariably held the market. The average weight of the step ladder referred to herewith is three pounds per foot. It is also made with a folding top. for which a slightly additional price is charged.

Starr Bros', Bells.

Starr Bros. Bell Co., East Hampton, Conn., is one of the oldest firms engaged in this branch of the Hardware industry, and has assisted in making the town of East Hampton well known as headquarters for everything in the line of bells, the business having developed from year to year from the time of their establishment to the present, until it is safe to assume that anything needed in the bell line can be procured within its confines. This firm was established in 1840, and has been in continuous operation ever since. It has originated many of the styles and designs that are the most popular to-day, and in the sale of which they have been industrial pioneers. In the later development, they have been quick to realize the requirements of bicycle riders, and

STARR BICYCLE BELLS

in many instances have anticipated their views and wishes in regard to style, size, make and finish. They were early on the market with a full line of Bicycle Bells, which at once met with the favor of the trade, and have been in constant demand ever since for all possible requirements. We give several illustrations in the course of this article of the styles on which the bulk of the trade has been made during the past few years. This season the company issue a new catalogue and price list showing the great variety of styles, to suit the trade, and meet the requirements of the jobbers

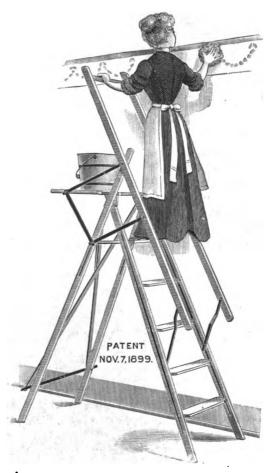

AUTOMOBILE BELL.

throughout the country, from the finest finished rotary electric and centre stroke bells and double chime tandem bells to the high-grade lock-clamp cast gongs suitable for the Automobile, of which they make different styles, and issue a separate catalogue fully illustrating these goods. The finish and grade of these special products of this company give every evidence that the quality of material is the best that can be produced in bell metal, and the guarantee which accompanies the products of this character from a concern that has had so many years' experience, gives a feeling of security to every buyer who will benefit by their new catalogue, which they desire to distribute largely, and which is of sufficient importance to be requested, if not already received. In addition to the above goods they manufacture bells of every description, comprising a complete line of door bells, hand bells, gong bells, cow bells, sheep bells, sleigh bells, etc.

The "Safety" Step Ladder.

The American Juvenile Bed Co., Cincinnati, Ohio, are introducing through the Hardware and housefurnishing goods trades, one of the most useful and novel Step Ladders that has recently been placed on the market. We give an illustration of this improved form of ladder, which seems to promise

SAFETY STEP LADDER.

all its name imports. Having a side rail for protection from accidentally falling off or upsetting, gives it a selling feature that will readily be taken advantage of by the progressive dealer. It is claimed by the manufacturers that by this simple device three feet of additional ladder service is obtained in its use without an increase in cost. It impresses its unique individuality upon all trades like paper hangers and painters, or for factory use, where additional safety is desired and should be provided for. It is constructed from the best grade of lumber suitable for the purpose, the braces and bolts used being of steel, and every care is taken to make them mechanically perfect, knowing how requisite it is to exercise every precaution in putting them together.

The Powers Automatic Chimney Top.

Powers Bros., Streator, Ill., are the manufacturers of the Automatic Chimney Top and Ventilator, of which we give an illustration. There are already before the trade a number of appliances of this character, all of which are claimed to possess the requisite qualifications to ensure successful operation. The Powers is constructed on scientific principles, and is the product of unmistakable invention as to novel construction. All the bearing is on pivot next to cover, where the weight is concentrated. The brace at the bottom of cover to center bolt keeps it in place, and prevents it rubbing on stack. The wind, by its novelty of construction, blows past the sides of cover instead of through it, and thus creates a vacuum, largely increasing its natural draft. The formation and adjustment of cover stops rain, smoke or soot from blowing down the chimney and impeding its successful operation. A wire ring is placed under lug on center post

as a safeguard, preventing cover from blowing off. It is constructed from extra heavy galvanized sheet iron, about No. 20 gauge, and when used on chimneys is made with base fun-

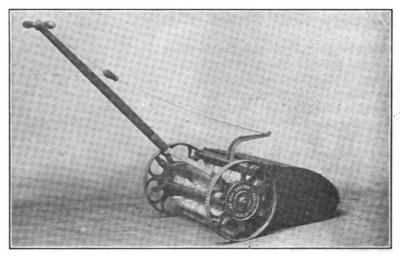

POWERS AUTOMATIC CHIMNEY TOP.

nel shape. They are packed six sets in iron mountings in box, with free pattern for making cover and vane.

"Apollo" Lawn Sweeper.

Greene Mfg. Co., Springfield, Ohio, are the manufacturers of the "Apollo" Lawn Sweeper, illustrations of which we give in the course of this article. This sweeper, which is of

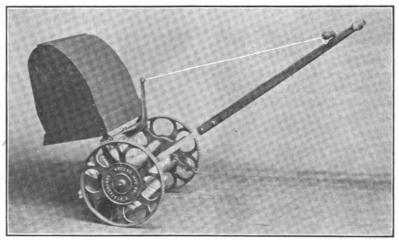

cut and dead grass is removed from the lawn in less time than it takes to mow the same. Its continued use promotes the growth of the turf and has a tendency to make the grass very thick. By removing all the dead grass, the lawn invariably presents a rich green instead of a dull gray or brown color. The lawn sweeper is handsome in design, extremely attractive in appearance, and well built in every particular, wrought or malleable iron being used wherever any strain exists. The brush is made of Tampico, a tough, durable fibre, no metallic wire brush of any kind being used, as experience has shown that such brushes are apt to cut and tear the grass, and rust or break off. A small lever at the right side of the machine allows the brush to be adjusted to any desired height, and as the brush is hung on links in such a manner that it may rest automatically, it will pass over a large stone or obstruction without injury. The drive wheels are 15 inches high, which makes an exceedingly light running machine. All iron work is finished in rust-proof aluminum-bronze enamel. The grass pan is finished in carmine gloss paint, and is attractive in appearance. It is claimed by the manufacturers that it will keep the grass in better condition with half the amount of water than is usually the case, and is certain to keep out "crab grass," dan-

APOLLO LAWN SWEEPER.-FIG. 1.

novel design and construction, should become extremely popular with the trade handling lawn sweepers and similar appliances. It is designed for persons who desire that their lawns shall be well kept without the enormous expenditure of time and labor which is ordinarily necessary to ob-

delions and other pests of this nature, its effect upon the grass being likened to the brush on the human hair, thickening and promoting the growth. It is made in three sizes, with 20, 24 and 28-inch sweep, selling at \$8, \$9 and \$10, respectively.

APOLLO LAWN SWEEPER.-FIG. 2.

tain that result. It will be noticed in Fig. 1 the machine consists partially of a revolving brush, throwing the cut grass, leaves, paper, dirt, etc., forward into a receptacle placed there for the purpose. In its use, every particle of

"Henry, you're such a sleeper, I'm sure you'd like those Arctic nights, six months long."

No; you're mistaken. In three months you'd begin telling me it was time to get up."—Ex.

REVIEW OF THE MARKETS.

Wire Nails: The meeting held in Pittsburgh recently by leading manufacturers of Wire and Wire Nails, and the action taken at the same, has done considerable to strengthen the Wire Nail market, the general withdrawal of the low prices that were obtainable so recently improving the conditions materially, the minimum price of Wire Nails being fixed at \$2 a keg in carloads, f. o. b. Pittsburgh, plus actual freight to destination. The sales of Wire Nails since have been quite large, and a confident demand is perceptible. A meeting is to be held on February 1, under the same auspices, and many dealers apprehend a similar advance, which will gradually bring the market back to satisfactory and steady prices, with the probability of large purchasers being protected by the advance. The jobbing trade are bringing themselves in line under the prevailing movement. The market is represented by the quotation for carloads of \$2 to \$2.05 f. o. b. Pittsburgh, plus actual freight to destination.

New York. The local demand from store is not a very heavy one, demand being nominal. The following represent the market: Small lots from store, \$2.25 to \$2.30. Carloads on dock, \$2.25.

Cut Nails: The Cut Nail market is without special feature, under a moderate demand. No large stocks are accumulating, the demand about absorbing the output. General quotations may be stated as follows, f. o. b. Pittsburgh, plus the actual freight to point of destination. Terms 60 days, or 2 per cent. off in ten days:

Carload lots	 \$2.05
Less than carloads	 2.10

New York. The local demand is but nominal, and quotations remain as previously given.

To jobbers	in carload lots on dockless than carload lots on dock	. \$2.18
Small lots	from store	2.25

Barb Wire: At the meeting held in Pittsburgh last week, former quotations on Barb Wire were reaffirmed, which is claimed to be an actual advance over quotations that were obtainable in some instances at a recent date. But with the present substantial outlook for a large Spring trade, the stiffening of the market is regarded with favor and orders are going forward satisfactorily. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in ten days:

To jobbers i	in carload lots. Painted	\$2.60
- 44	" Galvanized	2.90
46	less than carload lots, Painted	2.65
44	" Galvanized	2.95
To retallers	in carload lots, Painted	2.70
44	" Galvanized	3.00
66	less than carload lots, Painted	2.80
44	" Galvanized.	8.10

Ellwood & Baker Wire is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plais Wire: At the meeting of last week, to which reference has been made, the quotations on Plain Wire were reduced 30 cents per hundred pounds, which about meets the quotations which were the temptation for early orders at a date not very remote. On this new basis the market is regarded as being very favorable for the early development of a big demand, which already commands the present output of the mills to supply. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

Dasc 812	C3.
	Galv.
To jobbers in carload lots\$1.95	\$2.35
To jobbers in less than carload lots 2.00	2.40
To retailers in carload lots 2.05	2.45
To retailers in less than carload lots 2.15	2.55

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances, as follows:

в	to	9.		E	as	ie								.\$0.40	extra.
10				. \$0.0)5	advance	over	base						40	**
11				1	10	••	**	**						40	44
12	an	d 1	24	1	15	44	**	**						40	44
						**	**	64						40	44
14					35	•••	66	64		ŀ	•			40	64
15				4	15	44	**	**						75	**
16					55	**	44	**						75	**
17				:	ŽÕ.	44	**	44	1		-		-	. 1.00	**
18					35	**	**	**						1.00	44

For even weight bundles, 50 pounds and over, 5 cents per bundle advance on above.

Charles Morrill's Specialties: The following recently revised quotations represent present prices on the line of Saw Sets, Bench Stops, Punches and other Hardware Specialties manufactured by Charles Morrill, 273-277 Broadway, New York. The prices given are subject to a trade discount of 50 per cent.:

							er dozen.
Saw	Sets.	No.	1		 	. .	\$15.00

Lead Pipe, Sheet Lead, &c. Under date 13th inst. a reduction in the price of Sheet Lead, Lead Pipe, &c., is announced by the manufacturers. Following are the present prices, which are subject to the usual discount to the trade of 20 per cent., 1 per cent. for cash in ten days being allowed and freights equalized with nearest manufacturing point:

	Per pound.
Lead Pipe	 6 ½ c.
Sheet Lead	 7¼c.
Tin Lined Lead Pipe	 12 ½ c.

Cordage: The Rope market remains substantially without change. We continue the quotations named previously, which may be said to represent the market:

	,	Cent
Manila, 7-16 inch and larger		
% inch		18
1/4 inch and 5-16	• • •	14
Sisal, 7-16 inch and larger		
% inch	• • •	10
Lath Yarn, medium and coarse	• • •	
Jute Rope. No. 1		
No. 2		

Linsced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....68 cents per gallon. In lots of 5 barrels or more......62 cents per gallon.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

THE PHILADELPHIA TRADE.

The new year seems to be opening with a fair volume of trade, while the market is undeniably firm. On a number of staple lines advances have been made, while wire nails have also scored an advance, and barbed wire has made a still heavier rise in price. The demand for wire nails and wire is enormous, and, from all we can learn, the manufacturers are simply swamped with orders, and it looks as if there would be some difficulty in getting the goods during the coming Spring. Almost all manufacturers report they are working on full time, and are still considerably behind, while the

iron and steel market seems to be showing most unusual strength.

It is a most encouraging sign that the goods being sold are going directly into consumption, while the cold weather is creating a brisk demand for cold weather goods. This, of itself, is an important factor in causing a brisk Spring trade. If the Spring finds the retailer with empty shelves and his Winter goods turned into cash, he has both the desire and the ability to buy goods for Spring and Summer use, and prospects now seem to point in this direction.

We trust that, in closing their books for last year, our customers have had a prosperous year, and hope that 1902 will make a similar record.

Biddle Hardware Co.

THE PITTSBURGH TRADE.

The matter of most interest during the past week has been the nail and wire market. Factories which do not produce their own billets and rods reached a point where they were selling at cost or below. When the trade became convinced that bottom had been reached, orders were placed freely and prices reacted. The future of prices will, of course, depend upon the demand, which would seem to be large this Spring, as building operations are quite general. Travelers find the trade in good shape on their initial trip for 1902; orders are given freely, both for present and future shipment. In general, collections are good, although of course there are always some slow payers who have to be accommodated. The number of failures is noticeably smaller than usual. On the whole we can report trade in a very favorable condition, and the prospects good. LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

Business starts off briskly for the new year; this is especially true of staple goods. Already manufacturers are unable to fill orders promptly, and report that they are snowed under with rush specifications on contracts. These conditions, of course, will stimulate trade, and without doubt there will be further advances in the near future.

SICKELS, PRESTON & NUTTING Co.

THE MINNEAPOLIS TRADE.

There is nothing particularly new to write you at this time. Business is not dull in the Hardware line, as a whole. It is certainly not with us, considering the time of the year. We have had no snow to speak of, and with the exception of about ten days well down below zero, weather temperature has run from ten to thirty-five degrees above. Clear, bright, sunshiny days. Out doors work going along as usual, of course not quite as much in the way of building as during Summer weather, still very much more than though we were having cold, stormy weather. Every one seems very well satisfied with last year's results, and pleased at prospects for the future.

The recent action taken to stiffen up the price in nails seems to meet with the general approval of the trade. Now, if the screw manufacturers would take similar action without overdoing it, that would be a good thing to do.

The writer has recently been brought in contact with the general land agent of one of our principal Northwestern roads, and also with another man who is making a specialty of handling Red River valley lands. They tell us that they are working just as hard now in showing lands to land-seekers as during the Summer and Fall. There is no let up whatever, and they can see no possibility of it unless we should have generally hard storms. The last year has been the most successful year in their line that they have ever known, with every indication that the coming year will be way ahead, that farmers from Illinois, Iowa and southern parts of Minnesota are selling their high-priced lands and going up into Northern Minnesota and the Dakotas, where land is selling at lower rates, but at figures that even two years ago would have seemed impossibly high. This means good business to the jobbers of the Twin Cities, also the lumber men, and through general prosperity, business for the retailers, employment for laborers, etc.

The weather conditions have been such that the loggers have been able to do their work to the very best of advantage; in consequence there will be an enormous lot of logs, and with the general hope that there will be somewhat lower lumber prices. There is no question that the extremely high prices in this market have held building back somewhat. Still we hope and never expect that they will ever be as low as the prices prevailing during 1894, '95 and '96. However, it has been a good thing for the lumber men, for many that a few years ago were on the verge of ruin, are now independently wealthy.

W. K. Morison & Co.

THE ST. PAUL TRADE.

With our inventory out of the way, and satisfactory results shown, we start out in the new year with much enthusiasm. We feel that we have before us a year of good business, with no great probability of declines and not much chance for advances. We like a steady market. Our territory has had a good crop, and the farmer feels able to buy liberally. January business, so far, has exceeded last year by a great deal, in fact has been the heaviest January we ever experienced, and we think that the entire Spring months will prove to be equally good. The advance on wire and nails came as a surprise to us. There may or may not be a good reason, but we are in the hands of the Trust, and move as they jerk the string.

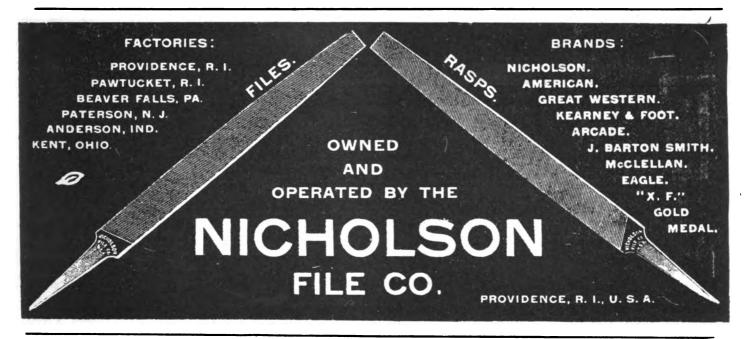

C. W. Hackett Hardware Co.

THE SAN FRANCISCO TRADE.

Although current business is reported exceptionally brisk for January, and the prospect for the approaching season unusually bright, the sagacious dealers of this city are considerate enough to be in line with the rest of humanity hereabout in deepest lamentation because of the long-continuing sunshine and cloudless sky and the lack of rain, which the country is sorely in need of.

This unprecedented January trade was heard commented upon by M. C. Sloss of Miller, Sloss & Scott, wholesalers and jobbers, and by these retailers: Vice-President Sites of Palace Hardware Co., Charles Brown of Charles Brown & Sons, Armstrong & Philpot, and Henry Gracey of Henry Gracey & Co.

Saturday night, the 18th instant, the following members of the trade returned home from a Northern visit to Nevada City: Edwin Jones, manager of the Alexander Hardware Co.; Bennett Bros., M. C. Sloss, Mr. Philpot of Philpot & Armstrong, Max Brown of Charles Brown & Sons, and Mr. Rulofson of Baker & Hamilton. Their trip was of a fraternal nature, to attend the fourth annual meeting of the Pacific Retail Hardware Association, of which they speak as a progressive combination that is hard to beat, both from

a trade promotion standpoint of view and as up-to-date caterers to visiting friends. Max Brown reports that several matters of importance to the trade were discussed, but as an executive committee of the whole, and that it is the sense of the association that they be given no publicity until further consideration be had by the California State Retail Hardware Association, at the State meeting to be held in San Francisco next March.

The Pacific Association elected officers for the current year as follows: J. C. White of Marysville, president; Oscar Schultz of Dixon, vice-president; R. W. Boyd of Marysville, secretary, and Wm. Earle of Colusa, treasurer, the foregoing officials and T. B. Gibson of Woodland and A. F. Bradley of Grass Valley to serve as executive committee. The association adjourned to meet next January, in San Francisco.

INDUSTRIAL PRESS ASSOCIATION.

Side Line Wanted.

GENTLEMAN residing in St. Paul and covering St. Paul, Minneapolis, Duluth and West to the Coast on the Great Northern and Northern Pacific Railroad having personal acquaintance with Wholesale Hardware and Department Store Buyers, would like a good line on commission. Address St. Paul, care Hardware, 275 Broadway, New York.

The Engineering and Mining Journal and Mining and Metallurgy, the latter a semi-monthly publication, have been consolidated. W. J. Johnston is president, F. J. Pratt, treasurer, and Lucius S. Bigelow is superintendent and general manager. Dr. David T. Day is editor-in-chief, Edward W. Parker is managing editor, and Frederick Hobart associate editor.

White, Van Glahn & Co.'s New Catalogue.

White, Van Glahn & Co., 15-16-17 Chatham Square and 49 East 42d Street, New York, have recently issued an extremely attractive trade catalogue and price list of Hardware and tools, forming a volume of 320 pages, neatly bound in red cloth with gilt title on cover. It is fully up to date in every respect. The catalogue is illustrated throughout with excellent engravings, although of reduced size, in order to show an extremely large assortment in this handy volume. It gives an excellent idea of the large variety of goods distributed by this old and reliable firm. Net prices are quoted by the dozen, and also in many instances for single articles. Screws, bolts, etc., where standard list prices are invariably used in connection with the sale, have these special lists incorporated in the contents of the volume, coupled with the statement that discounts will be quoted on application. Many tables of useful information and other interesting matter are given in various parts of the catalogue, and the typographical appearance of the contents indicates the care with which the same has been compiled, the arrangement of the matter being a substantial evidence of the same fact. In the front, pictures are presented showing the old store on Chatham Square, and also the new and handsome branch store on Forty-second Street. A very complete index accompanies the volume, by which, under several headings, facility is greatly increased for ascertaining information. It is an excellent little catalogue for the class of trade catered for.

Russell & Erwin Mfg. Co.

Russell & Erwin Mfg. Co., New Britain, Conn., and 43-47 Chambers Street, New York, have recently issued a thoroughly revised edition of their Price List No. 4, which also includes an Appendix A, which covers the goods that have been added to their several lines between the dates of November 1, 1900, and October 1, 1901. They have also prepared and ready for distribution extra pages for insertion in the 1899 catalogue, which illustrate and describe the various additions above referred to.

New Shells Made By Peters Cartridge Co.

The line of shotgun shells made by The Peters Cartridge Co., of Cincinnati, Ohio, has long enjoyed a popularity. These shells have until recently been loaded exclusively with King's powder, smokeless, semi-smokeless and black. For some time past this company has been experimenting with a view of adapting their smokeless powder shells to the various makes of smokeless powder on the market. It now announces that after exhaustive tests it is ready to supply Peters' Ideal and New Victor shells loaded with either King's, Du Pont, Hazard, E. C. or Schultze smokeless powders. These loads are now on the market, so the sportsman having a liking for Peters shells, but preferring some one of the above named powders, can secure the load he wishes. In addition to adapting these shells to the foregoing powders, all of which are bulk for bulk type, the Peters Co., we understand, are perfecting a high base shell which is nearly ready for the market, and which will be suitable for the various types of dense smokeless powder. It is the aim of this company to complete its line of shotgun shells suitable for all makes of smokeless powders of both bulk and dense type.

Death of Edward L. Hinman.

Edward L. Hinman, president of the Brown, Hinman & Huntington Co., of Columbus, Ohio, died in that city on Tuesday morning, January 7.

STANLEY RULE & LEVEL CO.

new britain, conn., u. s. a.

Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

Bruce & Cook's Annual Greeting.

Bruce & Cook, 186-190 Water Street, New York, are distributing to the trade as usual their well-known calendar, which now represents the twenty-eighth year of calendar service, and commemorates the ninetieth year of the business career of this substantial and reliable firm. As jobbers in tin plates and metals they are known throughout the entire country from Maine to Texas, the name of Bruce & Cook being synonymous with Tin Plates and Metals wherever the English language is spoken, and while no attempt has been made in their calendar service to equal the artistic productions of the day, it is safe to guarantee that their calendar is suspended for its usefulness in the counting rooms and offices of the leading concerns handling metals that are permitted to receive it. On the pictorial part of the calendar is depicted two views of their warehouses and offices, and this, in accordance with their usual program, is preceded and followed by a list of the goods—and a good, long list it is which they carry in stock. This matter, occupying as it does the central column, is flanked on either side by the first and last six months of the year.

Changing From Credit To Cash.

The following reasons are given by *Business* as the basis of a letter that might be sent out by a merchant who has decided to adopt the cash system:

January 1 will see an important change at our store.

This is what the change will be:

On and after that date we shall pay spot cash for everything we buy.

Everybody who buys anything from us will be obliged to pay us spot cash for it.

These words "everybody" and "everything" mean exactly what they say—there will be no exceptions made.

These are the reasons why:

If we sell on credit, we must buy on credit.

If we buy on credit, we must lose the discounts cash buyers

That means that we must sell the goods for a trifle more than we ought to.

If we buy and sell on credit, it calls for a large amount of expensive book-keeping.

That means that we must sell our goods for another trifle more than we ought to.

If we sell on credit, we are sure to lose a certain amount a

year on bad debts.

That means that we must sell our goods for still another

That means that we must sell our goods for still another trifle more than we ought to.

Under a credit system, we can't snap up the special bargain lots that are always on the market.

We can't buy the sacrifice stock of the man who must have money.

We can't buy closely and turn our stock quickly.

We must buy regular lines of regular goods at regular seasons.

All these things will be different now—in our store.

The change for the better will be immediately seen on every counter, every shelf and every price-tag.

We shall carry more goods, fresher goods, better goods, more stylish goods.

We shall have a lot of money, and we shall divide the saving with you—with the lion's share for you.

White Lead Process.

Does the work of three months in five days. It seems that the problem of how to save time in the manufacture of white lead has at last been solved. Upon this problem a vast amount of labor has been spent, and many chemical processes and mechanical devices have evolved out of a long line of experiments only to have the results rejected by the trade as unsatisfactory.

White lead and linseed oil make paint and for this purpose 150,000 tons of white lead is annually consumed. The Lead Trust, or the National Lead Co., which is its corporate name, owning fully 60 per cent. of the American white lead factories, and two or three other companies outside of the trust process." Every new effort to find a substitute for the product of the Dutch process has shown that there is no other way than by corrosion to make a white lead which the painters will accept. But it seems to have been too readily assumed that a thorough corrosion could be effected only by the slow process.

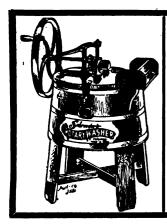

At all events, a new process has been found. It is a process of corrosion. It acts upon the blue lead in precisely the same way as the old Dutch process acts, but it does in five days what by the Dutch process requires from three to four at the present time produce almost the entire supply of white lead and make it according to the old-fashioned "Dutch

White lead is carbonate of lead. That is, it is ordinary blue lead corroded by carbonic acid gas. The blue lead is found sometimes pure, as in the Missouri lead fields, and often in combination with silver and copper. It is smelted into small blocks, which are known as pig lead, and which in that form are the raw material of the white lead factories. By the primitive process which still obtains in the production months.

of almost the entire supply of white lead now being marketed, the pig lead is first melted and is ejected from the melting pot through a tube and spigot at the bottom of the pot about an inch in diameter on to an endless chain, each link of which is a mould having the general appearance of a waffle-iron. In the shape thus assumed by the melted lead, it is called a "buckle," the purpose of giving it this waffle-like shape being to provide as much surface as possible for the carbonic acid gas to attack.

The buckles, laid one by one, in earthern pots, are "stacked" in a room of convenient size and under each pot is a small basin containing acetic acid. The acetic acid basins are surrounded by wet tan bark and the heat thereby generated, acting upon the fumes of the acetic acid, creates the carbonic acid gas which, eating through the blue lead, produces the white corrosion known as white lead. The process of corrosion occupies from 90 to 100 days, and even then the blue lead has not been completely corroded. It is not safe to continue the process much longer than ninety days, however, because after corrosion a deleterious change occurs and that portion of the lead which has first corroded becomes crystallized, and

The Schroeder Rotary Washer

is the simplest, most durable, easiest running and the most noiseless washer on the market. We also make the Brammer Rotary, Triumph, Columbia, Great Western and Adams Washers. Guaranteed to give satisfaction. Ask your jobber for them, or write to

Benbow-Brammer Mfg. Co.,
Factories St. Louis, Mo.
St. Louis, Mo.

all this hard and gritty material must be removed.

It is to be seen, therefore, that while this primitive method of manufacture is thus far the only one that has produced a white lead entirely adapted to the requirements of commerce, there are nevertheless in the method serious drawbacks and defects. Most serious of all is the amount of time consumed Another is the labor and expense involved in separating the crystallized material from that which is simply corroded. The third is the considerable residuum, usually as much as 30 per cent., of blue lead which even at the end of the ninety-day period has been unaffected by the carbonic acid. Each of these defects has been reached and overcome by the new process.

This new process is the invention of J. W. Bailey, a practical mechanic of great experience in white lead manufacture. Its product, as in the case of the old Dutch process, is carbonate of lead. The only difference is that when the carbonic acid treatment is ended, the blue lead is completely corroded, five days only have been consumed and no crystallization whatever has occurred. The pig lead is melted precisely as by the older process. It is driven from the melting pot by the force of its own gravity through a short horizontal nozzle, as in the former case, but instead of running out into the waffle-shaped buckles it is forced through a thin steel plate, in which the horizontal nozzle is made to terminate, the steel plate being perforated with about two hundred minute holes not more than one one-hundredth of an inch in diameter.

There thus fall into the air, cooling immediately, fine metallic fibres which, dropping upon trays each holding about fifty pounds of fibre and permitting free circulation through the entire mass, are passed swiftly through an 8 per cent. solution of acetic acid and then stacked. This entire process is mechanical and automatic, and a great amount of hand labor is saved. The carbon dioxide has to operate upon a minute lead fibre instead of upon a large, thick buckle. Practically, therefore, the exposed lead is all surface. Every particle is reached by the gas immediately and in four or five days it has been entirely corroded. There is no blue lead remaining and the further process or separation by which under the old method the crystallized particles must be removed is unnecessary. Under the most careful microscopical examination nothing is disclosed in the Bailey product except pure white lead and that 2 or 21/2 per cent. of water which is a necessary ingredient of the best white lead product. The economies thus accomplished are enormous. The total cost of manufacture by the Dutch process averages from \$13 to \$18 per ton. of dry product. When it is said that the total cost per tor by the new process averages something less than \$5, the effect of Mr. Bailey's invention is seen to be far reaching. Even at the heavy and fluctuating cost of between \$13 and \$18, however, white lead manufacture has been immensely profitable and the annual market increases in huge proportions.

The owners of the Bailey process have gone into its development with confidence and energy. They have bought a large tract of land in the well-known Missouri lead fields on which several mines of known value have been located. They have made themselves much the largest owners of lead-bearing ores in this famous lead territory. Their property adjoins that of the St. Joe mine, which is one of the heaviest lead producers in the world. In this immediate neighborhood are the mining properties of the Lead Trust and also the areas recently purchased by the Messrs. Guggenheim, whose association with the Smelting Trust has been announced.

With the new process and these extensive mines as a portion of their assets and sustained by large capital, these men have recently organized the Union Lead and Oil Co. It is the purpose to take out their own ores, reduce them on the spot by concentrating plants, four of which, each of 2,000 tons, capacity, are presently to be constructed, and convey the product by railroad to St. Louis. The company's white lead works are to be located in Brooklyn. The operation of capital that by the new process can be turned over four times a month, as against that which, to produce similar results, must be locked up for nearly four months, foretells a revolution in the white lead business.

Selling Prices.

One of our salesmen who has excellent opportunities for observation and who uses them to advantage, tells us that when he offers an article at \$5 per dozen, he finds difficulty in selling it. Retailers say "we must sell this at 50c. each and there is not enough margin for profit at a cost of 42c." The same is true of an article for which we ask 50c. per dozen, which they want to sell at 5c. each, or \$1 per dozen, which they want to sell at 10c. each.

Now we recognize the convenience of the 5c., 10c., 25c. and 50c. price, but because it is convenient is not a good reason for sacrificing a profit which you can as well make as not. We base our prices on lowest factory cost and when we add a jobber's profit, cannot always gauge prices so as to make the retailer his usual profit if the article is sold at round figures.

Would it not be better for the retailer to break away from these figures and ask odd prices? When you find 5c. gives too small a profit on the cost of an article, ask 7c. for it, or 12c. when 10c. does not pay what it ought. In this way you will add a few cents on each sale which will amount to quite a difference in your favor at the end of the year.

This is the modern plan of retailing in the large department stores, and people in cities have gotten used to these odd prices. You can introduce it just as well into your store.

We know of one concern in Western Pennsylvania whose policy it is to add a fixed percentage to cost in order to determine the selling price of each article and although this results in many odd prices, they have found the plan very successful. While it may not always be best to do this, it is certainly worth while to try to get an adequate profit on all goods sold, even if it is necessary to break away from some tradition in so doing.—Hardware Hints.

Blacksmiths, Ancient and Modern.

Blacksmiths love their work; they are proud of their craft. They are men of iron and fire. Theirs is a fascinating pursuit. It is not given to many craftsmen to feel their work grow and develop under their hands, but the blacksmith, pitting his strength, skill, experience and resourceful mind against the king of metals, feels all of the joy and buoyant pleasure which comes to them who take crude shapes and materials and make them into useful forms and into finished products, writes Malcolm McDowell in the Chicago Record-Herald. It seems a simple, easy thing to do: only to strike a piece of heated iron with a hammer, but every generation finds regiments of men who try the trick and fail. A good blacksmith has the good born in him. It is not every man who can master the art, who understands the vagaries and whims of iron and steel, who can draw a mental picture of the thing he wants to make out of iron and then make it, who can shape and form iron almost instinctively. There is no particular trick in welding two pieces of iron together. Yet chainmakers will tell you that comparatively few men can always make a perfect weld. It seems an easy task to bend a piece of iron if you have the necessary tools, but ironmasters will tell you that when the iron is two inches or more in diameter and the pieces must be bent around another piece which is in place in some machine it takes a "born" blacksmith to accomplish the task.

The old-time blacksmiths, the men who could do anything with iron and steel; the men who could shoe a horse, put on a wagon wheel tire, weld new links in an ox chain, make an ax, point harrow teeth, make a new pitman rod for a threshing engine, forge a cross head for an engine and weld an iron ring around a cracked cylinder, are passing away. The steam hammer, the drop forge, the hydraulic press, steel castings and automatic machinery are taking the places of the blacksmiths whose feats were sung by poets and whose forges were pictured on the canvases of famous artists.

The all-round blacksmith is found now in the country. In large centres of population blacksmiths, in common with other craftsmen, are taking to specialties. A morning's stroll disclosed five blacksmith's shops in which steam hammers are installed. A few years ago these very shops were alive with the merry music of ringing sledge hammers; today the chug-chug of the hissing steam hammer or the rat-tatat of the cushioned power hammer are heard there. there are as many or more blacksmiths to-day as there were ten years ago. All horseshoers are blacksmiths, but all blacksmiths are not horseshoers. There are thousands of knights of the leather apron who can no more shoe a horse than they can crochet a tidy. The horseshoers are an ancient craft, and they are a clannish lot. They preserve the traditions which have come down from the first days of the farrier's trade. The modern horseshoer is a scientific fellow; he knows the anatomy of a horse's leg and prides himself on being able to correct the evils which befall the "feet" of city horses by the "iron" treatment. He begins to learn his trade by sweeping out the shop, switching off flies, carrying beer and running errands. When he is called upon to take a light hammer and "strike," the errand boy swells his chest and begins counting the days when he will be a floorman, then a fireman, and eventually a boss.

The Romans were the first horseshoers. They tied flat thin iron plates to their horses' hoofs with thongs and strings. Then they bent the iron plate around the edge, so as to make a rim, and they fastened the shoe by sinking iron hooks into the outside of the hoof, and the next step in the development of the horseshoe was the nail, driven into the hoof. The Germans were the first to make a horseshoe with a crease in it. This was in the fifteenth century, or more than 300 years after the Romans began tying iron plates to horses' hoofs.

The Germans followed the crease with calks, and for several centuries their clumsy shoes were not improved upon.

Before the Burdens of Troy, N. Y., began making horse-shoes by machinery years ago all shoes were made by hand. The horseshoe nails were forged by hand from long slim bars of Norway iron. The horseshoers for years fought machinemade shoes, not because they interfered particularly with their profits, but because a genuine horseshoer must do something to a shoe himself. He looked with disgust upon machine-made shoes, but gradually such shoes became common, and now every shop has its kegs of machine-made horseshoe blanks.

Mica in North Carolina.

North Carolina is the only Southern State which has succeeded in developing any considerable deposits of mica.

In North Carolina mica mining has made some progress during the year, although it has been handicapped by low prices for the product, due to the large importations of foreign mica, says J. A. Holmes in Mineral Resources of the United States. The principal work has been done in the mountain counties, mainly Mitchell, Yancey, Haywood, Jackson and Moscow, where a number of the older mines were reopened and a few new mines were developed. East of the Blue Ridge mountains, in McDowell County, a mine (the Cochran) has been developed about eight miles north of Marion, and some good plate mica has been opened up and worked on a small scale during the year in Stokes County, near Sandy Ridge, and a limited amount of similar development work was carried on in Cleveland and Rutherford Counties.

West of the Blue Ridge, in Ashe County, the Carolina Mica Co. has developed a mine on Beaver Creek, near Jefferson, employing twenty men during the last three months of the year. This company has also erected near by a mill for grinding the scrap mica. In Mitchell and Yancey Counties nearly all of the older and well-known mines, such as the Deake, Spread Eagle, Cloudland, Double Head, Hawkins, Clarissa, and others, have been worked at intervals during the year, though some of them on a small scale. Nearly all of this work was done by parties whose available capital was so small that they were unable to purchase modern pumps and other equipment needed in working these deeper mines—one shaft in the Clarissa, for example, having been sunk at a depth of more than 300 feet.

In Haywood County the Big Ridge mica mine, seven miles from Waynesville, was worked on a considerable scale throughout the entire year, and was probably the largest producer of the region. The Shiny mine, eight miles from Waynesville, was worked for about five months of the year, and yielded considerable quantities of both sheet and scrap ·mica. In Jackson County a number of mines have been actively worked during longer or shorter periods. The Toxaway Co. has developed several mica deposits on its land near Sapphire, taking out considerable quantity of crude sheet mica. Several additional deposits have been developed with similar result on the adjoining Grimshawe lands. In other portions of the county the Frady and East Fork mines were operated successfully during half of the year, and the Long and Ferguson and other deposits were worked during shorter periods. In Macon County mining has been less active than during the recent past, the work at Lyle, Knob and Raby mines extending over not exceeding half of the year, and that at other deposits being rather developmental and irregular.

Perhaps the three most notable features connected with the mica industry in the United States during the year 1900 were the increasingly large use of American mica in electrical machinery, notwithstanding the continued large importation of foreign mica, the somewhat abnormal development of the ground mica industry, and the plans for the establishment in the United States of a plant for the use of the scrap mica in the manufacture of a new boiler-tube covering.

Sewing Machine Trade.

Under date of October 26, 1901, Deputy Consul-General Hanauer, of Frankfort, says:

The following figures gives the value of sewing machines imported and exported by the leading industrial countries in 1900:

Country. Germany	marks	Exports. 20,300,000	Imports. 8,200,000
France	dollars francs dollars	4,831,400	1,951,600 12,600,000 2,431,800
Great Britain	pounds dollars	1,452,000 7,066,158	280,000 1,562,620
Austria-Hungary (including knit- ting machines)	crowns		3,400,000
Switzerland	doll ars fr a ncs do llars	300,000 57,900	690,200 2,100,000 405,300
United States	dollars	4.500,000	

A German paper, in commenting on the above statistical showing, notes the complaints of German manufacturers of the sharp competition from the United States.

Mr. Thomasson's Lesson.

"Yes," said Mr. Thomasson, "I went home intoxicated one night about ten years ago and the lesson my wife taught me made a lasting impression on my brain."

"What did she say?"

"She didn't say anything. The lasting impression I refer to was made by a flatiron. See that hump?"—Indianapolis Sun.

Walking Backward.

Johnny—On the stage when a man leaves a king's presence, he always goes out backward. Why is that, pa?

Learned Pa—It is because his trousers are not in a proper repair behind or because he is afraid the king may be handy with his boot.—Boston Transcript.

Derivation of Mare's Nest.

The origin of the expression "to find a mare's nest" has been traced to the days of the early Saxons. What we call a nightmare was by our forefathers supposed to be the Saxon demon Mara or Mare, a kind of vampire, which caused the incubus by sitting on the sleeper's chest. The Mare vampires were said to be the guardians of hidden treasures, over which they were supposed to brood as hens do over their eggs, and the place where they sat was termed their noidus or nest. Hence, when any one announced that he had made an extraordinary discovery, some one accused him of finding a Mare's nest, or the place where the vampires kept guard over her hypothetical treasures.—St. Louis Republic.

First Steel Bridge in the Klondike.

The first steel bridge in the region of the middle Yukon was opened for traffic a few weeks ago. It spans the Klondike River, nearly opposite the mouth of Bonanza Creek, or about a mile and a half above its junction with the Yukon at Dawson. The main span is 154 feet long, and rests on steel caissons filled with concrete and strengthened with crib and rockwork. The total cost of the bridge in position was \$30,000. It was built by the Dominion Bridge Co., of Montreal. According to press accounts, it was tested by a large body of Northwest mounted police marching over it in step, which, if true, would seem like crude engineering.

Better Than Borrowing Money.

"Just before Badmun was sent to prison he bought a set of books, to be paid for in instalments."

"What did he do that for?"

"He said it would make the time seem shorter."—Chicago Tribune.

AMERICAN STEEL ROOFING CO.

Middletown, O.

CARY'S UNIVERSAL BOX STRAP.

CARY MANUFACTURING

19 and 21 Roosevelt St., New York.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CHATILLON SPRING SCALES.

Called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

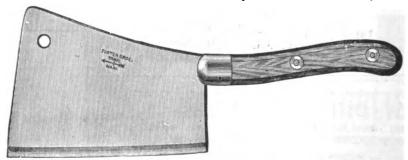

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

THE

ICKEYE" WASHING MACHINE. THE BEST, BECAUSE

It is easy to work. It cannot tear the clothes.

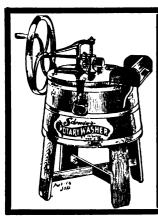

It adjusts itself to the size of the wash.

It has a removable bottom, making it easy

It will wash lace curtains and needlework without tearing, and better than you can do it on a washboard.

It is simple in construction, and has no complicated machinery to get out of order.

BUCKEYE CHURN SIDNEY, OHIO.

The Schroeder Rotary Washer

is the simplest, most durable, easiest running and the most noiseless washer on the market. We also make the Brammer Rotary, Triumph, Columbia, Great Western and Adams Washers. Guaranteed to give satisfaction. Ask your jobber for them, or write to

Edw. K. Tryon, Jr. & Co., Philadelphia, have in preparation a complete catalogue of Wheels and sundries, Base Ball, Tennis and general Athletic Goods; also another of Fishing Tackle. The first they expect to distribute to the trade in about ten days, followed closely by the other referred to.

The business conducted for a number of years under the name of C. W. Dunlap, 108 Chambers Street, New York, has recently been incorporated as the C. W. Dunlap Mfg. Co., with Charles W. Dunlap as president, and Willis W. Ferry, secretary-treasurer. The facilities for manufacturing the well known line of specialties identified with the name of C. W. Dunlap will be greatly increased, including as it does Kitchen and Garden Specialties and a variety of Mechanics' Tools.

A. G. Spalding & Bro., the famous Sporting Goods Dealers of New York and Chicago, will establish a branch house in Baltimore. They have purchased the stock and fixtures of W. W. Carr, 25 West Baltimore Street, and will remodel the store and stock it with up-to-date goods, Mr. Carr being retained as manager.

A patent was recently granted to P. A. Myers, of the firm of F. E. Myers & Bro., Ashland, O., for an improvement in horizontal force pumps, which simplifies the construction to a great degree and covers broadly the feature of grouping the suction and discharge valves in such a manner as to render them readily accessible, thus covering broadly the line of "Century" and "Bulldozer" pumps manufactured by F. E. Myers & Bro.

Surely there could be no more beneficent industry than one that lets the light into dark places. That is an important part of the business of the G. Drouve Co., of Bridgeport, Conn. This firm makes sky-lights in many shapes and sizes, suited to all sorts of roofs. The combination of lightness and strength, so much to be desired in sky-lights, is attained in the Drouve work. The company's plant is admirably equipped, and is kept very busy.

John D. Bethel, for many years past a prominent figure in the canvas and leather goods business, has accepted a position with the Marlin Fire Arms Co. Mr. Bethel, who for the present makes his headquarters in New Haven, at the Marlin factory, will be glad to see any of his many friends in the trade in case they are visiting in the East. Later on Mr. Bethel expects to look after the interests of Marlin Repeating Rifles and Shot Guns in Southern territory, where, no doubt, his old acquaintances will extend their invariably hearty welcome as of yore.

Flint Eddy & American Trading Co., Broad-Exchange building, New York, make the announcement that on and after February 1, 1902, they will do business under the single name of American Trading Co. It is their intention to continue the departments of their business as heretofore, and no change will be made in the present management. The American Trading Co. have been identified with Eastern trade for a number of years, and the Flint Eddy & American Trading Co. will, on adopting their single name of American Trading Co., continue the business already established with China, Japan, Corea and Siberia, and do an export and import trade with all the markets of South America, Central America, Mexico. the West Indies, Australia and New Zealand.

The officers of the Iowa Retail Hardware Dealers' Association after due deliberation have changed the headquarters for their convention, which is to be held February 18-20 in Des Moines, from the Savery to the Kirkwood Hotel. The programme of this meeting was given in our preceding issue.

John W. Sudlow, the well known manufacturer of the Dandy Sink Cleaner at 986 and 988 Halsey Street, Brooklyn, N. Y., owing to the successful growth of his manufacturing business, has been compelled to largely increase his facilities by necessary additions to his plant, adding valuable automatic machinery to his factory equipment, and is admirably prepared to ship all orders promptly at the time specification any general requisition. The year 1901 was the most successful year in the history of his business, his output exceeding by nearly 30 per cent. any previous record. The Dandy Sink Cleaner is without competition as a salable kitchen necessity, and its popular appreciation is well deserved.

Lowe Bros. Co., Dayton, O., publish an interesting little pamphlet every month under the name of "The Little Blue Flag," for the purpose of giving paint information and business facts to assist their agents and for the purpose of informing their clerks, salesmen, etc. It is a well-edited publication of its kind, and must be greatly appreciated by those for whom it is intended who are handling the products of this progressive company. From it we learn that the new year will note among other evidences of growth the opening of a New York house at 47 Fulton Street, which is a capital location, convenient for the paint trade. It will be handsomely fitted up, and it is their intention to carry a large stock for the advancement of their Eastern trade. W. R. Platt, who has had many years' experience in the Eastern paint business, will be in charge of this branch.

Magnolia Metal Co. have purchased a commodious office building and factory at 113 to 115 Bank Street, New York, into which they are transferring their business this month. It is their intention to equip this factory with the most modern appliances for manufacturing on a large scale, and at the lowest cost of production, so they will be prepared to turn out promptly all orders for their several specialties, which include Magnolia, Defender, Mystic and Adamant Anti-Friction Metals, and also at close competitive prices all grades of Babbitt Metals, of which they make a superior quality, from Genuine to No. 4. They also manufacture Solder, Electrotype, Linotype and Stereotype Metals, special Metals of all kinds, Railroad Brasses, etc. With the increased advantages gained by this additional factory to those already established at Stirling, N. J., Chicago and Montreal, their facilities for manufacturing and prompt delivery of Babbitt Metals will be unequaled.

A late census bulletin estimates the population of the entire United States, including all the outlying possessions, at 84,233,069 in the census year. Of this total 75,994,575 inhabitants are credited to the United States proper, while over 8,200,000 are located in the new possessions. The census only extended to Alaska and Hawaii outside of the "continental United States." The remaining figures are taken from the best available sources. The bulk of the outside population is located in the Philippines, which are credited with 6,961,339 people. Porto Rico had 953,243 inhabitants; Hawaii, 154,001; Alaska, 63,592; Guam, 9,000, and American Samoa, 6,100; while persons in the military and naval service of the United States, outside of the territory of the United States proper, numbered 91,219.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

This is the season when the retail dealers who form the Associations in the Hardware industry are actively employed in meeting in Conventions, getting better acquainted with one another, comparing notes as to methods for meeting unrighteous competition, and listening to able articles embodying the views of those born leaders in mental activity whose stalwart and advanced ideas give strength to trade and traffic and propogate methods for producing profits. They are to be heard from in every State, and the movement that originally gave small show for such successful development now commands the respect of jobbers and manufacturers, and will eventually embrace every sagacious dealer in the several States where Hardware enterprise exerts a characteristic force.

The passing of the first month in the year with every indication prevalent of continued prosperity, has inspired the dealers, whether jobbers or retailers, with a confidence in the future difficult to confuse. The few changes of a stiffening character noticeable in the conditions of the markets, do not exert a baleful influence, but rather stimulate purchases, the feeling gaining ground as the season advances that prompt deliveries will be difficult of accomplishment, and the earlier that orders for standard requirements are given the greater certainty is counted upon that the goods will get in stock. The fact that few manufacturers have been able to get much stock ahead has had its influence in pressing the sources of supply for some evidence that disappointment will not in every case antedate

deliveries. The manufacturers on their own account are not free from anxiety as to obtaining supplies of raw material, very few of them being in that happy state which renders them independent of any fear arising from a lack of cars to forward supplies.

Reports from the West indicate that the business for January was far ahead of that done in January, 1901, in a number of instances largely so. Prices are gradually growing firmer, and the demand steadier, and these points of themselves largely affect the obtaining of commensurate profit on the current sales. The desire to embark in business is again active, and inquiries are urgent as to a good location, where a fairly liberal capital can guarantee satisfactory results to a movement of so much importance.

The largest producers of material in the world are under contract for almost their entire product for many months to come, if not for the larger part of the current year, and were it not already announced to be the policy of the makers not to arbitrarily advance quotations with no stock to supply, one might naturally look for conditions prevailing in 1899, from which there was so great a reaction.

The near zero weather which has of late been a prominent condition in the weather bureau, has to some extent checked the demand for Builders' Hardware, which, however, promises to be of short duration, so many projects being under way in that particular line as to promise an extremely active season, the low prices prevailing exerting a natural influence in developing a demand.

A number of jobbing houses who have conservatively held aloof from adding a sewing machine department to their other lines, are this season contemplating this attractive addition to their regular business. Reports of large sales with convincing profits from jobbers who have successfully handled an article of such universal utility, indicates a volume of business of unsuspected proportions following up a distribution founded on business methods and not left to haphazard attention in a half-hearted way.

## The Export Record of 1901.

The export record of the calendar year 1901 is very satisfactory when its total is compared with that of 1900, or of any preceding year. While the apparent total falls about \$12,-000,000 below the figures of 1900, the fact that the export figures of 1901 do not contain any of the shipments from the United States to Porto Rico or Hawaii, which aggregated probably \$30,000,000, shows that the grand total of shipments formerly classed as exports to foreign countries was in the year 1901 greater than in any preceding year. While there was a reduction of \$100,000,000 in the value of exports of certain great articles, notably corn, copper, cotton and iron and steel, there was a sufficient increase in other articles, notably wheat, flour, provisions and cotton manufactures, to practically offset this reduction. The reduction in exports of corn, as is well known, was due solely to the great shortage in the corn crop, the total figures of exports for the year being but \$50,361,388, against \$84,284,733 in 1900, a reduction in round terms of \$34,000,000. In cotton, while there was an increase of 155 million pounds in the exportations, there was a decrease of 13 million dollars in value. Of-copper, the exportations in 1901 were \$33,534,899, against \$57,542,610 in 1900, the decrease in quantity being proportionately about the same as that in value. In iron and steel there was a reduction of 27 million dollars, the export figures for 1901 being \$102,539,797, and in 1900, \$129,633,480. This reduction in iron and steel exports was partly due to reduced prices, and partly to a decrease in quantities exported. In locomotives

the number exported showed an actual increase, while the value showed a decrease of about \$400,000. In various other manufactures of iron and steel the reduction in value was proportionately greater than the reduction in quantity, but there were material reductions in quantity in certain articles. Bars or rods of steel fell in exportations from 106 million pounds to 79 million pounds; steel rails, from 356,245 tons to 318,055 tons; wire nails, from 61,385,843 pounds to 42,050,602 pounds; and steel sheets, from 101,995,225 pounds to 53,588,-154 pounds. Tin plate showed a material increase in exportations, though the quantity is as yet comparatively small, being in 1900, 612,251 pounds, and in 1901, 983,383 pounds. Wire showed an increase from 174,751,042 pounds to 197,651,-789 pounds. Another indication that the reduction in the value of exports is due quite as much to a fall in prices as in quantity is found in the fact that while the quantity of refined mineral oil exported showed an increase of nearly 100 million gallons, the value showed a decrease of about \$1,000,-000; the total exportations of refined mineral oil in the year amounted to 924,198,170 gallons, against 828,945,305 gallons in 1900; while the value in 1901 was \$65,492,359, against \$66,-307.621 in 1900.

The five principal articles which show a decrease are corn, iron and steel manufactures, copper, cotton, and mineral oils; and of these cotton and mineral oils both show an actual increase in quantity, though a decrease in value. This aggregate of practically \$100,000,000 reduction in the exports of these five articles is nearly offset by the increase in exports of wheat, provisions, live animals and cotton manufactures, cotton seed oil and oil cake, and leather and manufactures thereof. Add to this the further fact that the shipments to Hawaii and Porto Rico aggregated probably fully \$30,000,000, and the record of 1901 will compare favorably with that of any preceding year.

The distribution of this large total, really the largest total of shipments ever passing out of the country, shows an increase everywhere except to Europe. The exports to Europe for 1901 were about 17 million dollars less than in 1900; to North America, there is an increase of about \$1,000,000; to South America, an increase of about \$1,000,000; to Asia about a million dollars; to Africa, six millions, and while the official figures of exports of Oceania fall four millions short of those of last year, the fact that none of the shipments to Hawaii are included this year and that about  $7\frac{1}{2}$  millions to Hawaii were included in 1900, in the figures of exports to Oceania, shows that the actual shipments to Oceania in 1901 were in excess of those of 1900 or of any earlier year, since there is every reason to believe that the shipments to the Hawiian Islands alone exceeded \$20,000,000 in the year 1901.

## Death of Charles Parker.

Charles Parker, president of the Charles Parker Co., Meriden, Conn., died at his home in that city Friday, January 31. He was a member of the First Methodist Episcopal Church, from which he was buried on the Sunday following his death. Mr. Parker was in his ninety-fourth year, and until recently was in unusually good health for one of his advanced age. He retained his mental faculties in good condition until just before his death.

Charles Parker was born in Cheshire, Conn., January 2, 1809, and as early as 1828 was manufacturing coffee mills in Meriden, going in business on his own account in 1829. Mr. Parker's business ability was constantly progressing, having had a number of experiences during the intervening year, when in 1844 he supplanted the water power of his factory by steam power, and largely increased his facilities thereby. He was the first manufacturer of plated spoons and forks and plated hollow ware in Meriden.

The Charles Parker Co., or corporation, was formed in 1877 and other plants, such as Parker Bros., manufacturers of the

Parker shotgun; the Meriden Curtain Fixture Co., and the Parker Clock Co., were all controlled in the Parker interests. The Charles Parker Co. also manufacture at East Meriden cabinet locks, tea, table and basting spoons, and at Yalesville coffee mills, piano stools and packing boxes. Mr. Parker has long been noted for his liberality in charitable affairs, and in those connected with church advancement, contributing largely toward the erection of the church from which he was buried, having given the congregation the lot on which the church was built. With the exception of the office of mayor of Meriden, to which he was elected when the city was incorporated, Mr. Parker steadily declined to accept office.

Mr. Parker was married October 6, 1831, and had ten children, the youngest son, Dexter Wright Parker, graduating from West Point in 1870. He and his sister, Mrs. William H. Lyon, are the only children who survive.

William H. Lyon, Mr. Parker's son-in-law, for several years past has borne the responsibilities of the business. arising from so many industries, and has been remarkably successful in his management, which has been a very prosperous one.

## E. C. Atkins & Co.'s New Catalogue.

E. C. Atkins & Co., Indianapolis and 64 Reade Street, New York, have recently issued a fine complete catalogue of their Saws, Saw Tools and Mill Specialties, which is regarded as the Hardware Edition of their product. A glance over the volume shows a number of changes that have been made in their line since last year. Among the numerous additions will be found the following: Metal milling saws, not hollow ground; metal milling saws for Bryant & Highey machines; lathe saws; inserted tooth circular saw, No. 4 short holder pattern; inserted tooth circular saw, No. 3 short holder pattern; double edge band saws; narrow band saws, with beveled backs; "Hemlock King" cross-cut saws; "Mohawk" cross-cut saws; narrow "Victor" cross-cut saws; "Cedar King" one-man saws; "Tyee" cross-cut saws; "Star of the West" cross-cut saws; "Howatson" cross-cut saws; Auckland tabs for cross-cut saws; common ears for cross-cut saws; No. 12 cross-cut sawhandles; "Tubular" woodsaws; No. 1900 wood saws; wood saw blades, Nos. 32, 33, 34; hand saws, Nos. 68, 69 and 70; butcher saws, in coils, trowels, for edging cement walks; beef topping knives, and the Queen vegetable slicer.

Particular attention is called to several additions to their line of cross-cut saws; also small goods.

They also manufacture the improved Criterion Saw Set, which possesses a pointed die which adapts it to any size of tooth. The saw set is made of the best refined malleable iron, and handsomely lacquered. The die and anvil are dropforged from the finest tool steel, properly hardened. catalogue is well illustrated throughout, printed on coated paper in blue, and the natural color of the saw frames where wood saws are shown is also indicated in color. An excellent telegraph code accompanies the catalogue, which will enable the dealer to send rush orders at a limited amount of expense. Included in its contents is a view of their works and branch houses, the several medals that have been obtained from all the Expositions at which they have made an exhibit, from the Centennial to the Pan-American; also their registered trade marks. Altogether it is an important catalogue, and should be requested if not already received.

The booklet also contains a variety of technical information, and covers a table of speed of circular saws, rules for calculating the speed of saws, pulleys or drums, standard price list of emery and corundum wheels, standard price list of leather and rubber belting, price list of files and rasps adopted by the File Manufacturers' Association of the United States.

Fight life's battle bravely, manfully.

## LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privilege d to ask any legal question he pleases in this Department and it will be answered fre of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

## Individual Liability of Director.

QUESTION: For a number of years past I have been a director of a corporation organized under the general corporation law of 1892 in this State. The business of the corporation has not prospered of late years and has been somewhat neglected by the directors. I was never an active director of the corporation in the sense of conducting business, but I had invested a good deal of money in the corporation, and was interested in its business, and my name appeared on their books as one of the directors. I understand for the last two years the acting directors have failed to file their annual report. I should like to be informed what, if any liability, I have incurred by their failure to file their annual report.

REPLY: It is provided by the general corporation law that directors of a corporation which has failed to file its annual report shall be jointly and severally liable for all the debts of the corporation incurred during the period to file the report as required by the statute. If, however, you were a director at the time certain debts of the corporation were incurred, and the corporation failed to file its annual report, you would be individually liable for the debts of the corporation, and the creditors would be at liberty to either single you out and collect the amount of their judgment from you in full, or they could bring an action against you and the other directors and obtain personal judgments against each director made a party to the action.

### Contract to "Satisfy" Party.

QUESTION: Some time ago I entered into a contract with an artist, by which contract he agreed to paint my portrait for me at the price of \$100. The portrait to be to my satisfaction when completed. The artist completed the portrait which he informed me was a portrait of myself, but which in my opinion was extremely poorly done, and I, therefore, refused to accept the portrait or to make him any payment on the contract referred to. He threatens that unless I pay him the amount of \$100 he will at once institute suit against me to recover the same. Kindly advise me whether I am obliged to pay this sum or not.

REPLY: We are of the opinion that on the state of facts before us, if in good faith you were not "satisfied" with the portrait when it was completed, that you would not be obliged to accept it and pay the agreed price therefor. Generally speaking, there may be said to be two classes of cases in which the question as to whether or not a person has fulfilled a contract to the satisfaction of another arises. One class is where a person by his contract agrees to do some work which appeals to the personal taste or sensibility of the individual with whom he contracts, and the other class of cases, in which he contracts to perform some work which is capable to be shown by mechanical demonstration to be a properly completed work. We are of the opinion that the case before us comes under the first class, and in such cases, if in fact the party is not satisfied with the work, he may reject it and is not liable on the contract. As to the other class of cases, we have several decisions in the State of New York holding that if the party should in reason be satisfied with the work performed, and it can be demonstrated that the work is properly done, the law will presume him to be satisfied, and he will be liable for the contract price. The decision of the Massachusetts Courts upon this subject seems to indicate that even in matters of mechanical appliances, if the party is acting in good faith, and declares that he is not satisfied, the contract cannot be enforced against him.

## Insurable Interest in a Person's Life.

QUESTION: Kindly inform me whether I can take out a valid insurance on the life of any person whom I may select. A man of about thirty years of age is my debtor to the extent of about \$3,000, and he has agreed to allow me to take out an insurance policy on his life if I will defer the collection of my claim until his death. Kindly advise me whether this would be a valid agreement.

REPLY: In answer to your question as to whether or not you could take out a valid policy of insurance on the life of another person, we would answer in the negative. A person cannot take out insurance on the life of another person unless the person taking out the policy has some insurable interest in the life of the person to be insured. It has been held that a child has an insurable interest in the life of a parent, and it has also been held that a creditor has an insurable interest in the life of his debtor. We are, therefore, of the opinion that the arrangement which you suggest as to your debtor, and as to your holding a policy of insurance upon his life, would be valid.

## Missouri Retail Stove and Hardware Dealers' Association.

The Missouri Retail Stove and Hardware Dealers' Association will hold their annual convention at St. Louis Feb. 18 and 19, 1902. They will make their headquarters at the Lindell Hotel and the place of meeting will be at the Mercantile Club rooms, Seventh and Locust Streets, in that city. A fare of one and a third has been secured from the Pennsylvania Railroad, date of sale Feb. 15 to 21, good to return up to March 1. Parties attending meeting should buy ticket to St. Louis and secure certificate from agent, which when signed at St. Louis by the secretary of the association, will insure a return ticket at one-third fare. The St. Louis dealers have appointed a committee on arrangements, consisting of F. A. Kansteiner, August Steinmeier and G. A. Pauley, to make arrangements for the forthcoming gathering.

The following excellent programme has been arranged:

TUESDAY.

Meeting called to order at 10 a. m.

President's address.

Secretary's report.
Paper—"Association Loyalty," Taylor Frier, Louisiana.

2 р. м.

Address, M. L. Corey, Secretary National Retail Hardware Dealers' Association.

Paper—"Are Retailers Adjusting Their Methods to Twentieth Century Conditions?" H. F. Wright, Lebanon.

Paper-"Is Cooperative Buying Practical?" Aug. Steinmeier, St. Louis.

Question box.

Executive session.

WEDNESDAY.

Paper—"Store Character, or the Value of a Business Reputation," Louis Herring, Blackburn, Mo.

Address-R. W. Shapleigh, ex-president of the National Hardware Association.

Election of officers.

Resolutions.

2 р. м.

Co-operative Insurance—General Discussion.

News from the field.

Paper--"Evolution of the Hardware Business-1850-1901," William Kansteiner, Hannibal.

Executive session.

## New England Hardware Dealers' Association.

The annual meeting of the New England Hardware Dealers' Association will be held at the Quincy House, Boston, on Wednesday, Feb. 12th, promptly at 5 o'clock p. m. Dinner will be served at 5:30 o'clock p. m. The business meeting will take place immediately after the dinner.

There will be an election of officers. No special speakers have been invited. The subject of discussion will be "The Outlook of the Association." Several prominent speakers will express their views.

Nominating committee: Samuel H. Thompson, Lowell: Edward A. Loomis, Providence, R. P.; William D. Parlin, Natick; Henry M. Sanders, Boston; Anthony S. Morss, Bos-

Entertainment committee: E. Loring Richards, Boston; Calvin M. Nichols, Dorchester; James F. Mackay, Brookline.

## The North Dakota Retail Hardware Associatino.

The programme of the Fifth Annual Meeting of the North Dakota Retail Hardware Association, to be held at Fargo, N. D., February 19 and 20, has just reached us, and we present the details herewith. It is very evident that the meeting will prove to be one of the best ever held by this progressive Association. The Souvenir Programme issued by C. N. Barnes, the indefatigable secretary, is a magnificent affair, one of the most ambitious we have seen, containing as it does revised lists of the various State Associations and portraits of many of the prominent officers, which must have taken a great deal of industrious and painstaking application to bring to so successful an issue. The following is the programme in detail:

> WEDNESDAY, FEBRUARY 19. Morning Session, 10:00 A. M.

Payment of Dues.

Address of Welcome, by Mayor Johnson.

Response by President H. T. Helgesen. Roll Call of Members.

Enrolling of New Members.

Appointment of Committees.

Question Box Discussions.

Afternoon Session, 2:00 P. M.

As much of this session as may be desired will be devoted to the Jobbers, Manufacturers, and their traveling salesmen, for discussion on matters of mutual interest.

Enrollment of New Members and Payment of Dues.

Paper, "Fakes and Fakirs, or Leg Pulling," by H. B. Allen, Jamestown.

Jobbers', Manufacturers' and Traveling Salesmen's Dis-

cussions.

Paper, "Some Difficulties Hardware Dealers Have to Contend With," by H. F. Emery, Fargo.

Question Box Discussions.

THURSDAY, FEBRUARY 20.

Both Sessions this day for Members only.

Morning Session, 10:00 A. M.

Payment of Dues.

President's Report.

Secretary's Report.

Treasurer's Report.

General Discussions.

Afternoon Session, 2:00 P. M.

Report of Nominating Committee.

Election of Officers.
Paper, "One Way to Compete with Supply Houses," by

O. A. Gallup, Edgeley.

Paper, "Dealers' Associations, Their Effect and What They May Accomplish," by Jas. McPhail, Langdon.

Paper, "The Practical Hardware Man," by L. B. Hanson,

Sheldon.

Reports from Other Committees.

Question Box Discussions.

Adjournment.

## Minnesota Retail Hardware Association.

Secretary Thomas McCracken, of the Minnesota Retail Hardware Association, has made public the programme for the annual meeting to be held in the Ryan Hotel annex, St. Paul, Feb. 26, 27 and 28. Merchants will see by a careful perusal of the programme that many good things are in store for them if they can find the time to attend this meeting. A number of able papers will be read at that meeting, and there will be many other interesting features.

It will afford a vacation period at a time of the year when the merchant can leave his business under the most favorable of circumstances and will freshen up his mind for the activity consequent upon a heavy Spring trade.

A fare of one and a third is made to all merchants attending this convention over all railroad lines in the State of Minnesota. A merchant purchasing a ticket to the convention at St. Paul should secure a certificate from his local ticket agent and upon presentation of this certificate at the convention hall it will be duly certified and will be good returning at one-third the regular fare. Tickets sold under this plan are good for three days previous to the opening of

the convention and three days following adjournment. This makes them good for nine days all told, and dealers coming in to visit their local jobbers or to carefully investigate the situation will have plenty of time in which to look after these outside matters as well as attend the convention.

Secretary McCracken is at work on a souvenir programme which will be issued to members and which is intended to be one of the finest ever gotten out by an association in the United States. This programme is already in the hands of the printer. It contains the following:

WEDNESDAY, FEB. 26.

11 a.m. Meeting of executive committee.

2 p. m. Roll call. Address of Welcome, Mayor Smith, of St. Paul.

Response, A. T. Stebbins, of Rochester.
Remarks, ex-President P. E. O'Brien.
Paper, T. T. Bacheller, "Possibilities of Trade Organization.

Announcement of committees:

On insurance, on resolutions, on grievances, on press.

Secretary's report.

Treasurer's report.

Voluntary remarks by members.

THURSDAY, FEBRUARY 27.

9 a. m. For members only.

Payment of dues (20 minutes).

Election of officers.

Report of Committee on Resolutions.

Talk on Insurance, President C. A. Hatch.

Papers by members.

New business.

### AFTERNOON SESSION.

2 p. m. Open meeting.

Paper by P. W. Lyon, Minneapolis, "The Three Essentials."

Paper on "Advertising," by M. DeMotte, St. Paul.

Opening of question box—discussion.

Report of committees.

Banquet, Ryan Hotel, evening Feb. 27, 8 p. m.

FRIDAY, FEBRUARY 28.

9 a. m. Open meeting.

Question box.

Remarks by jobbers and manufacturers.

Remarks by members of press.

Remarks by traveling men.

Next meeting of the association.

Adjournment.

The afternoon will be given to visiting points of interest in the city.

## Tribute to the Drummer.

The Philadelphia Times said, editorially: "It is not the nicest word in the language, but the drummer seems to fit the man who is after business, and with Americans who like to save time, it is preferable to the commercial traveler. It is better than promoter, because, whether justly or unjustly, we need not discuss, a promoter is generally considered as one who is after more than a legitimate profit transaction. The drummer gives values for favors received. And he does a great deal more than that. He is the best agent of our modern civilization. He is the missionary of enterprise and the promulgater of knowledge. He stimulates laggard communities, supports the world's hotels, saves the railroads from annual bankruptcy, distributes the newest facts and keeps old stories moving. There is in his speech some of the best action of the times. He seldom hedges. He wastes little time. He goes to the point. He has purpose. The world's professional orators might sit at his feet with profit. And if he could make his methods prevail in England the pictures of the House of Lords and the House of Commons would not show two-thirds of the members napping while some honorable gentleman has the floor.

The first daily morning newspaper was the Daily Courant, London, 1709.

## One of the Most Important American Industries.

The factory of the Bissell Carpet Sweeper Co., who in 1901 closed the largest year in the history of their business, report the opening of 1902 as being even more promising. They state that the month of January this year was the heaviest by far of any January in their history. The result of their sales at both the Grand Rapids Furniture Exposition and the New York Furniture Exposition just closed has been very gratifying.

The Bissell Co., which claims to be the largest concern in the world, manufacturing carpet sweepers exclusively, was founded by M. R. Bissell in 1876. In 1884 the entire plant was swept by fire, with a loss of \$150,000. While the plant was still burning Mr. Bissell rented a small factory, and in the afternoon of the same day of the fire men were at work cutting lumber for Bissell sweepers. Nineteen days after the fire they commenced shipping again and worked two crews, running twenty-four hours a day for several months. The factories to-day contain over 156,000 square feet of floor space, or about three and a half acres, and over four hundred people are employed. The capacity of the plant per day is three thousand regular domestic-sized sweepers and four thousand

## HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JAN. 27, 1902.

311,198. Automatic Weighing Scale, P. Morrison, Maquon, Ill.

311,202. WRENCH, W. L. Parker, assignor one-half to E. McDowell, Spartanburg, S. C.

311,241. Saw Vise, H. Flater, assignor one-half to W. Carlin, Findlay, Ohio.

311,248. Calipers, S. A. Jellett, Philadelphia, Pa.

311,288. SASH FASTENERS, W. Brown, Duncannon, Pa.

311,307. Door Spring, W. Gillfillan, New Haven, Conn.

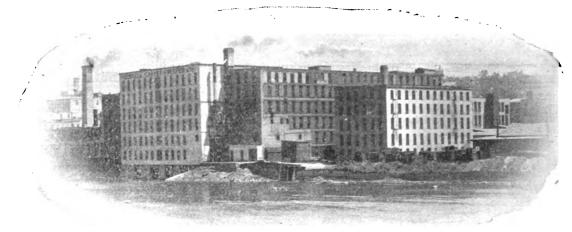

311,308. COMBINED TWEEZERS AND SCREW DRIVER, C. E. Glessner, Boulder, Colo.

311,435. Saw, A. Lord, assignor to W. H. Hankin, Brooklyn, N. Y.

PATENTS ISSUED JAN. 28, 1902.

691,757. LEAF HINGE, W. M. Gamble, Chicago, Ill.

691,758. Sprinkling Attachment for Hose Nozzles, G. Gay, Spokane, Wash.

toy sweepers, or five regulars and six and a half toys per minute for ten hours per day. A Corliss engine of three hundred and fifty horse-power, supplemented by water power equivalent to 100 horse-power units, furnishes the power. company has its own electric lighting plant, with a capacity of twelve hundred lights, 16 candle power. They are the largest consumers of 23/4-inch bristles in the world. To make the brushes used in Bissell sweepers annually it requires the entire product of 10,000,000 hogs. This many hogs standing in line one after the other would reach half way around the earth. It is claimed by the company that over 85 per cent. of the world's output of regular-sized sweepers and over 98 per cent. of all the toy sweepers are represented by their product. The automatic machines used in the Bissell factory, and which have been designed and built by their own mechanics are a great source of interest and pleasure to the hundreds of dealers who visit them annually. The Bissell company have their own large well equipped printing offices in Grand Rapids and London, where they turn out some of the finest specimens of the printers' art. Bissell sweepers have taken awards and medals for superiority in all the leading expositions that have been held from 1884 down to the present time, including the last two Paris Expositions and the Pan-American Exposition, at which gold medals were awarded them. As well as the Bissell Co.'s home office and factory, located in Grand Rapids, Mich., they have a branch office and warerooms in New York City; London, Eng.; Paris, France, and Toronto, Canada, with additional branch factories in Toronto, Canada, and Paris, France. The officers of the company are: Mrs. M. R. Bissell, president; T. W. Williams, vice-president; R. E. Shanahan, secretary; Maurice Shanahan, treasurer; F. M. Deane, cashier.

691,801. KETTLE OR DISH SCRAPER OR CLEANER, W. Palmer, Canton, Ohio.

691,811. PRUNING SHEARS, C. W. Reed and H. Hakel, Hood River, Oregon.

691,838. Spring Hinge, M. C. Bersted, Chicago, Ill.

691,867. CAN OPENER, P. E. Law, Wilmette, Ill.

691,965. COMBINED DUST PAN AND BROOM HOLDER, J. Ormsby, Bolton Landing, N. Y.

PATENTS EXPIRED JAN. 20, 1902.

310,873. Toy Spring Gun, M. Bradley, Springfield, Mass.

310,892. PERMUTATION LOCK, C. Hill, Los Angeles, Cal.

310,959. Tool Handle, W. Nunley, Newark, N. J.

310,983. SASH HOLDER, F. Burmeister, Cleveland, Ohio.

311,077. Roller Skate, A. L. Kitselman, Ridgeville, Ind.

311,136. BENCH PLANE, C. L. Mcad, New York, N. Y.

PATENTS ISSUED JAN. 21, 1902.

691,348. Sash Lock and Lift, T. Berquist, St. Croix Falls, Wis.

691,410. Toaster, B. K. Schmertz, Pittsburg, Pa.

691,419. LAWN SPRINKLER, A. Vandervoort, Belleville, Canada.

691,520. LATCH, G. E. Ballard, Philadelphia, Pa.

691,651. Spring Hinge, M. A. D. Kincaid, Dallas, Texas.

## Death of William F. Herre.

William F. Herre, buyer and stockholder for the firm of Morley Brothers, Saginaw, Mich., died suddenly at that place on Thursday, January 30th, in the forty-fifth year of his age.

Mr. Herre had been in the employ of the above firm for many years, and was highly regarded by all of his associates. His genial personality was well known to the manufacturers and jobbers all over the country.

## HDWE. MERCHANTS' & MFRS.'ASSN. OF PHILA.

The sixteenth annual dinner of the Philadelphia Hardware Merchants' and Manufacturers' Association was held at the Hotel Bellevue on Thursday evening, Jan. 30th, upwards of 100 members and invited guests being present. An informal reception was held in the hotel parlors previous to the dinner by President-elect William C. Peters. The rooms were very appropriately decorated in a striking manner with American flags, evergreens, etc., while the tables were largely decorated with roses, carnations and ferns. In addition a large number of souvenirs were noticeable, which had been furnished by a number of the leading concerns in Philadelphia, among which may be mentioned Henry Disston & Sons, Enterprise Mfg. Co., of Pa., G. & H. Barnett Co., North Bros. Mfg. Co., Thomas Devlin & Co., McCaffrey File Co., Star Lock Works, Miller Lock Co. and Sheble & Klemm. An exceedingly attractive menu card was one of the features of the occasion, exhibiting considerable skill and novelty of design in the getting up of the same. It was folded together and fastened with a hasp and a spring lock, which required some little ingenuity to open. The outside cover indicated a door, from which a turkey was suspended, and a small nickel-plated hatchet adorned the cover on one side. At the top, embossed, was the inscription "Sixteenth Annual Dinner of the Hardware Merchants' and Manufacturers' Association of Philadelphia, Thursday evening, January 30, 1902, Hotel Bellevue."

The places at the speakers' table were occupied by the following:

Fayette R. Plumb, John R. Griffith, Thos. Hobson, Ellicott Fisher, Jas. H. Ritter, Samuel Disston, John Sparhawk, Jr., William C. Peters, T. James Fernley, Rev. J. R. Davies, D. D., Chas. B. Adamson, H. B. Lupton, Chas. M. Biddle, Thos. Devlin, T. Henry Asbury, Irby Bennett, A. Eugene Bolles.

The remainder of the members and guests filled the other tables. In the absence of the retiring president, Hugh McCaffrey, Secretary-Treasurer T. James Fernley presided. Rev. John R. Davies, D. D., pastor of the Bethlehem Presbyterian Church, was called upon to open the proceedings by invoking the Divine blessing. Mr. Fernley was unimitable in his role of president. He read the honor roll of the past presidents of the association, and then introduced the next, William C. Peters, of James M. Vance & Co. He was received with long-continued applause, and the singing by those present of "For He is a Jolly Good Fellow." Mr. Peters responded to the remarks of Mr. Fernley by an address, from which we make several extracts:

## PRESIDENT PETERS' ADDRESS.

Fellow members of the Philadelphia Hardware Merchants' and Manufacturers' Association: To you I desire to express my appreciation of the honor you have done to me in electing me to the office of president.

ing me to the office of president.

The pleasure arises from my appreciation of you, fellow jobbers; from my esteem of you and the friendship we have for each other, much of which is due to the years of intercourse in our association, and from my high regard for you, manufacturers, whose business and names are so well and favorably known throughout our broad land, and who have made a splendid reputation for Philadelphia made tools. I remember you in your early days—your humble beginnings—and have watched your growth to the magnificent developments of the present.

The United States limits have not been a limit to some of you, but, sweeping across the seas, you have entered foreign lands and challenged for merit, utility and adaptability the long established products of Europe. Many years before the present era of our extraordinary efforts in exports some

of you were quietly (Philadelphia-like) pushing out and planting your business in Europe, also to South America and the Orient. To you, therefore, is due high honor as successful pioneers.

Therefore the honor of being your president is a reflected honor, belonging not so much to one whom you choose to fill the office as to the worth, the ability and the persevering enterprise of the membership.

Our association is unique, for it is not of merchants only or of manufacturers only, but comprises both merchants and manufacturers. This is an annual combine. Our mutual contact and the expression of ideas from our opposite standpoints has broadened our views, has made us more considerate of each other and wiser in our methods, and furnished a good example of "how good it is for opponents to meet together in unity."

The address of Mr. Peters was received with every demonstration of approval, and he then introduced the vice-president-elect, Thomas Devlin, who expressed his great pride in having been elected vice-president of the association, thoroughly appreciating the fact of his membership in the same, and feeling that it was one in which manufacturers and jobbers could meet in social intercourse and beneficial results invariably follow. Letters from invited guests and others were read, in which their unavoidable absence was referred to, among which were Samuel H. Ashbridge, mayor of Philadelphia; W. W. Supplee and R. R. Williams, editor of the Iron Age. After the reading of these letters by the secretary, the Rev. John R. Davies, D. D., responded to the toast "The Ministry of Merchandise" in an exceedingly interesting address, which was listened to with attention by those present, and very appreciatively applauded.

The toast "Balancing the Books," was responded to in an excellent speech by John Sparhawk, Jr.

Fayette R. Plumb, president of the American Hardware Manufacturers' Association, then delivered an address on the subject of "The Advantages of Associated Effort," speaking substantially as follows:

MR. PLUMB'S ADDRESS.

The old saying that "In union there is strength," has been fully demonstrated by this association; the results have been most marked; the Boston Hardware Association was the first to follow in our footsteps; then came the New York State Association; the Southern Hardware Jobbers' Association; the National Hardware Association; the local State associations, and last, the American Hardware Manufacturers' Association. All of these that have been in existence for any length of time have been of great service to those who are members. This applies particularly to the jobbers and retailers, especially so because the parent organization, composed of those who are present here this evening, is the only one that includes in its membership merchants and manufacturers.

MANUFACTURERS' INADEQUATE PROFITS.

It seems a great pity that manufacturers who are as intelligent and progressive as those engaged in producing the beautiful wares that adorn the magnificent buildings which are daily going up around us on every side, and who furnish the tools that are used by the best mechanics in our midst, should not receive a satisfactory return for their labor.

I boldly and positively assert that with a few exceptions such is the case. While I do not wish to convey the impression that the manufacturers are making no profit, I do claim that it is infinitesimal when we consider present conditions.

Look the country over from Maine to California and from the Great Lakes to Texas, and what are the conditions that confront us? This is a question easily answered. Unexampled prosperity in every hamlet, village and city on the entire continent; a demand unprecedented in our history; a development beyond the dreams of the most sanguine; a condition that would warrant the independent action of every manufacturer, and yet they falter; why? Because they are afraid of each other, notwithstanding the fact that their business judgment warrants them in the belief that they should have better returns for their products.

The improvements in machinery for our factories have been fully as great as the improvements in the rolling mills and furnaces, and if we had followed their methods of marketing our product the results, while perhaps not as great, would have been much more satisfactory.

THE NEEDED REFORMS.

We hope and believe that the reforms which the Executive Committee of the American Hardware Manufacturers' Association may recommend and the membership suggest will tend to correct these conditions to a great extent.

tend to correct these conditions to a great extent.

Brief addresses were also made by Irby Bennett, Merle
Middleton and A. Eugene Bolles, the entertainment of the
association being brought to a close by the singing of "Auld
Lang Syne" by all those present.

The committee in charge of the banquet consisted of Harry C. Disston, chairman; Walter E. Devlin, C. W. Asbury, Edward S. Jackson and J. H. Van Newkirk.

The proceedings were enlivened during the course of the evening by several vocal selections which were rendered in an admirable manner by Anne Elizabeth Kelley, contralto, accompanied by Ella C. Fitzpatrick, Eugene M. Tyrell, tenor; Thomas F. Hogan and James H. McCool, barytones.

## Ohio Hardware Association.

The Ohio Hardware Association will hold its eighth annual convention at the Great Southern Hotel, Columbus, Feb. 25, 26 and 27. The following interesting programme has been announced:

In Memorial.

Tuesday Evening, 8 O'clock.

Musical entertainment given by the Hardware Dealers of

Columbus.

Appointment of Committees on Resolutions, Nominations,

Question Box, Laws Relative to Hardware Trade,

Wednesday Afternoon Session, 2 O'CLOCK.

Address—"The Traveling Man"...................J. H. Smith
Of Smith Bros. Hardware Co.
Question box.

Address—"Honorable Success".................C. W. Jewell

THURSDAY MORNING SESSION.
Report of Grievance Committee. .W. P. Bogardus, Chairman

Address—"Some Hardware Don'ts".......F. A. Powers Report of Committee on Insurance..G. V. Guyton, Chairman

THURSDAY AFTERNOON SESSION.
Report of Committees on Resolutions and on Nominations.
Unfinished Business.
Election of Officers.
Selection of Place of Next Convention.

## Pacific Retail Hardware Association.

The annual meeting of the Pacific Retail Hardware Association was held on the 15th and 16th inst., at Nevada City, Cal. The gathering proved to be a pleasant and profitable one. A good representation of the membership was in attendance. Among the papers read at the meeting were: "Reciprocity in Trade," by Oscar Schulze of Dixon; "The Social Side of Business Life," by A. F. Brady, of Grass Valley; "Credits and Collections," by Thomas B. Gibson, of Woodland.

A number of jobbers and their representatives were present by invitation at the afternoon session on the 16th inst. Most of the former officers were re-elected for the coming year, as follows:

John C. White, Marysville, president. Oscar Schulze, Divon, vice-president. William Earll, Chico, treasurer.

R. W. Boyd, Marysville, secretary.

T. B. Gibson, Woodland, member executive committee.

A. F. Brady, Grass Valley, member executive committee.

It was decided to hold the next annual meeting at San Francisco. On Thursday evening a fine banquet at the National Hotel was tendered the association by the Hardware merchants and business men generally of the city. Over 100 covers were laid and the occasion proved most enjoyable. Judge F. T. Nilon presided as toastmaster. The following toasts were responded to: "The Association," Oscar C. Schulze; "Co-operation," Mon. E. M. Preston; "The Steel Industry of the Pacific," A. L. Scott, of San Francisco; "The Future of San Francisco," Andrew Carrigan; "Uncle Sam Abroad," A. C. Rulofson.

## St. John Iron and Hardware Association.

The annual dinner of the St. John Iron and Hardware Association took place at the Union Club, St. John, N. B., on the 22d ult., and was a brilliant affair. The tables were handsomely decorated and an orchestra was present and furnished excellent music during the evening. The menu was handsomely gotten up in old English style in red, black and gold. It was in the shape of a folder and tied together with ribbon to match. President S. Hayward occupied the chair and proposed the first toast of the evening, "The King," which was responded to by the singing of the national anthem. The president then proposed the toast of "Our Association," which was responded to by W. S. Fisher and W. H. Thorne. Songs were given by Wm. Greig and John Keefe. P. McMichael, vice-president, proposed the toast to "Our Sister Associations," which brought speeches from Mr. Foster, Mr. Bacon and Mr. Morris. W. S. Fisher proposed the toast to "The City of St. John," and this was responded to by Mayor Daniel, Alderman Robinson and W. M. Jarvis, president of the Board of Trade. J. P. McIntyre favored those present with a song. He was followed by M. E. Agar, who proposed the health of "The Iron and Hardware Manufacturers." This toast was replied to by P. McMichael, R. B. Emerson, W. O. Purdy, J. S. Neill and John McAvity. The toast to "Our Guests" was proposed by Vice-President P. Mc-Michael and responded to by George Robertson. George Mc-Donald proposed the health of "The Ladies," and James Harrison, Mr. Forter Mr. Foote and W. H. Thorne responded. The dinner was brought to a close with the singing of "Auld Lang Syne."

## OUR BRITISH LETTER.

(By our Special Correspondent.)

London, February 1, 1902.

The year has opened with a steady, although not very brilliant outlook as regards British commerce in Hardware and kindred trades. Business in London is quiet, yet some activity in tools is reported. There are indications of an advance in the price of American tools and merchants have placed good forward orders accordingly. Birmingham Hardware manufacturers report increasing business with South America and Canada, and several large Australian orders have been received. The retail trade in the Manchester district is not over brisk, but there are signs of activity among electrical engineers and tool makers.

The retail ironmongers in Manchester and Liverpool have been busily engaged during the past month in the formation of a County Federated Association to consist of the local ironmongers' associations of the district. A strong county association has been formed which, it is hoped, will strengthen the hands of the existing associations, help in the formation of others, and assist the work of the Central Board of the Ironmongers' Federated Association.

A very interesting paper on "American Workshop Methods in Steel Construction" was read at a recent meeting of the Institution of Civil Engineers (London) by H. B. Molesworth. He noticed the fact that many recent contracts for steel work had been secured by American firms, and also mentioned that the actual cost of labor, although individually higher, was less because of the greater quantity of work turned out. The time limit, often a bugbear to British manufacturers who are restricted in their hours of labor, is overcome in America by works running day and night. The author in summing up the cause of cheap working in the United States remarked on the clever arrangement of American works and the laborsaving appliances employed. Another important fact referred to was that science in every form is now brought to bear upon the possibilities of increased output. Superior drawing instruments make plans extremely accurate and enable work to be gauged and regulated, automatic machinery being largely employed. Railway freights are lower in the States than in England, and so manufacturers are helped in the transit of their goods to the seaboard. Such statements are interesting and satisfactory to Americans and should prove useful object lessons to British manufacturers, especially to those who are in a position to take part in the export trade between Great Britain and the United States.

America continues to hold her own in those lines of industrial trade in which her manufacturers have made a determined stand and for the production of which they have specially laid themselves out. Some recently published statistics dealing with the export of sewing machines show that America runs Germany close in the number she sends away, and from a recent issue of a German trade paper she is a thorn in the sides of the makers of sewing machines in that country. One of the recent legislative acts of the French Government is to add the monopoly of petroleum to its other commercial enterprises. This will cause the consumer to pay an increased price for its burning oil, and if this can be gauged by other French State monopolies, without any corresponding advantage to ratepayers. Generally speaking, Great Britain maintains her position in reference to both the volume and value of her trade with France. In the report by Consul-General Inglis, recently published, the imports of that country for 1900 amounted to £187,912,000, and the exports to £164,348,000. In volume the British share of the imports was 30.93 per cent. and in exports 21.76 per cent.; in value, the British share of the imports was 14.31 per cent. and of the exports 29.81 per cent.

A recent accident to the water mains in Madison Avenue, New York, owing to the reported weakness of the iron pipes used has caused some inquiry in this country as to the strength and reliability of American pipes. Several large contracts for these goods have recently passed over the seas, but if these pipes are to be placed in competition with those of English make they must be made to stand the test of the high pressure to which water pipes are often subjected in English towns.

Mr. Roberts, who for the last fifteen years has been engaged in the erection of steel works in Pennsylvania, has recently been consulted as to the best methods of reconstructing the Dowlair and Cardiff works of Messrs. Guest, Keen & Co. They, in common with several other firms in South Wales, purpose bringing their works in line with the latest and best methods of production practised in America. It is reported that as soon as plans have been decided upon alterations involving an enormous outlay will be proceeded with.

It is stated that the representatives of an American steel trust, with which Pierpont Morgan is associated, has arrived here with the intention of buying up the principal British steel manufacturers and so controlling the British steel trade. No amount has been named but many millions would be necessary to carry out so gigantic an undertaking. Some of the leading steel manufacturers here consider that they are quite strong enough to hold their own and resist any pressure that may be brought to bear upon them.

When the Central London Railway was constructed the entire plant, equipment and lifts were purchased for the United States. Some alterations are now being made involving the construction of additional lifts. These are to be supplied by R. Waygood & Co., Ltd., of London, who have secured the contract in competition with American makers.

Although American and Canadian agricultural implements are becoming very popular here they do not always come off best in trials. The recent ploughing trials at Colchester were of an interesting character. The "Kangaroo" and "Kangarookid," both manufactured by the Cockshutt Plough Co., of Brantford, Canada, were played in competition with a double furrow plough made by Ransomes, Sims & Jefferies, of Ipswich, the latter coming off victorious. Ransomes have made a wonderful record. They commenced making ploughs in 1818, and during the years that have elapsed they have built no less than 2,500 different patterns of ploughs, gradually keeping abreast of the times and adding improvement as they were desirable until they claim that their ploughs are used in every part of the world.

## Death of Eugene Dupont.

Eugene Dupont, president of the powder manufacturing firm of E. I. Dupont, De Nemours & Co. died at his home at Christiana Hundred, Del., from pneumonia. He was sixtyone years of age, and was a son of the late Alexis I. Dupont. He succeeded Gen. Henry Dupont as president of the firm after the death of the latter in 1889.

The first book printed by machinery was Blumenbach's Physiology, 1817.—The Country Editor.

## WISCONSIN RETAIL HDWE. ASSOCIATION.

The sixth annual convention of the Wisconsin Retail Hardware Association was held at the Republican House, Milwaukee, on Wednesday and Thursday, February 5th and 6th. At the hour of going to press we are without a detailed report of the entire proceedings, but are provided with the text of the annual address of the president, John Hessel, which is given almost entire.

### PRESIDENT HESSEL'S ADDRESS.

Our association is in a healthy and prosperous condition. We held our own during the past year, although we lost some members by non-payment of dues and some who retired from business. Our secretary's report will show you exactly the number gained and lost. The growth and progress of our association is closely watched by other State organizations. It seems to me that we ought to have enrolled at least 90 per cent. of the retail Hardware dealers of the State. Those that are not yet members ought to be made acquainted with our aims and objects, and what they could gain by becoming members.

In the first place the insurance is quite an item in itself. We are told that we can save at least 35 per cent. on our premiums, which is well worth considering. Right here I wish to say that I believe the Hardware dealers are paying more in proportion to their losses than the dealers in any other line. The merchant who welcomes a fire is not selling Hardware. Our risks are not so dangerous, our goods are less combustible, and yet we have to pay as much as any other line. Why is this? If we work more harmoniously together we can take this up with the insurance companies and try for better rates. I believe that they would hate to loose good customers all over the State just as much as you or I would.

Some may ask what good your organization does you? To this I would say, if it did nothing more than make me acquainted with 150 or 200 men from all over the State I would be amply repaid by that alone. But this is not all. We get together, ask questions, swap opinions, help each other solve knotty problems and "talk shop" in general. Of course if any one who pays \$2 fees expects the association to give him back \$5 he gets left.

An important item that needs your attention is our surplus fund, which ought to be invested or some plan devised to take care of it. It is largely due to our worthy secretary that we are able to show you a very handsome surplus at this time. By his earnest efforts and able management in securing advertisers for our programmes he not only procured a handsome souvenir for us, but also enriched the treasury.

The Executive Committee had one meeting in Fond du Lac last September. We have a broad field before us and a great deal remains to be done.

I understand that there is a bill before Congress called the Parcels Post bill, under which the limit of the amount of matter which can be sent by mail is extended to 200 pounds, and provides that the first 60 pounds be carried for 20 cents and for every additional 20 pounds thereafter, up to 200 pounds, 5 cents additional. This seems to be clearly a catalogue house scheme and this association ought at once to ascertain the truth, and if found to be such should fight it with all its might.

I would recommend for your consideration joining the Northwestern Association as it was a few years ago, providing that we can get it on a reasonable basis or a fair proportionate payment. Our worthy vice-president and Brother Nash may have something of interest to report regarding the National Association.

The able report of the secretary is given in full herewith: SECRETARY PECK'S REPORT.

In presenting my fifth annual report, I am glad to be able to say that I have no discouraging words to bring. The membership of your association is working along harmonious lines and during the year has nearly or quite held its own and, so far as I now recall, there have been no complaints that have not been satisfactorily adjusted. I have yet to come in contact with the first jobber or manufacturer who has not shown a disposition to treat with fairness every reasonable or just complaint.

CONDITION OF THE ASSOCIATION.

We have not accomplished all that any of us desired, but more than some of us expected, and to-day I would not belittle the influence of 300 retailers banded together loyally to accomplish any legitimate end. Our membership at this time is 273, all with dues paid to date and five of whom have paid in advance.

My work has differed but little from that of previous years. I have found enough to do most of the time to keep me out of mischief, and while at times it has been burdensome, it has had its favorable offsets, not the least of which is the cordial support that almost the entire membership have accorded to me.

In detail I would mention that on February 28 I sent out duns to 150 delinquents, and May 22, 100 of these still neglecting, I again reminded them of the fact, but up to October 8, 82 of this 100 had such a rush of trade that they could not attend to it, when, by instruction of your Executive Committee, I wrote again with notice that I would make draft on the 23d of the month if I heard nothing to the contrary. Seventeen of the 82 remitted and I made 65 drafts, as stated, with the result that I found five of the number were out of business, 24 paid the drafts, 24 remitted but refused the drafts, subjecting the association to an expense of 7½ percent. of their annual dues, 31 refused payment without excuse and were dropped from membership, as it was thought that any member not taking a \$2 financial interest in the association was beyond the pale of our benefits and probably out of reach from doing us any good. This loss of 31 was partially made up by the reception of 22 new members, so that to-day we number about the same as a year ago.

I am able to report our finances in excellent shape, as there is about \$1,200 on hand, with no debts outstanding. While there was at one time some talk of a banquet at this session, to be given by the association, it was voted down, for, as one ex-president said, it was better to have a bank than a banquet. I would suggest that it would be a good idea for the present meeting to devise or suggest the best way in which at least a part of this balance may be used in building up the association.

Some will say at once, remit one year's dues, but to this I would enter an emphatic protest, for they are now the lowest of those of any association in the country, and I believe every good member will be more interested in paying his dues than in having them remitted.

As far as I know we have lost by death but one member this year—Charles Kartak, of the Lorleburg Hardware Co., Oconomowoc, who died in October (the fourth I think), and I would suggest that our association take some action upon the same. The elements have been kind to us during the past year, as I believe but one of our number (the Marshfield Hardware Co.) have suffered from fire.

Burglars have not been as considerate, for they called upon friend Seelig, of Ripon, D. G. James, of Richland Centre. Wilkie Hardware Co., of Fond du Lac, and possibly some others, but from results I have an idea that in some cases they found the goods marked so low that they were ashamed

and refrained from dipping in very heavily.

In conclusion, I would add that I am not indifferent to the high honor you have conferred upon me in allowing me to occupy this office from the formation of the association, six years ago, and again desire to return to the membership my thanks for their uniform kindness and co-operation, only adding that if I have said or done anything I ought not to have done, I am either glad or sorry, and it is not quite clear to me which. I trust my services have been so kindly received that they will merit some attention to the request that I kindly, but firmly, make that you now transfer my salary to some better man, who, I trust, may receive the same cordial support from you that you have always accorded me.

## KANSAS RETAIL HDWE. DEALERS' ASSN.

The fourth annual convention of the Kansas Retail Hardware Dealers' Association was held at Kansas City, Kansas, January 16th. The headquarters of the association were in the rooms of the Kansas City, Kansas, Mercantile Club. On account of the illness of President Anderson, there was no pre-arranged program, and the session was occupied principally in discussing the best methods of obtaining a larger membership "getting Hardware dealers in the same town to become better acquainted with each other," and other questions of interest to the Hardware trade.

I. A. Sibley, chairman of the National Retail Hardware Dealers' Association, called while the meeting was in progress and gave a very interesting talk on the History of that Association.

In the absence of President Anderson, Vice-president Oscar Roehr presided, and addressed the meeting as follows:

### VICE-PRESIDENT'S ADDRESS.

Friends and members of the Kansas Retail Hardware Dealers' Association, greeting:

As presiding officer of this convention, the first duty I have is a sad one. It is with extreme sorrow and regret that I announce the severe illness of our president, George Anderson, of St. Mary's, Kansas. Sorrow for a personal friend, and regret that his affliction makes his absence at this meeting unavoidable.

About six months since Mr. Anderson had an attack of paralysis, which left him entirely helpless. I have a recent letter from his son, stating that Mr. Anderson is now unable, and has been for six months, to converse or communicate his ideas in any way; although, I believe that his intellect was not affected in the least by the stroke of paralysis which he suffered.

We congratulated ourselves at the last meeting when we elected Mr. Anderson, that we had in him an officer eminently equipped for the position, and who had the necessary push and energy to put this equipment into practical use for the benefit of the Association. Nor, were we mistaken. It was largely through the instrumentality of Mr. Anderson, as the head of our association, that a bill was introduced in our last legislature, licensing peddlers and venders of certain commodities, the principle item of which, as Hardware men we were interested in—being stoves and steel ranges.

Mr. Anderson, was at the Capitol continually while this bill was being debated, and worked unceasingly until the bill was passed and became a law. Undoubtedly, he had other measures in mind for the benefit of the association which his unfortunate illness prevented him from putting into effect. In his absence to-day we miss a friend and benefactor, therefore, let us all hope for his speedy recovery and ultimate return to active life.

I regret and rejoice that the year just passed has not shown any material increase in our membership. Regret for the association and rejoicing for the cause of this lack of growth. Our Hardware merchants have undoubtedly had a prosperous year, so prosperous, in fact, that they have had all they could attend to with their immediate business, and as a result, interest in association work lagged. The old adage: "Make hay while the sun shines" was never more applicable, for as surely as night follows day, business depression is bound ultimately to succeed an era of prosperity, and it is at such times, when competition grows hard and merchants inclined to become aggressive in various ways, that a strong fraternal association at your back is a mighty satisfactory ally.

Personally, I have received much pleasure and benefit as a member of this association, and have made many friends whom I prize highly. I feel strongly the honor I have in presiding at this meeting, and my only regret is that there is not a larger membership present.

We should have with us to-day at least three hundred members, and this would only be about one-third of the Hardware merchants of Kansas.

During this convention, I will ask for a short session, devoted entirely to the enlarging of our membership. I thank

you for your kind and courteous attention, and now declare the fourth annual convention of the Kansas Retail Hardware Dealers' Association, open and ready for business.

The minutes of the last meeting were read and approved. The secretary's report was then read as follows:

### SECRETARY'S REPORT.

"The past year has been an eventful one, and while the Kansas Retail Hardware Dealers' Association, has not perhaps prospered to the extent of some of the Retail Hardware Dealers' Association, in other States, we may have had more to contend with, as the general verdict is that business has been very good, in Kansas, this past year; which means that the live hardware merchant, has been kept busy, with his immediate affairs, and had very little time to think of what benefits might be derived from an association with other dealers.

Your secretary has to report that not one complaint has been received from any of our members, neither that the wholesale Hardware houses were selling goods to the consumer, nor, that the consumers were not buying good enough from them. Nor has he heard of the Steel Range people peddling their steel ranges throughout the State, as he had the year previous. Perhaps, the bill which our president worked very hard to get through the Legislature, and finally succeeded in getting it to be one of our laws, may have had some effect toward stopping them.

(The text of the bill requiring pedlers to take out a license was then read by the secretary and met the unqualified approval of the members present.)

"I do not hesitate in saying, that this pedler's license bill would not have been passed last Winter had it not been for the untiring efforts of Mr. Anderson, and if it does what we hope and intend it should do the Kansas Retail Hardware Dealers' Association may congratulate themselves; and thank Mr. Anderson that the results of the past year has been by far the best of any so far in our history, and something to be proud of."

The following committee on resolutions was appointed by the chair:

Jas. H. Hamilton, Arkansas City, Kans.; T. H. Kiniry, Beloit; F. W. Bartlett, Kansas City, Kansas.

Committee on resolutions reported as follows:

Resolved, That it is with great sorrow that we learn of the sad affliction to our president, Mr. George Anderson, of St. Mary's, Kans., and extend to him our heartfelt condolence and hope for his speedy recovery.

A vote of thanks to the Mercantile Club of Kansas City, Kansas. We extend our sincere thanks for the use of their very comfortable rooms for our meeting.

The secretary was instructed to send out a circular letter to all retail Hardware dealers in the State, and try and interest them in our association.

The following officers were elected for the ensuing year:

President, Oscar Roehr, Topeka, Kan.

Vice-President, E. J. King, Logan, Kan.

Secretary and Treasurer, J. A. Cole, Topeka, Kan.

Executive Committee, F. W. Bartlett, Kansas City, Kan.; T. H. Kiniry, Beloit; J. M. Walters, Robinson; James H. Hamilton, Arkansas City; T. J. O'Neil, Osage City.

"I don't know," cried the Excited Feminine Voice in the Darkness, "whether you are my husband or a burglar, but I'm going to be on the safe side and shoot."

"I found a good bargain in men's shoes to-day," said Jorkins, after he had picked everything on the supper-table to pieces. "You have had better luck than I ever had," retorted his wife.—Ex.

## Cooper & McKee's Extensive Plant.

Cooper & McKee, whose plant extends from 113 to 121 Gwinnett Street and from 146 to 154 Middleton Street, Brooklyn, N. Y., covers twelve city lots in the heart of the manufacturing district of that important city. The main office of the firm is at 113 Gwinnett Street. A very fair idea of the size of the firm's factory can be gained from the illustration which is shown in connection with this article. They have just published their new illustrated catalogue for 1902, describing in full their new and attractive lines of Refrigerators, showing the large number of up-to-date features embodied in the improved construction of these household necessities. This old and reliable manufacturing concern was

popular by this company, fully illustrated and described throughout, and added to which will be noticed several new productions, which include Union Foot Cycle Skates for men, made of the best grade of cold-rolled Swedish steel, and having a lever clamping device heel and toe, the same as applied to the American Club pattern of ice skates. The skate has rubber tires, which make a noiseless skate for use in halls or rinks, and for use on rough floors where hard-wheel skates cannot be used. As these skates are provided with two wheels instead of four, the rubber tires prevent slipping, and for fancy and trick work are claimed to be unequaled. When required for outside or sidewalk use, the Hemacite tire is recommended by the manufacturers. These are also made in

COOPER & McKEE'S EXTENSIVE PLANT.

established in 1880, and since that time has built up a large and successful business that has reached the number of upwards of 25,000 refrigerators annually. The line of refrigerators at present manufactured by this company embodies so many improvements as to make it necessary for us to devote to another notice the important features embraced in the catalogue, covering as it does a line of Glass-lined Refrigerators of entirely new and novel construction, the "New Columbia" Hardwood Refrigerators, the "Champion" Hardwood Refrigerators, "Household" Refrigerators and a line of Refrigerators built expressly for flats and apartment houses, as well as special Refrigerators intended for restaurant or delicatessen shops and grocers; also butter, fish, fruit and nursery varieties.

## Union Hardware Co.'s New Catalogue.

Union Hardware Co., Torrington, Conn., and represented in New York by Tower & Lyon, 95 Chambers Street, have just issued their 1902 catalogue of Roller Skates, which forms a 38-page pamphlet entirely devoted to this particular branch of their production. Included in its contents will be found all the old patterns of Roller Skates that have been made sizes suitable for the use of ladies and children, or for those wishing support for the ankle, having heel straps in addition to the clamp and leather toe fastener. The heel straps are provided with a broad instep piece, which is an entirely new feature. The straps being swiveled at the heel, follow the motion of the foot, and are consequently worn with the greatest ease. Among the new productions must also be mentioned the All Clamp Ring Roller Skate. It combines all latest improvements in design and manufacture, and is an advance of any similar production offered the trade. Trucks are oscillating, with best rubber cushions, and a turn can be made in a three-foot circle. The clamps are of the best design, and are made under a recent patent by which they hold the shoe like a vise. These are also made in women's sizes, having the latest improved strap referred to above as part of their equipment. Altogether this is an important little catalogue, and should be asked for if not already in the possession of our readers.

"How do you want this part to run?" asked the barber.

"I don't want it to run at all," replied the man in the chair; "in fact, I don't want anything in my hair that runs."—Ex.

## RECENT TRADE PUBLICATIONS.

Brass Goods Mfg. Co., 86-92 Third Street, Brooklyn, N. Y. Pamphlet satalogue of 140 pages, embracing in its contents the numerous articles in brass and bronze Hardware manufactured by this important company, which includes in its variety large lines of Builders' Hardware, Cabinet Hardware, Refrigerator Hardware, Chest Trimmings and Box Trimmings. The company is also prepared to make special goods to order in quantities for any manufacturing concern desiring the same. This catalogue illustrates the largest and most complete assortment of the class of goods referred to that has ever been shown the trade, covering as it does Box Hinges in large variety of every description imaginable; Strap Hinges, Box and Side Stop Hinges, Card Table Hinges, Quadrant and Support Hinges, Strap and Fancy Hinges in very large assortment, and Flap Hinges, Refrigerator Hinges and Latches, Refrigerator Fasteners and Locks, Cupboard Turns, Drawer Pulls and Handles and a very complete Builders' Hardware division of the catalogue, covering the usual plain styles of Door Knobs and Escutcheons, etc. The catalogue also includes Box, Chest and Stair Corners, Corner Plates, Brass Brackets, etc.

UDELL WORKS, Indianapolis, Ind. 36-page pamphlet with attractive cover, in which is exhibited the great variety of woodenware goods manufactured by this well known concern, which includes Folding Tables, Medicine Cabinets, Commodes, House Furnishing Woodenware, Ladders, etc. This catalogue is fully illustrated with excellent wood cuts printed on coated paper. Every article is fully described and list prices are furnished on a separate sheet. Medicine cabinets are shown in a large variety of styles and sizes, from the plainest to the handsomest, some of them being of extremely pleasing designs. Bathroom Cabinets and Commodes are also shown in large variety, and in popular designs. Folding tables are well represented in a number of styles and several methods of adjustment. Folding Steps are given, Toilet Trees, Kitchen Cabinets and Kitchen Woodenware, including Towel Rollers, Brush Handles, Clothes Props, Wash Benches, etc. Included in the contents are noticed a number of Grocers' Display Stands for brooms and brushes, several varieties of Ladders, Patent Rope Reels, forming a very desirable assortment of salable goods.

Monarch Refrigerator Works, Burlington, Vt. 56-page catalogue of the Monarch Cleanable Dry Air Refrigerators, being their illustrated catalogue and price list for 1902, covering their line of Domestic Refrigerators, Sideboard and Water Cooler Refrigerators, Grocers' Refrigerators, Ice Chests, etc. A handsomely printed catalogue in colors on excellent paper, and with fine wood cuts illustrating all the many improvements and advantages that have been embodied in the construction of this desirable line of Refrigerators. Full descriptions are given throughout of the special advantages referred to above, and reference is made to the handsome line of solid oak refrigerators shown on a number of pages which are furnished in a rich golden oak and lined with polished nickeloid, a new metal that is as bright as silver, and one that it is claimed will not tarnish nor oxidize, and when soiled can be cleansed with soap and water, and its brightness and luster restored by slight rubbing with a soft, dry cloth. From a sanitary standpoint this is regarded as being a fine line of goods at a very moderate price. This is a catalogue which should be in the hands of every Hardwareman handling these goods.

NORTH BROS. MFG. Co., Philadelphia, Pa. This company is noted for their artistic publications in the way of envelope. size catalogues and others for the extension of their business. We have before us the "Yankee" Tool Book No. 4, with embossed cover, 28 pages, envelope size, in which they give a full description of the Ratchet Screw Drivers in large variety with which the name of "Yankee" is inseparably connected; also the "Yankee" Chuck with drill points and Automatic Drill in several styles and varieties. These goods are extremely salable and should be found in every Hardware stock. In addition to the "Yankee" Tool Book, they are distributing at the present time their 28-page catalogue with handsome bronze embossed cover, covering their line of Ice Cream As this company manufacture the "Lightning" Freezers. and the "Gem" among the most popular Freezers on the market, these goods are shown in a large variety through the contents, being illustrated in a very artistic manner with half tones, showing them in all the different styles and sizes, with crank only, and also with fly wheel. Included in the contents is the line of Freezers marketed under the name of the "Blizzard," which are recognized as very salable Freezers at a popular price; also the "Crown" double-action, for use in hotels, restaurants, boarding houses, etc. Separate pages are given to the listing of Packing Tubs of every size necessary for the extension of the Freezer trade; also "Steel-Clad" Packing Cans, both round and flat bottom; the "Rapid" Ice Breaker, for use in freezing ice cream for confectioners, bakers, etc.; "Lightning" Ice Chipper, which is calculated for family use, or a larger size of the same for hotels and res-

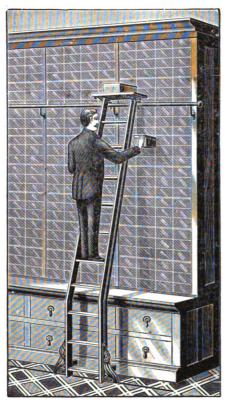

WILLOUGHBY FORK & Mfg. Co., Willoughby, Ohio. 1902 catalogue of 62 pages, handsomely printed in two colors on coated paper, and illustrated with fine half-tone engravings in the highest style of art, fully describing and showing the high grade of goods which form the production of this company. The contents embrace a full line of Steel Goods, both heavy and regular, which are manufactured under the several names that constitute the trade-marks of this company, the "Willoughby" grade representing the best products and bearing the Willoughby Fork & Mfg. Co. label. Second-quality goods are designated as "National" grade, and these are desirable, well made and finished, and supply a demand for less expensive goods, and are marketed with the National Mfg. Co. label. The cheapest grade of goods they designate as "Ohio" grade. These are manufactured to meet the demand for lowpriced forks and bear the Ohio Tool Co. label. The catalogue is very full in its description of how the goods are made and put up in the various styles, lengths and sizes. List prices are given throughout, to which the customary discounts will apply. The assortment is certainly a very large and important one, and embraces in its extent about everything that would naturally come under the title of Steel Goods, including heavy goods as well, in addition to the regular, such as Mill, Street and Manure Forks, Coke Forks, Coal Forks, Stone or Ballast and Quarry Forks, Stone Picking and Beet Forks, Vegetable Scoop and Barn Forks. Cottonseed Forks are made in both styles required by the trade, "Scoop-Shaped" or "Flat with outside Tines turned up;" also Sluice, Tanners' and Oyster Forks. We mention these especial lines to show how complete the catalogue is, and how large a production is already placed on the market by this company sc recently established.

## NEW GOODS AND SPECIALTIES.

### Bicycle Store Ladder.

Bicycle Step Ladder Co., 64 Randolph Street, Chicago, Ill., have for a long time made it their exclusive business to manufacture store service ladders. They manufacture this laborsaving fixture in a variety of styles, each of which is popular in certain localities. This particular feature of a Hardware store convenience is in general use, so much so that it will not be a great while before a large majority of the houses doing a successful business will be fully supplied with facilities of this character. The most advantageous style for a house to select is one that is simplest in its adjustment and use. The machine that possesses the fewest loose parts and the least number of wheels, provided it will do the work, is

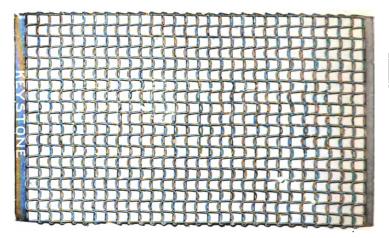

BICYCLE STORE LADDER.

the one that commands the closest attention. In order to save labor, the ladder should work easily and should also be substantial, safe, neat in appearance, and practically noiseless. The bent floor track Bicycle Ladder which we illustrate herewith as one of their productions, is said to meet all these requirements. It is made of selected hard wood, finished in natural color, and with nickel-plated or japanned mountings, as ordered. The track for these ladders is placed on the floor entirely independent of the base, and for this reason this style is preferred by many buyers to any other, particularly where the base shelf is narrow. The track needed for the floor is but 3-16 of an inch in height, and under the circumstances forms no obstruction. It is provided by a simple device which entirely prevents it from going off the track unless it is lifted off. In addition to this particular style which we illustrate, the Company are constantly building ladders to meet some special requirement, not only in this pattern, but in their other standard patterns. They desire correspondence on the subject from our readers, giving details of possible requirements, and they are prepared to make ladders of any kind of wood, and in any finish desired, even including elaborate carving and the finest possible finish.

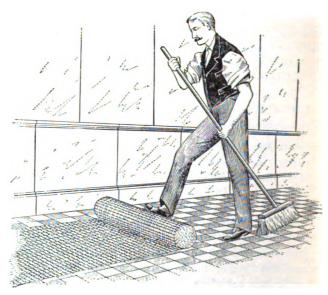

## Keystone Flexible Steel Matting.

Keystone Steel Matting Co., 524 Fourth Avenue, Pittsburgh, Pa., whose advertisement will be found in another column in this issue, are engaged in manufacturing a very complete and desirable article in the way of flexible mats and matting, which have become exceedingly popular wherever

KEYSTONE FLEXIBLE STEEL MATTING.

introduced. The construction of the Flexible Steel Mat is unique, providing as it does against all possible objections previously raised to any form of matting. It is made of galvanized flat steel bands 1-16 of an inch thick by % of an inch deep, hinged together with galvanized steel rods. This form of construction has many advantages. It gives increased durability, a noted resilience, meaning in this case comfort to the foot, and this indicates its value as a bar matting and for soda fountains. It is self-cleaning, removing as it does

KEYSTONE FLEXIBLE STEEL MATTING.

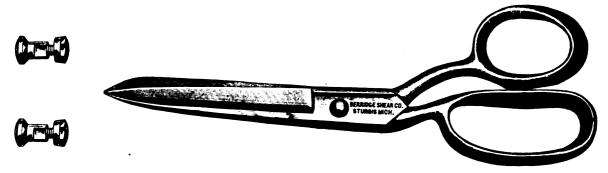

mud or snow from the shoes, scraped in every direction, and loses the dirt as quickly as it gathers it. Its reversability is a good point in its favor. The manufacturers call attention to the fact that the stiffness of many old styles of metallic matting is obviated in the construction of the Keystone, from the fact that it may be picked up and rolled as easily as a mat of the simplest construction of other material. The dealer, if Keystone Steel Matting forms a portion of his stock, by purchasing it by the roll in any width, is enabled to

cut mats of any size required by his patron, without the necessity of sending to the factory for mats of special dimensions. The manufacturers would be glad to furnish any possible information.

## Berridge Improved Shears.

Berridge Shear Co., Sturgis, Mich., represented in New York city by W. M. Bowes, 127 Duane Street, are introducing the greatly improved Shear which we illustrate in this article. It is provided with one of the latest and most important improvements in connection with shears in general use that has of late been brought to the attention of the dealer. We present in connection with the larger cut an illustration

calculated to stand the most severe and constant use. It is designed to wring all kinds, shapes or sizes of mops. It is also adapted to wring all kinds of unclean clothes without the necessity for touching them with the hands. A pair of pincers may be used to draw them through the rollers. The perfect results obtained by the aid of this household appliance is referred to by the manufacturers as being an improvement on wringing a mop the old way, which by twisting with the hands leaves the dirt in the centre of the mop, while by the aid of this appliance not only is the water excluded in the proper manner, but at the same time it carries with it all impurities, leaving the mop in condition for future use.

BERRIDGE IMPROVED SHEARS.

of the Berridge cone-bearing Lock Nut and Bolt, which is furnished with their full line of straight and bent trimmers, barbers' and bankers' shears, etc. It is claimed to be one of the simplest and most durable devices ever used for the purpose, as it absolutely prevents the movement of the nut on the thread of the bolt. In using an ordinary nut it is claimed there is a constant tendency of the nut to turn upon the bolt and become loose, which is caused by the end thrust of the bolt, that is to say, by constant pressure exerted upon the base of the nut, tending to separate the nut from the bolt. This is claimed to be overcome by the use of this new improvement, in which all necessary allowance for the contraction and expansion of the bolt is provided for.

## Beech Patent Mop Wringer.

Beech Novelty Co., Mansfield, Ohio, are placing upon the market through the Hardware trade the Beech Patent Mop Wringer, an illustration of which we give herewith. It is constructed from what is considered the best material for the purpose; providing as it does cedar pails, having seasoned

BEECH PATENT MOP WRINGER.

maple rolls, solid brass springs, steel chain and side bars, wrought iron foot holds and levers, and, completing the equipment, two small pulleys of cast iron. These are all put together with screws, and the entire weight for shipment is eight pounds. The pails are put together with wire hoops sunk in grooves in the wood and welded by electricity. The wire springs are protected by iron guards from catching in the mop. In fact, the whole affair is substantially built and

## Gloekler's Refrigerator Door Fastener.

Bernard Gloekler, 1127-1133 Penn Avenue, Pittsburgh, Pa., is the manufacturer of the Refrigerator Door Fastener No. 0, illustration of which is herewith given, and which is claimed to possess a number of advantages that make it a very desirable article for cold storage purposes as well as for a refrigerator appliance. For cold storage purposes it pos-

GLOEKLER'S REFRIGERATOR DOOR FASTENER.

sesses the desirable feature of operating either on the inside or the outside of the door, and is so constructed as to be used successfully on either right or left hand doors. It is manufactured in the following sizes: No. 0, for large, heavy door 10 inches thick and less, having a length of lever of 16 inches; No. 00, for small, light door 6 inches thick and less, length of lever 16 inches; No. 1, large door, length of lever 14 inches; No. 2, medium door, length of lever 11 inches, and No. 3, small door, length of lever 81/2 inches. Nos. 1, 2 and 3 operate on outside only, while No. 0 and No. 00 operate inside as well as outside. They are guaranteed to give satisfaction under all circumstances. Mr. Gloekler manufactures, in addition to these desirable Door Fasteners, a full line of brass and nickel-plated Refrigerator Hinges of the conventional style; extra heavy Refrigerator Hinges having a heavy loose pin and knuckle, and the strap made in such a way that it will not sag; and Refrigerator Latches in a variety of styles for swing windows. He is also the manufacturer of the Eclipse Door, for refrigerators and cold storage rooms, possessing a number of advantages for the purpose, that he should be glad to forward information regarding, upon application.

## M. S. Benedict Manufacturing

### OFFICERS:

M. S. Benedict, - - - President. E. H. Banker. - First Vice-Pres. John D. Allan, - Second Vice-Pres. Harry L. Benedict, Sec'y and Treas.

## Company,

MAKERS OF ....

**DIRECTORS:** 

M. S. Benedict, Harry L. Benedict, E. H. Banker. Thomas Dunn,

Fred K. Stickle.

## Silver-Plated Ware and Metal Goods.

ESTABLISHED 1883.

## REVIEW OF THE MARKETS.

Wire Nails: On January 30th, as was anticipated, an advance in the price of Wire Nails was announced, making \$2.05 a minimum price for carload lots, f. o. b. Pittsburgh. The market has since been greatly strengthened by this additional stiffening given to current prices, and less disposition to throw away profits, made possible by advancing conditions, is evident in the trade. The present market is represented by the quotation of \$2.05 to \$2.10 f. o. b. Pittsburgh, plus actual freight to destination.

New York. Representatives of the mills are firm at advanced quotations as recently adopted, although some disposition is shown by jobbers to make an occasional concession. Carloads on dock are quoted at \$2.30; small lots from store \$2.30 to \$2.35.

Cut Nails: On February 1 the price of Cut Nails was reduced by Eastern manufacturers 10 cents a keg in order to make more of a natural difference in price from Wire Nails than has been the case for some time. This has had a beneficial effect, and improved the demand for this staple. Quotations are as follows: f. o. b. Pittsburgh, plus the actual freight to point of destination, terms 60 days, or 2 per cent. off in 10 days:

New York. The change in price has increased the demand for Cut Nails, and the following prices represent the local market for quantities stated.

| Carload lots on  | dock           | \$2.08 |
|------------------|----------------|--------|
| Less than carlos | d lots on dock | 2.13   |

Barb Wire: Orders continue heavy and deliveries not so prompt. It was deemed inadvisable to make any change in price of Barb Wire at the time the other advances were announced. Consequently prices remain for quantity lots as previously quoted, as follows:

| To jobbers   | in carload lots, Painted        | \$2.60 |
|--------------|---------------------------------|--------|
| 4            | " Galvanised                    | 2.90   |
| 44           | less than carload lots. Painted | 2.65   |
| 44           | " Galvanised                    | 2.95   |
| To retailers | in carload lots, Painted        |        |
| 44           | " Galvanised                    | 8.00   |
| 44           | less than carload lots, Painted | 2.80   |
| 44           | # Colmonicad                    | . 10   |

Ellwood & Baker Wire is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plais Wire: On January 30th, when Wire Nails were stiffened in price, Plain Wire and Fence Staples were also advanced 5 cents per 100 pounds. The demand continues excellent, and the market is a very firm one. Present quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

| Pian                                        |                |
|---------------------------------------------|----------------|
| To jobbers in carload lots                  | <b>\$</b> 2.35 |
| To jobbers in less than carload lots 2.0    | 5 2.40         |
| To retailers in carload lots 2.10           | 2.45           |
| To retailers in less than carload lots 2.20 |                |

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances, as follows:

| 6  | to 9      | Bas    | e       |      |       |   |   | <br>    | \$0.40 | extra. |
|----|-----------|--------|---------|------|-------|---|---|---------|--------|--------|
| 10 |           | \$0.05 | advance | over | base. |   |   | <br>    | .40    | 44     |
|    |           |        |         |      |       |   |   |         |        | 44     |
|    | and 121/4 |        | 44      | 44   | **    |   |   | <br>• • | .40    | 44     |
| 13 |           | 25     | 44      | 44   | 44    |   |   | <br>    | .40    | 66     |
| 14 | *****     | 35     | **      | 44   | **    | ٠ |   | <br>    | .40    | 44     |
| 15 |           | 45     | **      | 44   | **    |   |   | <br>    | .75    | 44     |
|    |           |        | 44      | 44   | 66    |   |   | <br>    | .75    | 64     |
| ī7 |           |        | **      | 44   | **    |   |   |         | 1.00   | 44     |
|    |           | • •::= | 44      | 44   | 44    | • | • | <br>    | 4.00   | 44     |

For even weight bundles, 50 pounds and over, 5 cents per bundle advance on above.

Carriage Bolts, Machine Bolts, &c.: At their meeting held recently the associated manufacturers of Carriage Bolts, &c., made an advance on nearly all lines of about 7½ per cent. A revised list on Common Carriage Bolts was also adopted to become operative February 1. The revised discounts are as follows, subject to the usual quantity discount to the large trade:

| Common Carriage Bolts                                  | per | cent. |
|--------------------------------------------------------|-----|-------|
| Machine Bolts, with H.P. or C.P. Plain Nuts65 and 71/2 | per | cent. |
| Machine Bolts, with C. & T. Nuts                       | per | cent. |
| Machine Bolts, without Nuts65 and 7½ and 10            | per | cent. |
| Machine Bolt. Blank                                    | per | cent. |
| Bolt Ends, with H. P. or C. P. Plain Nuts65 and 10     | per | cent. |
| Bolt Ends, with C. & T. Nuts65                         | per | cent. |
| G. P. Coach Screws                                     | per | cent. |
| Cone Point Lag Screws                                  | per | cent. |
| Skein Screws                                           | per | cent. |
| Forged Set Screws and Tap Bolts                        | per | cent. |
| Plow Bolts and Guard Bolts60                           | per | cent. |
| Washer Head Coach Screws                               | per | cent. |
|                                                        |     |       |

Copper and Brass Products: The fluctuating quotations on Ingot Copper will doubtless have a tendency to make prices on Copper and Brass Wire and Soldering Irons have advanced from the lower quotations recently prevailing, and conservative quotations form a feature of the present market, as the outcome cannot be definitely anticipated.

Carpet Sweepers: The following are the present quotations on Bissell Toy Sweepers, subject only to discounts for quantity:

| "Little Daisy"    |     |   |   | <br>  |   |   |   |   |   |       |   | <br> |       |   | ٠, | 31.50 | per  | dos. |
|-------------------|-----|---|---|-------|---|---|---|---|---|-------|---|------|-------|---|----|-------|------|------|
| "Dahr"            |     |   |   |       |   |   |   |   |   |       | _ | <br> | <br>_ | _ |    | 2.00  | per  | GOZ. |
| 44C/h 11.4a**     |     |   |   |       |   |   |   |   |   |       |   |      |       |   |    | 2.00  | IMIL | uos. |
| "IT Ittle Beauty" |     |   |   |       |   |   |   |   |   | _     |   | <br> |       |   |    | 3.00  | per  | gos. |
| "Little Queen"    |     |   |   |       |   |   |   |   |   | <br>_ | _ | <br> |       |   |    | 5.DU  | Det  | uos. |
| "Tittle Towel"    | • • | • | • | <br>• | • | • | • | - | - | Ī     | Ī |      |       | _ |    | 6.00  | per  | dos. |

Cordage: The Rope market, although a firm one, remains without change. We continue the quotations named previously, which may be said to represent the market:

|                              |     | Cents. |
|------------------------------|-----|--------|
| Manila, 7-16 inch and larger |     | . 18   |
|                              |     |        |
| inch and 5-16                | • • | . 121  |
| Sisal, 7-16 inch and larger  |     |        |
| 12 inch and 5-16 inch        |     | 10%    |
| Lath Yarn, medium and coarse |     | . 83   |
| Jute Rope, No. 1             | • • |        |
| No. 2                        |     |        |

Liasced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....64 cents per gallon. In lots of 5 barrels or more......63 cents per gallon.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

## THE PHILADELPHIA TRADE.

Although midwinter business is in very good volume and there seems to be an excellent demand for goods, which are going into consumption as fast as obtained, and, while buying has been very free for the last two years, we greatly doubt whether stocks are much above the average, as, from the character of the orders, and the demands for "rush" shipments, it is quite evident goods are not bought for speculation but for immediate consumption.

The demand for staples—such as wire nails, wire, poultry netting, wire cloth, etc., seems to be considerably above the average, and it seems most unfortunate that everyone—from the jobber who handles the goods in large quantities, to the dealer who cuts it up, and sells it by the square foot—should be, apparently, trying on how close a margin they can sell the goods. There seems to be no legitimate reason why

ITAIN, CONN., U

## Carpenters' Tools. **Improved**

SOLD BY ALL HARDWARE DEALERS.

these lines should not afford a living profit to every one who handles them.

Already, there is not only a prospect of shortage, but on some of these goods shipments are greatly delayed, and there appears to be no reason whatever why every one handling them should not have a fair return for his labor.

The market is very firm. The scarcity of steel seems to be growing more pronounced, and higher prices are constantly being published, although manufacturers feel that they are working on margins which are altogether too close.

Everything seems to point towards a good trade for the coming Spring, with probably the same trouble in getting goods as was experienced during the year 1901.

BIDDLE HARDWARE Co.

## THE CLEVELAND TRADE.

Better and better is all that can be said of trade conditions. The fruition of the most hopeful is being realized. Every body is happy to find that the good times are not followed by depression. Thanks to the big combination we are not in a boom. Prices are very firm, with slight advances and that makes trade lively. Extremely high prices are serious injury to trade. Some of the small users of Pig Iron find it difficult to get supplies as not a car is for sale here for present delivery. But the thousand tap per day furnaces ought to overtake consumption soon. If the Inter-Ocean Canal can be built without a public scandal it will be an honor to this country. It is fortunate that we have a President with stalwart integrity to commence the work and get it well under way, and it is hoped Congress will give him extensive powers in its construction, so that it may be managed with wisdom and integrity, for the magnitude of the expenditure is sure to attract the attention of speculators. If we can give the world an example of intelligent, honorable and economical construction, it will be a lasting honor to Republican Government.

Let Congress give the President an opportunity to do for

## TO SUPERSEDE EMERY CRAIG MINE CRYSTAL CORUNDUM.

WHAT THEY SAY ABOUT IT.

BRADLEY & HUBBARD, Meriden, Ct.—"After making careful tests of your No. 24, 70, 100 and 140 (Craig Mine Crystal) Corundum on leather covered wheels, polishing cast iron, am pleased to inform you it is the best abrasive we have ever used. It will polish at least twice as much work as any emery we have ever tried; cuts very fast, and leaves a fine, clear finish.

INTERNATIONAL SILVER CO., Factory "G," (Formerly Norwich Cutlery Co.)—"We have been using No. 40 (Craig Mine Crystal) Corundum steadily for six months, and we find that it will do just double the work that any other emery that we have ever had will do, and that it is impossible to burn a (knife) blade with it which is a great advantage to us as all emery will burn, and consequently draw the temper. We are using finer grades with equal results. \* \* \* We would recommend Corundum, not only on account of the saving, but the work is very much more satisfactory."

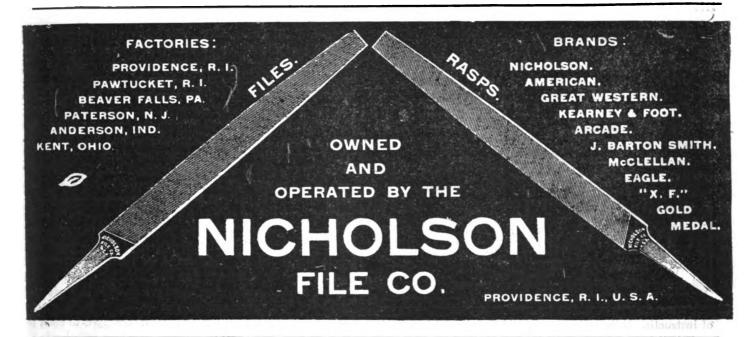

LOBDELL CAR WHEEL CO.—" Is entirely satisfactory. \* \* \* Cuts well and seems to be very pure."

Emery is an impure form of corundum. It is about 30 per cent. corundum, and 70 per cent. oxide of iron, non-crystaline alumina, etc. The 30 per cent. cuts; the 70 per cent. rubs and burns.

Labor is the chief item of expense in manufacturing. If you use much emery you will make a large saving by using Craig Mine Crystal Corundum in its stead. It is the only pure corundum produced in North America.

Send us a sample order.

THE CANADA CORUNDUM CO., LIMITED, TORONTO.

republicanism this high honor, and no American will be compelled to blush at the International celebration held in honor of its completion.

THE LOCKWOOD-TAYLOR HARDWARE CO.

## THE PITTSBURGH TRADE.

January was a good month, sales ahead of same month of 1901, and a great many orders for future shipment taken that will swell the sales later on. From the condition of the order books of all manufacturers about Pittsburgh, we should have a record breaking year, all have their capacity filled for months ahead and many for the full year. In spite of the demand many items remain at quite low prices, in fact, some makers say there is little if any profit in their goods, and yet they cannot get more, as competition keeps price down. The same is true of some items in the jobbing trade. In such times as the present there is no reason why all should not have a fair profit, the demand justifies it, and competition that will not allow a profit when there is trade enough for all is silly. Our city has been stirred up over a sensational jail breaking episode in which two murderers under death sentence escaped by the connivance of the jailer's wife, and were shot to death in the adjoining country by officers. No one need read sensational novels when such matters fill the daily papers. Truth stranger than fiction. Weather conditions are seasonable, collections good, and prospects favorable.

LOGAN-GREGG HARDWARE Co.

## THE ST. PAUL TRADE.

We can but feel that we are getting an unusual amount of business as each mail comes in loaded with orders from our traveling men as well as from customers direct. Our January sales have been larger, by a great deal, than any January we ever had. The retail dealer knows that he will have a large Spring business, and the wise ones are providing for it by early buying, and he is wise, because there is now and will be a scarcity in some lines. The advance made on wire and nails has caused a feeling of possible advances, or at least no declines for the first six months, and the report of sales of all kinds of steel is having the effect of a desire to get covered before further advances take place. We have all we can do to get our orders filled, which is unusual, but we enjoy this unusual condition.

C. W. Hackett Hardware Co.

## THE CHICAGO TRADE.

Our sales during the month of January were largely in excess of what they were a year ago, and everything points to a corresponding increase for the present month. Orders for all lines have been coming in thick and fast, and we have been kept unusually busy for this time of the year.

The market, particularly on staples, is very stiff, and the tendency for advances is growing daily. While there have been two advances recently on Wire and Nails, we look for additional advances within the near future. As far as we can learn, all of the factories are full of orders, and while there is already a scarcity of some goods, it is growing worse daily. We feel that when the Spring season opens up, it is going to be a question of goods considerably more than of price. Some of our customers are undoubtedly taking advantage of the situation, to judge of all the early orders that are coming in for Spring goods, requiring immediate shipment. There is already quite a great deal of activity in the Builders' Hardware line, and Shelf goods are also going out very freely.

Wells & Nellegar Co.

## THE COLUMBUS TRADE.

Orders for immediate shipment are small just at present. Most of the season goods, such as Steel Goods, Screen Wire, and Poultry Netting, have been bought to be delivered later. Judging by the size of orders placed it is evident merchants anticipate a good trade, and every indication points to a realization of their hopes.

We are having genuine Winter and more snow than usual in this vicinity. The skating has been fine for the past month or more and most stocks of skates are well cleaned out. The recent advances on wire and nails have hurried many a merchant to place his order. Profits have not been satisfactory on these articles. In fact, jobbers would be as well off to pass orders at prices quoted by some: but wire and nails, along with a number of other articles, are always sold for glory. Per cent. of profit is not considered, but the same profit per keg, whether nails cost 90 cents or \$3.00, seems to be the rule and still we all seem to be happy. May we always feel that way.

The Smith Bros. Hardware Co.

## THE OMAHA TRADE.

An extremely cold wave has continued over this section for the past ten days or two weeks, and has temporarily made some difference in the movement of goods; but January business was very largely in advance of any January that we ever had before and the conditions prevailing seem to indicate a prosperous season, the only possibility of any shortage in volume appearing to be the inability of the manufacturers to supply the goods. From all indications there never was a time when manufacturers were so pushed to fill their orders or take anything like reasonable care of their business, as at present, and it is to be hoped that they are exercising during this period of prosperity a little better judgment than some of the jobbers, who appear to be disposed to go on the idea

of instructing their salesmen to get business, making a profit on it if they can, but under any circumstances get the business.

In view of the difficulty experienced in securing goods and the large demand for them, it would be fair to suppose that a greater degree of conservatism than existed in some quarters would be shown by the jobbers in marketing their goods. But in a general way prices are firmly maintained, and while the margins are not all that we would like to see, they are probably made up by the increased volume of business. Considerable anxiety exists in the West regarding the future of barbed wire. The demand from the ranges for a few years past has been unusually large and the greater part of this has been used in fencing government land. Should a decision be reached that these fences come down, instead of the movement of barbed wire into that territory there will be a lot of it for sale and some of the dealers are exhibiting considerable anxiety in regard to the outcome.

This letter goes to you under a new name, but this is the only change. Everything is the same except the name, and having used the same one for 31 years, we thought it time to make a change.

WRIGHT & WILHELMY Co.

## NOVA SCOTIA TRADE.

Halifax, Jan. 23, 1902.

I have been in this country for nearly a week and am quite pleased with the outlook. I landed in Yarmouth after a not enjoyable trip from Boston, as I had some conceit taken out of me on the way up. I had always prided myself on my ability as a sailor, but I went down to the enemy and capitulated as gracefully as possible. On arrival at Yarmouth I had expected to see the customs officer, but we had an extra visitor—the doctor—who insisted on vaccinating all who did not have a certificate or a sore arm. I got through the ordeal safely, and then passed to the next. He seeing the large line of samples wanted to go to the custom house with me. I persuaded him if I sold my samples I would lose my means of livelihood and was permitted to enter. I found E. K. Spinney was in Europe, this making his twenty-eighth trip to the old country for the purpose of buying goods. This is the only one so far whom I have found doing that. In years gone by nearly all did it, the Hardware merchants being able to secure all the goods needed now either of Canadian or American manufacture. Trade has been good in Yarmouth the past year and merchants look forward to another good year. From Yarmouth a long ride to Windsor through the Land of Evangeline, made famous by Longfellow, who never saw the country until after his poem had become famous, and then visited it. Windsor is a good town, and quite an amount of business is done there. I put in an assortment of American goods there, and then here. On the train I met some of "the boys" who travel from Halifax, among them W. B. Ar-

thur, of W. B. Arthur & Co., who believes it is necessary in order to have a knowledge of what is going on to visit some of his trade occasionally. I found them a jolly lot, like all knights of the grip, and the time passed pleasantly. I have been visiting the trade and having them call on me, and am in hopes, before leaving, to get some very nice business. The discussion of the tariff between the two countries is frequently touched upon by the merchants, and they are in favor of reciprocity. In some cases they think free trade between the two would be the proper thing, but they have been hurt by our people and feel it. They proposed a reciprocity treaty a few years ago and were in Washington regarding it, and nothing came of it, and I have heard some say it might be a good thing to advance the tariff against the American goods, so they would be shut out entirely, and then maybe our people would listen. This would be harsh measures, but things cannot be as one-sided as they have been, and we continue to retain their good will and our prestige in their markets. Too bad our manufacturers do not make a concentrated effort and have the existing tariff arranged to meet the conditions of the twentieth century. Halifax merchants are more English than any of the provinces I visit, and take their time in doing business. Call to-day and make an appointment for to-morrow, when they will look at samples and take down prices, then the next day for your order.

J. N. LIMEBURNER.

### THE GRAPHITE TRADE.

Relative to the Graphite Trade, the demand keeps good because we ourselves keep a tight hold on all the various strings, and that brings us orders and business. Judging from the number of letters and samples we have lately received, there seems to be a growing opinion that there is a lot of money in the graphite business. As a matter of fact, the Dixon Co. has been prosperous, but it has not been due to the fact that the Dixon Co. are owners of graphite mines; that has only been an incident. During the past six months, we have received samples of graphite from all over the United States and have been advised that graphite companies have started here and there. Now the samples which we have been receiving have been without an exception worthless, so far as any of our products are concerned. It should be remembered that from 80 to 90 per cent. of all the graphite used in this country is used for crucible making, and that for crucible making up to the present time no graphite has geen found so suitable in every way as Ceylon graphite. Graphite for lubricating purposes, whether to be used dry or made up in the various oils and greases should be of flake formation-a thin, tough, durable flake; and such flake, so far as we know. has been successfully mined only at the Dixon mines at Ticonderoga. Graphite is used for very many and widely differing purposes, but to be useful graphite must be selected for that particular purpose and prepared accordingly. The user of graphite should be as careful in selecting his graphite as a builder is in selecting his woods, in making up his specifications for a house. Graphite differs quite as much as wood does in its hardness, softness, grain, etc.

Joseph Dixon Crucible Co.

## American Industries Show Big Increase.

Statistics of the manufacturing industries for the United States, as shown by the official returns of the twelfth census, were announced to-day. The summary as compared with the figures for 1890 follows:

Number of establishments 512,585; increase 44 per cent.

Capital \$9,853,630,789; increase 51 per cent.

Wage earners, average number, 5,310,598; increase 25 per cent.

Total wages, \$2,323,407,257; increase 23 per cent.
Miscellaneous expenses \$1,028,550,653; increase 63 per

Cost of materials used \$7,349,916,030; increase 42 per cent. Value of products, including custom work and repairing, \$13,519,251,614; increase 39 per cent.

You'll not have to "Go 'way back and sit down' if you sell the new

Wallingford, Conn.—The Badger-DeMill Co., which has been incorporated with \$6,500 of Utica, have succeeded to the bicycle busi- recently in the bicycle repair shop of T. J. capital, will deal in bicycles, cigars and stationery.

## Changes and Improvements.

Adams, Mass.-M. J. Curran has sold his bicycle business to W. H. Kirkpatrick & · Co.

Bristol, Conn.—The Liberty Bell Co. has added a golf counter to its manufactures. It is an ingenious device in book form and - of pocket size, which obviates the need of a pencil in "keeping tabs" on the game.

Brockton, Mass.—Plans are being drawn for a two-story addition to the Motor Cycle Manufacturing Co.'s factory. It will more than double the facilities of the plant.

Buffalo, N. Y.-More than one hundred men are at work on the new factory building that was started for the E. R. Thomas Motor Co. in Buffalo early last month. The new structure is being erected in Niagara street, north of West Ferry. The company will then remove its machinery and offices from the present location. The new building will be two stories high, constructed of stone, brick and glass, very little wood being employed. The floors will be of cement. Automobiles, motorcycles and launches will be manufactured in the new plant.

Butler, Ind.-The Butler Co. have discontinued the manufacture of bicycles, which it started about four years ago, and will add an automobile construction department to its windmill and tank business.

W. R. Trusty.

bought out E. J. Miles.

Denver, Col.-W. B. Felker, bicycle Sons & Co. dealer, has bought two lots opposite the court house; and will erect a new building in which he will conduct a general business ing of the Miami Cycle Co., ex-Congressin renting, repairing and storing motor vehicles.

Elizabethtown, N. Y.—George Fisher is building an addition to his store.

Erie, Pa.—Palace Bicycle Co. succeeds Chambers & Suerken.

Fergus Falls, Minn:—A. I. Norman has succeeded to the bicycle business of Norman & Anderson.

Hartford, Conn.-The Colt Patent Firearms Co. is gradually preparing to extend its operations and increase its manufacturing plant by utilizing all of the buildings owned by the company. The building known as the West Armory, which for a number of years has been used by small manufacturers, is to be the scene of the change. The Atlantic Screw Co., which occupies 200x60 feet of floor space, has been notified to vacate by April 1, and it is arranging to build a new factory. Several other firms in the building have also been slight. notified that their space will be needed.

Hastings, Neb.-Norris Bros. have succeeded to the bicycle business of C. W. Jacobs.

New York Mills, N. Y.-Reynolds & Co. ness formerly conducted by Edward B. Mendell, 1728 7th Street, N. W. Mr. Men-

entered into business in Syracuse, having erty was sustained.

Canton, Me.-F. J. Laffaty & Co. succeed purchased an interest in the gun factory of D. M. Lefever & Sons, manufacturers of Colfax, Iowa.—Cox & Snyder have the new Lefever automatic hammerless guns. The firm name is now D. M. Lefever

### Miscellaneous.

Middletown, Ohio.-At the annual meetman Paul J. Sorg was elected president; Judge Jenkins, vice president; and Harry Walburg, secretary-treasurer.

Polygon
Conductor
Pipes
Won't Burst.

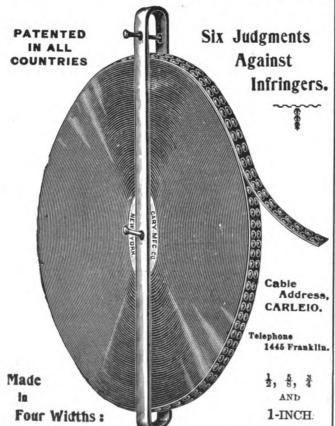

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks be cause it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

# PRICES CURRENT.

ane prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to

make this department of our paper worth The list prices, from which discounts the dealer upon request, by the manufactu

## CLASSIFIED INDEX TO ADVERTISERS.

Acetylene Gas Lamps.
Plume & Atwood Mfg. Co., New York,
Boston and Chicago.

Adjustable Stocks and Dies.
Armstrong Mfg. Co., Bridgeport,
Conn.

Ad. Writing.
Harper Syndicate, Columbus, O.

Harper Syndicate, Columbus, O.
Agricultural Implements.
Geneva Tool Co. Geneva, Ohio.
John H. Graham & Co., New York.
Iowa Farming Tool Co., Fort Madison, Iowa.
Iwan Bror., Streator, Ill.
Willoughby Fork & Mfg. Co., Willoughby, Ohio.

Air Rifles.
Daisy Mfg. Co., Plymouth, Mich.

Alaska Stove Hardware.
Troy Nickel Works, Albany, N. Y.

Ammunition.
Peters Cattridge Co., Cincinnati, O.
Tower & Lyon, New York.

Ankle Supports.
Brauer Bros., St. Louis, Mo. Anti-Friction Metal.
Magnolia Metal Co., New York.

Anvila.
Alfred Field & Co., New York.
Columbus Anvil & Forging Co., Columbus, O.

Apple Parers.
Goodell Company, Antrim, N. II.

Arbor Presses.
Chandler & Farquhar, Boston.

Art Hardware. Sargent & Co., New York.

Sargent & Co., New York.

Augers and Auger Bits.
John H. Graham & Co., New York.
C. E. Jennings & Co., New York.
Russell Jennings Mfg. Co., Deep
River, Conn.
Sargent & Co., New York.
Tower & Lyon, New York.

Awning Lines.
Samson Cordage Works, Boston,
Mass.

Axes and Edge Tools.
Sargent & Co., New York.

Babbitt Metal.

Brice & Cook, New York.

Colwell Lead Co., New York.

Magnolia Metal Co., New York.

Bank Railings.

J. B. Bolles Iron and Wire Works,
Detroit, Mich.

arb Wire. Fuller Bros. & Co., New York.

Barn Shovels. Geneva Tool Co., Geneva, O.

Bearing Metal.
Magnolia Metal Co., New York.

Boof Shavers,
Enterprise Mfg. Co. of Pa., Phila.
Lane Bros. Co., Poughkeepsie, N. Y.

Bells and Gonga.
John H. Graham & Co., New York.
Rargent & Co., New York.
Start Bros. Bell Co., East Hampton,
Conn.

Belt Dressing.
Jos. Dixon Crucible Co., Jersey City,
N. J.

Belt Shifters. Chandler & Farquhar, Boston.

Belting.
Ames Sword Co., Chicopee, Mass.

Bench Punches. Chandler & Farquhar, Boston.

Bench Shears. Chandler & Farquhar, Boston.

Bench Stops. Charles Morrill, New York.

Bench Vises.
Howard Iron Works, Buffalo, N. Y.
Tower & Lyon, New York.

Bioveles.

J. Stevens Arms & Tool Co., Chicopes Falls, Mass.

Bloycle Parts.
Standard Stamping Co., Buffalo, N.Y.
J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Bicycle Stands.

CHEAPER

# NEW IDEA.

THE ACME OF PERFECTION, JENNINGS NEW A7% SAW.

Just the width you want.

For Keen Kutting it stands alone.

This saw is on new old lines, 6 inches wide at butt, 1½ inches at point. A saw that has been worn down by constant use becomes invaluable to the owner, as it can be used for many purposes where a full width saw is unwieldy. They are made of the best refined spring steel, ground four gauges thin on back, full beveled filed and set, carred and full polished handle, four improved brass screws. For fine work it stands alone.

C. E. JENNINGS & CO., - 101 Reade St., New York.

# "BUCKEYE" WASHING

THE BEST, BECAUSE

It is easy to work. It cannot tear the clothes.

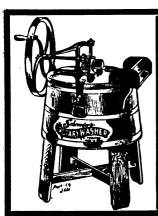

It adjusts itself to the size of the wash. It has a removable bottom, making it easy

to clean.

It will wash lace curtains and needlework without tearing, and better than you can do it on a washboard.

It is simple in construction, and has no complicated machinery to get out of order.

BUCKEYE CHURN CO., SIDNEY, OHIO.

# The Schroeder Rotary Washer

Peters Cartridge Co., Cincinnati, Ohio, and 80 Chambers Street, New York, announce the fact that they will again be represented at the coming Sportsmen's Show, to be held at Madison Square Garden, New York, March 5 to 19, and also at Boston, February 22 to March 15. They intend providing suitable and comfortable headquarters for their friends and the trade generally, and hope should they visit either of the above expositions they will hunt them up and make themselves perfectly at home.

The Springfield Machine Screw Co., Springfield, Mass., have shown excellent taste in their "1902 Souvenir," which consists of a very attractive searf pin which indicates in its construction the style of their Adjustable Hack Saw Frame. It can be sent in a variety of finishes; the backs in gold or silver, with oxidized blades and enameled handles. They state they will be pleased to furnish these to old friends or to new ones, whether they are interested in Hack Saw Frames only, or in any of their other numerous products.

C. T. Stork, the New York manager of the Columbian Hardware Co., Cleveland, Ohio, and 14 Warren Street, New York, recently returned from the annual meeting of the company held in Cleveland. A very satisfactory report of the year's business was made, and certain additions to the plant were decided upon, and also the addition of a number of new lines to their present productions, which will soon be completed and placed upon the market. The old board of directors was re-elected, and after the shareholders' and directors' meetings were disposed of, the shareholders participated in a dinner at the Euclid Club, as the guests of the company.

Miller, Sears & Walling, 100 and 102 Reade Street, New York City, have recently been incorporated for \$50,000.00 under the laws of the State of New York, and the style of firm name has been changed to The Miller, Sears & Walling Co. The following officers were duly elected: President, William S. Miller; vice-president, Seymour N. Sears; treasurer, Burroughs B. Walling; secretary, John A. Gouldrup; general manager, Arthur S. Bailey. They have just completed an arrangement with the Wm. Schollhorn Co. whereby they will carry a complete line of Bernard, Paragon and Lodi Pliers and Tools.

Logan-Gregg Hardware Co., Pittsburgh, Pa., begin a new volume of "Hardware Hints"—the interesting publication published under their auspices—with a de luxe edition, finely illustrated with artistic half-tones showing among the illustrations the magnificent building now occupied as the quarters of the company; on another page the original building where the business was started in 1831, and the store on Wood Street occupied by the firm for forty-two years, form an interesting group with the portraits of John T. and George B. Logan and Edward Gregg and Thomas A. Parke. Two fine pages handsomely arranged present portraits of the present officers of the company, and the force of traveling salesmen and others of the office staff. The representative employes numbering thirteen, filling still another page, make their readers feel acquainted with the heads of each department, and the illustration given of their seventieth annual dinner given January 2, 1902, brings the picturesque features of this special number to a characteristic close.

## Eighth Annual Sportsmen's Show.

The Eighth Annual Sportsmen's Show, under the management of the National Sportsmen's Association, will be held in Madison Square Garden, New York, from Wednesday, March 5, to Wednesday, March 19, inclusive. The exhibits will include Sportsmen's Camps, Camp Outfits, Guides, Woodsmen and Trappers, Fly Casting, Revolver Competitions, Boats, Launches, Canoes and Marine Motors, Game Animals, Game Birds and Game Fishes, Guns, Rifles, Revolvers, Ammunition, Powder and Shot, Fishing Tackle, Sportsmen's Supplies, Golf Goods, Cameras, Tents, Cabins and Portable Houses, Indian Goods and Indian Camps.

Among the many new features of this year's exhibit will be one great wooded island, to occupy the amphitheater, with a trout stream, water falls, cascades and a grand view of the Adirondacks. Upon the island, which will be reached by rustic bridges, there will be walks leading to the big game inclosures. Along the shore will be the camps and cabins of Maine, Adirondack and Canadian guides, equipped and constructed as they are found along the Fulton Chain, Moosehead Lake, the Rangeleys or the St. John. The island will be wooded with pine, hemlock and spruce, and the visitor will tread earth, moss and rocks as in the woods. There are also in course of preparation a number of interesting features connected with sports, the entire amphitheater being reserved for the carrying out of the plans adopted, trade exhibits being confined to the galleries. For further information, plans of the Garden, &c., inquirers can address Capt. J. A. H. Dressel, general manager, 320 Broadway, New York.

## M. S. Benedict Mfg. Co. Incorporated.

The M. S. Benedict Mfg. Co., of East Syracuse, N. Y., has been incorporated as a stock company with a capitalization of \$600,000 and the following officers: President, M. S. Benedict, of this city; first vice-president, E. H. Banker, of New York; second vice-president, John Allen, of Chicago; secretary and treasurer, Harry L. Benedict, of this city.

The main office and headquarters of the company will be located at East Syracuse, where the main factory is situated, and there will be branch offices in New York, Chicago and Toronto. The factories are at East Syracuse and Ottawa, Ill., with a large shipping house at Chicago.

The new company absorbs the following concerns: The Hamilton Silver Mfg. Co., of New York and Chicago; the Benedict-Dunn Co., incorporated under the State laws of Connecticut for the manufacture of flatware at Bridgeport, Conn., and the Benedict-Clark Silver Co., of Ottawa, Ill., manufacturers of silver novelties. Eventually the Benedict Mfg. Co. at East Syracuse, which is a partnership company, will be made a part of the new corporation.

The formation of the new company will result in the consolidation of several factories. The Benedict-Dunn Co. and the Hamilton Mfg. Co., of New York, will be transferred to a new building recently erected at the Benedict factory in East Syracuse. The Hamilton house in Chicago will be consolidated with the Benedict house in that city, designated as one of the company's chief points of distribution. The stock and machinery of the Benedict-Dunn Co. has already been installed at the East Syracuse plant and the Hamilton plant of New York is now in transit. The output at East Syracuse will consist of both flat and hollow silverware.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

# Editorial Trade Review.

Getting a good portion of our inclement Winter weather near New York during the past fortnight, and which has also been a feature in other localities, has handicapped country trade through bad roads, lessened to some extent the current orders from the retailer for his daily wants, and made the conditions easier to keep pace with. The general trade in its volume is, however, exceptionally good, and satisfaction is shown in the belief that Winter can now be counted upon to close its meteorological season at a date not very remote.

The travelers now out on the warpath with a view of supplying every possible want the dealer could discover, are sending home the most encouraging orders for immediate shipment within their experience. The orders represent a condition in the general stocks gratifying to notice. They are well assorted as to volume of goods; the demand is gradually showing a desire for better grades of goods than has been the case in former seasons, showing the possession of ability to pay for purchases springing from continued employment among the workers, which produces a wish to have better surroundings, handsomer household necessities, and creates a general, up-to-date belief in the fact that life is more decidedly worth living.

Among the mechanical appliances wanted by skilled labor the same fact is noticeable. It is no longer the demand for something that will just fill the bill at lowest possible cost; but a better article than previously prevailed, that will more quickly accomplish the result and prove a pleasure to use.

Too much "Cheap John" Hardware has been distributed by all the dealers during recent years, and that fact alone helps to create the demand for the better goods now everywhere called for, the goods previously purchased having no lasting qualities. The trade has been looking for this reaction from the large sale of department store trash, unloaded as it has been on the general community. As only Hardware stores proper will stock up on goods of known quality and reputation, a much better average of profit may be anticipated even with this unsoud competition so justly complained of.

The demand for Builders' Hardware already exceeds the ability of the manufacturers to deliver promptly on specified dates, and this delay in the execution of orders has the natural effect of creating a larger number of them, coupled with conditions providing for delivery at some impossible date, rendered so by lacking facilities to produce several months' ordinary supplies within the limits of one. The manufacturers in this line are confident of the largest Spring trade they have known in too many years to count.

Seasonable specialties are doing very well in the way of deliveries, manufacturers having got ahead on their stock requirements when no fear of a possible lower range of quotations would create a restricted production. Goods, which like axes have been held at prices too low for prospective profits, have been in poor supply during the past season. Now we find by a combination of efforts toward co-operation, higher prices are found to be obtainable, and the market so completely demoralized heretofore, will be found in another season the steadiest in the industry. It wasn't the knowledge that any large advance in price was essential, but the fact that whatever prices were agreed upon would be arbitrary and without the unwise concessions that shaded profits already sufficiently indefinite.

The withdrawal of quotations by manufacturers of steel goods would seem to indicate full order books, and a desire for a let-up on demand, until the way seems clear to make deliveries already under contract. Most of the factories having enough orders already booked to run them six months. This change in the conditions will certainly make the market less inclined to suffer from quotations based on previous price lists and discounts not now available to the largest buyers.

## Report of The Commissioner of Patents.

The report of the Commissioner of Patents recently submitted to Congress is interesting as showing that the business of the patent office for the year ending December 31, 1901, was the greatest in the history of the office. The receipts for the year amounted to \$1,499,398.16. The total expenditures were \$1,297,385.64, leaving a surplus for the year of \$152,012.52. The balance in the Treasury of the United States to the credit of the patent office is now \$5,329,471.00.

52,912 applications for patents were filed, and 27,373 patents were issued, being the largest annual issue in the entire history of the office. The total number of trade-marks, prints, and labels registered during the year was 2,965, the largest yearly issue of certificates of registration.

The press of work has been so great that twenty-one of the thirty-six examining divisions are over one month in arrears in their work. These divisions are required to work until 5 o'clock p. m. so long as their work remains more than one month in arrears, thus 128 examiners and assistants out of 219 are working one hour each day over time to keep up the work of their divisions. This condition is due to the fact

that the business of the office has outgrown the examining corps.

The report also shows that the office has been making money for the Government since 1836, one year, 1883, turning into the Treasury \$471,005.14. Notwithstanding the enormous sum to the credit of the patent office, Congress will not appropriate sufficient money to properly carry on the work of the office. Every Commissioner pleads for larger appropriations to enable him to handle the increasing business of the office with greater facility.

Davis & Davis, Patent Lawyers, New York and Washington, D. C.

#### Death of Francis A. Pratt.

Ex-President Francis A. Pratt, of the Pratt & Whitney Co., died suddenly at his home in Hartford, Conn., February 10.

Mr. Pratt was born in Woodstock, Vt., February 15, 1827, being the descendant of a family of noted influence in England. In 1852, through the influence of Samuel Batchelder, he removed to Hartford and took a position in the Colt works. It was there that he became acquainted with Amos Whitney, who from that period until the end of his life was his most intimate business associate. Mr. Pratt became the superintendent of the Phænix Iron Works and Mr. Whitney also became connected with this great industrial centre. Both remained there until 1861, when they entered into the partnership that culminated in the Pratt & Whitney plant, one of the largest and most important industries that has been founded in Hartford during the past forty years.

Messrs. Pratt & Whitney started on Potter Street. Some of their first work was for the Willimantic Linen Co. In 1862 Monroe Stannard, of New Britain, was admitted to the new partnership, each of the members contributing \$1,200. In 1865 the firm erected the first of a group of buildings that now constitute the Pratt & Whitney establishment. The company was incorporated under a charter from the State in 1869. The capital was \$350,000. It was afterwards increased to \$500,000 from the earnings. Mr. Platt became the president and Mr. Whitney superintendent of the works.

President Pratt had a genius for the lines of work in which the company engaged. He established extensive European connections and was abroad personally many times in the interest of the company, traveling in England, Germany, France, Austria and Italy. The foreign business which he secured for the company aggregated upwards of \$3,000,000. He entertained through life broad and comprehensive business views. He was honored by the corps of workmen which found employment at the Pratt & Whitney works during the entire period in which he was the president of the company. But few men have so deeply impressed the working classes with the sympathy, encouragement and appreciation which should be extended to them by the managers of capital. He was under all circumstances the friend of the laboring man. Mr. Pratt was a member of St. John's Lodge, F. & A. M., of Hartford. His character was built on the solid granite. His personal integrity, his uprightness, the loyalty of his relationships and the manhood which he displayed in all of life's concerns made him a man but rarely equalled. His loss will be one of the greatest that Hartford has sustained.

Ex-President Pratt leaves a wife and two children. He was married October 31, 1850, to Miss Harriet E. Cole, of Lowell. The two surviving children are Mrs. Carrie Louise Spalding and Francis C. Pratt, secretary of the Pratt & Whitney Co.

#### Death of John B. Varick.

John B. Varick died at his residence in Manchester, New Hampshire, February 8, after a long and painful illness. The disease from which he suffered was enlargement of the heart. John Barnes Varick was born in Poughkeepsie, N. Y., on January 29, 1833. He was a descendant of an old Dutch family which was identified with the early history of New York, one of its members being Col. Richard Varick, who was quartermaster general on General Washington's staff, and was afterwards Mayor of New York, from 1789 to 1801, holding the office longer than any of his successors. Varick Street, an important thoroughfare in the early days of the metropolis, was named in honor of Colonel Varick. The father of John B. Varick was Dr. Richard A. Varick, who was in his day the leading physician in Dutchess County, New York.

Mr. Varick came to Manchester in 1849, being but 16 years of age, and entered the employ of his cousin, John P. Adriance, who was in the Hardware business on Elm Street. Two years later Mr. Adriance disposed of his interest to Messrs. Varick and Dennis, and then in 1855 Mr. Dennis

J. B. VARIOK.

withdrew from the partnership and the firm became Varick, Storm & Co. Still another change came three years later when Mr. Storm retired and was succeeded by Walter Adriance, the firm being known as John B. Varick & Co. In 1860 Mr. Varick purchased his partner's interest and from that time to the day of his death he was the sole owner of the well known Hardware establishment which bore his name.

Mr. Varick's enterprise was well illustrated in 1892 when his retail store was entirely destroyed by fire. In four days a temporary structure, 192x32 feet in ground dimension was built on the vacant lot west of the city hall, and in three weeks the Varick Co. was doing business there with a full line of goods. Combined with this energy was a sterling honesty, so that the splendid progress of the business which Mr. Varick built up was of the most substantial kind, and both at home and abroad the name of John B. Varick was known to stand for legitimate business of the best type.

Probably no man in New Hampshire, except those who have followed the sea, has crossed the Atlantic as many times as did the subject of this sketch. He made over fifteen trips to England or the continent, finding unfailing delight in the voyage each time. He was on board the fated ocean liner *Oregon* which sank while approaching New York a number of years ago, and was the last person to leave the vessel.

Mr. Varick was twice married, his first wife being Isabel Rice, daughter of Thomas Rice, of Newton, Mass. His children by this marriage were Thomas Rice Varick, of Manchester, and Richard Varick. In 1881 Mr. Varick married Miss Melusina A. Hopkins, of San Francisco, Cal. One child was born to him of this marriage, a son, Remsen Varick. He is survived by Mrs. Varick and all of his children.

In 1813 there were 56 papers in London—8 morning, 7 evening, 7 every other evening, 16 every Sunday.

#### LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

#### Chiropody.

QUESTION: For some years past I have been interested in the study of the foot, and I should like to be informed whether there are any laws affecting a person's right to practice chiropody.

REPLY: There has been in comparatively recent years legislation in New York State upon the subject of chiropody. Chapter 208 of the laws of 1898 provides for the incorporation or the continuation of an institution called the New Pedic Society. The law referred to provides for the examination of a person desiring to practise chiropody, and upon the examination being satisfactory passed, a certificate is issued by the Pedic Society authorizing the person to practise chiropody. The law also provides that the Pedic Society shall issue a certificate without examination to the applicant therefor, provided the applicant was engaged in the practise of chiropody prior to the year 1893.

QUESTION: Kindly inform me if it is necessary to file a certificate of partnership with the County Clerk, in case a party uses his father's name and adds "Son" to it. What are the steps to be taken, and is there any penalty for not filing the certificate?

REPLY: Under the section of the Penal Code relating to the filing of certificates of partnership, we are of the opinion that it is necessary in the case supposed to file a certificate, stating the names and addresses of the members of the partnership. A failure to comply with the statute referred to, is made a misdemeanor and is punishable by a fine of not more than \$500 and imprisonment for not more than one year or both. The certificate to be properly filled out, acknowledged by the members of the firm and filed in the office of the Clerk of the County where the firm does business.

#### HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEB. 3, 1902.

311,465. Lamp Filling Attachment for Oil Cans, W. Bloomfield, San Francisco, Cal.

311,466. RAZOR GUARD, A. V. Brokhalme, New York, N. Y.

311,487. VISE, T. G. Hall, Brooklyn, N. Y.

311,518. STRAP HINGE, B. D. Palmer, What Cheer, Iowa.

311,527. BEEFSTEAK TENDERER, A. Rein, Hamilton, Ohio.

311,604. Door CHECK, L. Pentz, Canton, Ohio.

311,697. Door Hanger, W. Warner, assignor to E. C. Stearns & Co., Syracuse, N. Y.

311,742. PNEUMATIC DOORCHECK, W. Gillfillan, New Haven, Conn.

311,800. CALIPERS, C. H. Alapaw, St. Louis, Mo.

PATENTS ISSUED FEB. 4, 1902.

692,241. Door Hanger, J. H. Cook, Brooklyn, N. Y.

692,445. Grass Catcher Attachment for Lawn Mowers, O. Hoffman, Portland, Ore.

692,448. BAKING PAN, I. H. Jones, Salisbury, Md.

692,536. LIFTING JACK, H. McDermid, Chicago, Ill.

692,550. Knob Attachment, W. Scharnweber, Seattle, Wash.

692,578. Scissors Gage, D. C. Wolff, Lajunta, Ohio.

692,632. BALL CASTER, C. W. Corey, Boston, Mass.

PATENTS EXPIRED FEB. 10, 1902.

311,872. SASH HOLDER, N. Clark, Sterling, Ill.

311,892. WRENCH, J. Gibbons, West Troy, N. Y.

311,929. WEATHER STRIP, T. Weaver, Harrisburg, Pa.

311, 949. Step Ladder, C. Brand, Oakland, Cal.

311,953. HANDLE FOR DRAWERS, C. M. Burgess, New Britain, Conn.

312,023. Combined Sash Fastener and Lift, F. W. Seymour, Newark, Ohio.

312,024. TRANSOM LIFTER, J. H. Shaw, New Haven, Conn.

312,189. PATTY PAN, J. Chaumont, Wood Haven, N. Y.

312,199. Brad Driver, W. B. Ginter, Hughesville, Pa.
PATENTS ISSUED FEB. 11, 1902.

692,827. THUMB LATCH FOR DOORS, H. Chesner, Philadelphia, Pa.

692,858. SHELF BRACKET, C. F. Kade, Sheboygan, Wis.

692,864. Apparatus for Supporting and Operating Clothesline, C. J. Lantz, Gowrie, Iowa.

692,918. CAN OPENER, C. Sands, Palatka, Fla.

693,021. Door Check, J. Horsfield, Chicago, Ill.

693,028. KEYLESS LOCK, E. A. Judd, New Britain, Conn.

693,097. BARREL TONGS, C. M. Baldwin, Bronson, Mich.

693,108. Construction of Wrench Handles, F. L. Coes, Worcester, Mass.

693,114. KEYLESS LOCK, A. F. Corbin, New Britain, Conn.

#### Changes in The Firm of Bruce & Cook.

Among the co-partnership announcements made so far during 1902 none have attracted or will command so much attention as that having reference to the change in the ancient and famous house named above-Bruce & Cook, dealers in metals, tin plate, sheet iron, sheet zinc, pig tin, copper, lead, spelter, etc., at 186, 188 and 190 Water Street and 248 and 250 Pearl Street, New York. This well known reliable concern dates back to 1812-just ninety years ago-and was the pioneer in its line and has always occupied the position of being the largest and the most important leader in the industry. The original founder was John M. Bruce, who in 1840 was joined by his son, the style becoming John M. Bruce & Son. In 1850 the founder retired, and Franklin W. Bruce, another son, became a partner, the style becoming John M. Bruce & Sons. In 1855 one of the brothers retired and John C. Cook entered the firm and the style then became Bruce & Cook, as it has remained to the present day. John M. Bruce died in 1872, full of years and honors.

At a later date F. W. Bruce retired and his place was taken by John M. Bruce, Jr., who died in 1884. Mr. Cook died in 1892. Of late years the partners have been: Russell W. Mc-Kee, Spencer A. Jennings, Philander R. Jennings, Frank C. Jennings, A. Gardiner Cooper, Elsey C. Cook, and the estate of I. R. Bruce. On February 1, 1902, that co-partnership was dissolved by mutual consent, Russell W. McKee, Elsey C. Cook and the estate of I. R. Bruce withdrawing. The business is continued without change of name, by a new co-partnership composed of Spencer A. Jennings, Philander R. Jennings, Frank C. Jennings and A. Gardiner Cooper, all of whom were, as above indicated, members of the old firm.

The three Messrs. Jennings, it is proper to mention, are nephews of the late John C. Cook, and all of them have for a long time been identified with the business.

No concern in this country, in any line of business whatscever, bears a more honorable reputation than that of Bruce & Cook. The warehouse at the above address is one of the business landmarks of that old section of the city. The connections of the firm extend to pretty nearly all parts of the country, and a number of their customers have done business with them thirty, forty, fifty and even sixty years.

Mr. A. Gardiner Cooper, who is the youngest member of the firm, has been a partner since 1896.

In all parts of the country Bruce & Cook have friends and connections who will be glad to read this reference to the changes that have been made, and that the old, honored and honorable firm style is retained without change.

#### A Loving Cup for Russell W. McKee.

In connection with the withdrawal of Russell W. McKee from the firm of Bruce & Cook, and the reorganization of the firm under the same name, an extremely interesting event took place on January 31, 1901, when his former partners and numerous employes of the firm presented a magnificent silver loving cup to Mr. McKee in commemoration of the completion of his forty-seven years' connection with this honorable firm, their desire being to show in this manner the

RUSSELL W. M'KEE.

solid esteem, affectionate regard and profound respect entertained by the donors for the retiring partner. Mr. Mc-Kee is one of the best known veterans in this old established business, and by those in the metal trade everywhere his opinions are highly regarded, he being esteemed as an authority on everything appertaining to this important industry. His retirement from active participation in the affairs of the firm is regarded with profound regret by all his associates, notwithstanding the belief that he will enjoy the semi-official pleasure of occasionally ornamenting his old desk in the corner, which will be retained for his use whenever he

THE M'KEE LOVING CUP.

makes his appearance at the office. At the end of this long period of devotion to the interests of the firm, he will be enabled to take a deserved period of restful inactivity, without that feeling of unavoidable responsibility inseparable from a connection of such long continuance.

Mr. McKee's entire life has been devoted to fostering and encouraging the underlying principles of human action which eventuate in the formation of Christian character as applied to the pursuits of commercial life. He has been guided by three important watchwords which he has made

peculiarly his own. They consist of Tact, Push and Principle, and throughout his whole mercantile life, in every transaction, the importance of those elements of character has been constantly kept to the front. Those associated with him as employes, many of whom have been in the employ of his old firm for periods of time represented by twenty, thirty and even forty years, have profited by his counsel and display of a wise upbuilding of character, that makes them today good citizens and far-seeing business men, in whose minds and consciences the importance of "tact, push and principle" as elements of commercial success cannot be gainsaid.

#### Our British Letter.

(By Our Special Correspondent.)

LONDON, Feb. 11, 1902.

The Americanization of the Atlantic is one of the questions just now occupying the attention of shippers and those interested in the various lines of merchant vessels which cross to and fro between the two great English speaking peoples. Negotiations for the control of the Atlantic freight traffic have been carried on for a year or more. During this time several German lines were purchased, but Germany is now alive to the danger of surrendering its shipping. Freights have fallen low owing to railway influence and powerful organizations backed by the great steel and coal kings of America. If the present provisional arrangements for the control of American freight are carried out American manufacturers will be able to flood the markets of Europe on even more advantageous rates than are at present obtained.

The Royal Commission now inquiring into "The Extent and Available Resources of the Coal Fields of the United Kingdom" will probably discover not only the extent of our coal fields, but will make searching inquiry into the means adopted to procure coal. It is well known that in the majority of mines in this country mining is carried out on very primitive plans. Hand labor is still largely employed and comparatively few of the modern methods that science has devised are adopted. The United States have long applied electricity on their coal fields and Americans have competed with us in the Mediterranean and other parts of the world. The inquiry will probably lead to an "awakening," and the ultimate use of coal-cutting machinery. Electric drills, electric haulage and other labor saving and less costly means of production have long been needed.

Among the more stirring matters in the gas lighting world the affairs of the Welsbach Co. have been prominent during the past few weeks. The recent stormy meeting of the shareholders held to consider the report of the Advisory Committee resulted in the enforced resignation of the directors. The new board is pledged to a course of retrenchment and reform and the great aim of the new directors will be to make the undertaking a paying one, framed on a sound commercial basis. They have already stated that they intend to uphold the company's patents by vigorous action, if found necessary. The lawsuits in which this unfortunate company have been involved are legion and it would appear they are not likely to be lessened.

On January 25th, in the King's Bench Division of the High Court, thirty-six cases were down for hearing before Justice Phillimore. In none of these did the defendants put in an appearance, the Welsbach Co. obtaining restraining injunctions against the infringements of their patent rights; and the stocks of mantles held by the various offending firms were ordered to be given up.

There is a steady increase in the use of incandescent gas lighting in this country, and there are few towns or villages where it is not extensively used. Naturally, there is a demand for a low priced mantle and sellers are not slow to avail themselves of it, even at the risk of proceedings being taken against them.

Smart advertising is no longer regarded as the exclusive property of Hardwaremen on the other side of the water. A Brighton ironmonger has recently adopted a novel form of advertising his tool trade. He made a special purchase of 5,000 saw files and announced that he would present one free to all bona fide mechanics. Inquiries came from far and near, and every applicant received a file together with a bright and attractive price list of cheap and good tools. The advertisement is novel and perhaps costly, but it cannot fail to pay in the long run.

The progress of civilization and the advancement of science is observed in the construction of a telephone service right into the heart of Africa, penetrating to the capital of Abyssinia. It is amusing to note that although one of the latest applications of electrical science has been adopted by the one time barbarian race, governed by King Menelik, the march of civilization and the present day humane treatment of even or criminals has not followed so rapidly. The penalty for injuring a post or wire—the chopping off of the right hand—speaks for itself.

#### New England Hardware Dealers' Association.

The New England Hardware Dealers' Association held their ninth annual meeting, which included the election of officers, at the Quincy House, Boston, Wednesday, February 12th. Dinner was served as usual at 5:30 p. m., and this was followed by the election.

President George W. Burditt was not able to be present owing to illness, and Vice-President Sewall D. Balkam took the chair. A resolution was offered by Charles E. Adams, which was unanimously adopted, expressing the sympathy of the association for President Burditt in his illness.

Resolved, That the members of the New England Hardware Dealers' Association send their warm sympathy to President George W. Burditt during his temporary illness, and express their kindest wishes that he may soon resume his business duties, also join us at our meetings fully restored to his accustomed health.

The report of the treasurer, Henry M. Sanders, which was then received, gave every indication that the affairs of the association were in a prosperous condition.

Secretary James A. Farless then presented his annual report, which embraced in its matter a resume of the work done at each meeting during the past year. The number of meetings consisted of eight monthly and seven special. A full record was made of the order of proceedings, and interesting details of the various entertainments.

Charles E. Adams, delegate to the Massachusetts State Board of Trade, which, as is well known, is composed of forty-one trade organizations within the boundaries of the State, then made a brief address in which he referred to the success that had been obtained in the way of influencing trade legislation, which had been accomplished by the united and intelligent presentation of the several wants of the different trades to the legislative bodies, both State and National. He took occasion to emphasize the importance of the New England Hardware Dealers' Association, their increasing numbers and growing strength.

#### ELECTION OF OFFICERS.

The Nominating Committee, which consisted of Samuel H. Thompson, of Lowell; Edward A. Loomis, of Providence, and William D. Parlin, Natick, then reported the following as officers for the ensuing year:

First vice-president, John H. Sayward, Haverhill, Mass. Second vice-president, John B. Hunter, Boston, Mass. Third vice-president, E. Loring Richards, Boston, Mass. Secretary, James A. Farless, Boston.

Treasurer, Henry M. Sanders, Boston.

Directors: D. Fletcher Barber, Boston, Mass.; Charles E. Adams, Lowell, Mass.; John M. Fiske, Natick, Mass.; E. C. W. Bliss, Boston, Mass.; Calvin M. Nichols, Dorchester, Mass.; Joseph H. Williams, Boston, Mass.

The gentlemen named were unanimously elected to fill the

several positions for the ensuing year. For president, the name of Sewall D. Balkam, of Jamaica Plain, was presented by Samuel H. Thompson, of Lowell. There being no other nomination, Mr. Balkam was unanimously elected. In accepting the high position, President Balkam addressed the association as follows:

#### PRESIDENT'S ADDRESS.

Let me assure you that the honor just conferred upon me is very highly appreciated, and, in accepting it, I fully realize the importance of the responsibility, feeling that our association has come to the time when the word must be forward, if we are to continue. You have elected an Executive Committee, of which I am but a member, who are equal to the occasion, and on that committee will be placed the entire responsibility, success or failure. This association or any other will never run itself except into the ground. We must have hearty co-operation of all. Large committees of dead wood are but a burden, and it is my desire to-night that any man appointed who feels there is nothing for him to do to resign at our next meeting. I propose to do what is in my power toward an improvement in membership and interest, and shall expect the same effort on the part of our Executive Committee and each member. If this cannot be done my term of office will be brief.

THE OBJECTS OF THE ASSOCIATION

are many. Some have simply come for a good dinner, leaving at once for entertainment outside. Such members are of no value to the association, as it costs all they pay to carry them. Others come for various kinds of entertainment, which is not altogether profitable. Some for business only, but this is not always desirable. It appears to me that the most valuable feature has been the bringing before us by able speakers of topics of the day important to all, many of which the ordinary Hardwareman has not the time to become familiar with. Another feature to my mind of great value is the good fellowship, coming close together and realizing that we are men in a true sense. I wish also just to refer to the great value of organization which has been so ably referred to by Mr. Adams.

BACK OF ORGANIZATION IS STAGNATION.

There is power in organization, and back of it remains stagnation to nearly every enterprise. We have seen and felt the most of it in my section of the city. With no important society or other organization for the public good, what have we received? Nothing, when our neighbors in Dorchester have had at least a dozen of various forms. The result has been thousands of dollars for them, practically nothing for us. So let us broaden out and feel that though we may not get money value in return we are doing something for the good of all. As stated by one of my neighbors recently in an address at Buffalo, the success of the business man, of any man before the public, is not measured by the amount of business done or the amount of money accumulated, but by the good done and the uplift given to those on every side. So let us broaden our vision and touch our neighbors for good, bring out competition to this association for our mutual advantage.

The question of the evening was "The Outlook of the Association," and on this remarks were indulged in by a number of the members present, all of whom spoke with confidence in the future, fortified with a belief that there was no doubt about the association meeting with an extremely successful year.

The veteran secretary, James A. Farless, having attained the seventy-fifth anniversary of his birth on the day of the annual meeting, it gave the members an excellent opportunity of congratulating him upon his successful achievement of that immortal day. He was so well pleased with the congratulations showered upon him that he entertained the members with a little interesting speech, which included his recipe for long life and happiness. Mr. Farless is on record as having attended every meeting, both committee and regular of the association, with a single exception, since its organization in 1893, and this alone would give evidence of the fact that he had enjoyed most excellent health considering his years.

A committee for the March meeting was appointed by the president, E. Loring Richards and George J. Mulhall being the members.

## NEW YORK & PA. HARDWARE JOBBERS' ASSN.

A joint meeting of the New York Hardware Jobbers' Association and the Pennsylvania Wholesale Hardware and Supply Association was held in the city of Wilkes-Barre, Pa., February 13th, 1902. The members of the two associations were entertained by the local houses of C. Morgan's Sons, Pennsylvania Supply Co., Phelps, Straw & Co., and A. J. Roat, of Kingston, Pa.

The joint meeting of the two associations was arranged by Phelps, Straw & Co., who are members of both organizations. Previous to the joint meeting of the two associations, each held independent meetings of their own in the forenoon, and at 2 o'clock convened at the Westmoreland Club for a meeting, in which J. M. Kemmerer, of Scranton, Pa., was elected as chairman of the joint meeting, and as secretaries, S. J. Weaver, Rochester, N. Y., and H. L. Raub, Lancaster, Pa., were appointed.

The chairman at once introduced the speakers of the occasion, J. W. Black, Syracuse, N. Y., and G. H. Bright, Reading, Pa., who delivered interesting addresses, one of which follows:

ADDRESS OF J. W. BLACK, OF BURHANS & BLACK CO., SYRACUSE, N. Y. Gentlemen: In preparing a paper for this meeting, I feel I have taken upon myself a deep responsibility. There are many here who have had many years of experience and activity in the business we are engaged in. Were it possible to pry into the secret stores of knowledge which they possess, I doubt not but that they could give us very interesting information on these lines. Inasmuch as they will not divulge their interesting past and favor us, you will have to rest content with a lesser light.

The many details of mercantile affairs as connected with the Hardware trade are very numerous; in fact, as much, if not more so, than in any other branch of business. There is not more so, than in any other branch of business. a very meager chance for the slow-going, old style business man who still insists upon wearing sandals, because his forefathers did so before him. Now,

IN THESE DAYS OF MODERN INVENTIONS, the days of the great Edison and Marconi, the gigantic financial operations which have been successfully carried through by such men as Morgan, Carnegie and others, and the many prominent moneyed institutions which exist with such large and untold wealth, lead one to pause in wonder. Is it real? We are now experiencing a condition of great prosperity. This has continued through a longer period than the pessimist had predicted and extended to a date much farther in the future than the extreme optimist has imagined. It is wise, in the face of all this, to prepare for the change which must inevitably follow. It is also the belief of most well-balanced minds that the prudent man will fortify himself for a condition which will only be in a measure a repetition of past ex-The business we represent here to-day is prosperous and will no doubt continue to be so during the year 1902. Still, we must not be surprised to see declines in the interim. There is one important factor which enters largely into the present situation, and we cannot ignore it.

THE GIGANTIC CONSOLIDATIONS OF MANUFACTURING INTERESTS, of railroads and finance, have been, and are to this day, the balance wheel of commerce. We at least know from day to day that our merchandise has a value devoid of that uncertainty which we have experienced previous to their forma-If the business of large corporations are so success ful, is there not something to be learned from them? In the opinion of the writer the largest factor in bringing about this result is a broad-minded policy. In the management of our business there are many obstacles which are continually presenting themselves for our consideration. We have the startling fact that each year our expenses are growing larger, and our profits reduced in a similar proportion. I believe that inferior salesmen will prevent you from doing a successful business. A man should be paid on the basis of what he has accomplished. He should be an educated man and of good address, and most important of all, possess good judgment.

You will always find competition wherever you go. it not be an ideal condition if we could get on without it? I fear, however, we shall continue to experience it so long as we exist in a mercantile way. Our association should by co-operation endeavor to smooth the way as much as possible. THE CONSIDERATION OF COMPETITION

is something which is of great importance at the present time. Perhaps some of you are not interested in this subject owing to the fact that you have none. If such is the case, we think you are exceptional. We believe that the trouble comes from the jobbers themselves. The man who relies solely on If such is the case, we think the information which is given him by his travelers will often go astray, owing to the fact that this same travelor, although he is sincere in the statements which he makes, is misled by the fact that his information does not come from a reliable source. Also, he does not take sufficient time to investigate: in other words, he does not go to the bottom of it. An extremely low price which is once made to a customer simply establishes a precedent for others to fol-The customer will take particular delight in giving this information to other travelers, and very soon you will find that the price on this class of goods is demoralized throughout the entire State. We should make up our minds throughout the entire State. to be a little more conservative in listening to such statements and not conclude hastily that we must meet such concessions until we have the absolute facts in the case: even then we should question well its advisability.

When we are continually selling at a ridiculously low price, would it not be wise to always bear in mind that we have a fixed percentage of cost which it is necessary to con-

Our salary list, our general office expenses, the increase in rents, etc., are much in excess of former years. The immense detail which is a necessity in doing a large business and a successful one, requires much study, so that we may be able to keep our expense account within reasonable bounds.

#### THIS CONTINUED STRIFE TO SUCCEED

is a strong factor in reducing the percentage of profits en If we would but be content to confine ourselves to the territory which naturally belongs to us, it would net us better results. If each and every one should figure occasionally, if not at all times, the cost and percentage of profit that a traveler makes for him, we would not hesitate to guarantee at the end of the year that he would be selling goods not only at a better profit, but he would sell less of merchandise which does not bring a profit at all. I really believe there is not a firm represented here to-day who has not customers who are unremunerative and does not pay him to sell. We would suggest that with these accounts which are under suspicion in this respect, that you will figure the profit on what you have been selling them during the year 1901, and we believe after doing so, you will be rather startled at the results. I will illustrate by giving you the facts in one case. A certain jobber sold to one man fifteen hundred (\$1,500) dollars worth of merchandise in one year. The average profit was 11 per cent. A good proportion of This same firm was carryit was in barbed wire and nails. ing this man's paper for eight hundred (\$800) dollars. What did the jobber do? He made a detailed statement of it and told his traveler to show it to his customer. What was the result? The traveler got the largest order for shelf goods and merchandise paying a profit he ever received from him, and there were no nails or wire in it either. Gentlemen, don't give in too easy, and you will have more money at the end of the year. Lots of people will tell you how to get rich, but they do not tell you why they didn't get rich. It is not always the man who sells the most goods rich. who makes the most money.

THE GREAT TROUBLE WITH SOME TRAVELERS is that they do not have enough confidence in themselves. Perhaps you will doubt this statement, but it is neverthe-

less true in some respects. They do not always realize the proper time to say "No," in reply to an unreasonable request. We should remember that it is for our interest to treat our trade fairly and honorably. We believe they will treat our trade fairly and honorably. We believe they will appreciate our efforts in every case. The jobber is just as Cassential to the retailer as the retailer is to the jobber. What would the retailer do if he had to send to the factory for every article he purchased? It would cost him much more in the end than by getting his goods through the jobber. Many of the retailers do not seem to appreciate fully the situation in this respect. There are many instances where delays occur in shipment of merchandise, which are delayed on the railroad. Without consulting the jobber, delayed on the railroad. Without consulting the jobber, he simply writes a letter, "Cancel my order," and does not even stop to say "please" in many cases. Now the jobber sells his merchandise f. o. b. the cars and his liability ceases there. This is a fact which should be impressed upon the retailer. Cases of this kind are very numerous and have been more so during the past year, during the great strike, and many delays have occurred in consequence. retailers will also write to you and state you have charged them too much for certain articles on invoices. You may have given them the proper price but the other man has not. There may be enough, possibly more articles which are lower than those of the other fellow, but he does not say anything about that. This is why prices are demoralized. We keep meeting the other fellow who is low until we are selling everything on that basis. Now, is there any reason who a rateilar should not take an invoice and average up the why a retailer should not take an invoice and average up the prices? Why should the jobber reduce on one thing where he is high and not advance on another where he is too low? It seems to me this would be a fair proposition.

A large amount of

THE COMPETITION COMES FROM THE MANUFACTURER. This subject, of course, has been brought up thoroughly by the National Association and other associations as well, and it is unnecessary to speak of it here. One thing is certain, however, that the jobbers by concerted action can accomplish much with the manufacturer.

We should band ourselves together to accomplish the best results and lose sight of the fact that we are competitors. We are confronted with a situation which, although not new, is a serious obstacle to us in the East. Our brother Hardwaremen in the far West seem to feel they can secure much profitable business in our immediate territory, only for the asking. It seems to the writer that it is like trying to make water run up hill. They sell to the retailer whom you sell; also endeavor to sell the jobber, and in many cases the con-I regret to say that some of our jobber friends are in the habit of assisting these same competitors by giving them an order occasionally, for some product which they control, thereby helping them out on their expense account. I do not claim that we own any territory or trade. Both are open to the world. We do not want the earth, but modestly ask for a very small portion. We will be magnanimous and ask for a very small portion. we will be divide with the retailer, who is our friend, but please, Mr. divide with the retailer, who is our friend, but please, Mr. divide with the retailer, who is our friend, but please, Mr. Retailer, don't bear down quite so hard at times. "Live and let live." Why not? Oil the wheels, and the machine will carry you over the rocky road of life, and when your time comes, you will admit that the "other fellow" isn't so bad after all.

This paper contains nothing new to you who are present here to-day. Possibly, however, there are some little suggestions which may cause you to reflect, that we are following the same path and we must turn aside a little for each other on the way. Let "give and take" be our motto, and all remember it doesn't cost anything to say, "By your leave," or "If you please."

In conclusion, we have many things to be thankful for. Our wares are made of iron, and iron is king. Our great and glorious country is teeming with this natural product, and all we have to do to avail ourselves of its advantages is to dig it from Mother Earth and mould it at our will. We can and will supply the world, not only with iron but many other commodities. The broad-minded policy we have pursued in our foreign relations, our treatment of the Philippine, Cuban and Chinese questions has made us the greatest nation on earth. It is in the love of our country and our flag we are as a unit. We drink your health to-day. To-morrow? Well, if we can't get the business any other way, I presume we'll have to cut the price.

After the submission of these papers, which were received with every demonstration of approval, Chairman Kemmerer announced that the meeting was open for general discussion, which was at once entered into, considerable interest being evinced by the members of both associations.

The New York State Association being one of the oldest trade organizations of this kind, was able to advance to the members of the younger Pennsylvania Association the results of their experiences, which it was hoped might prove profitable to the Pennsylvania organization. The results of this discussion seemed to develop the idea of the general approval or organization work, and methods and plans in the interest of trade generally, both wholesale and retail, were interestingly discussed by all the members present.

Remarks were made by the following gentlemen:

Frederick Barker, I. D. Booth, Elmira, N. Y.; F. W. Huff, of the Supplee Hardware Co.; T. James Fernley, Philadelphia, Pa.; Chas. H. Turner, Albany, N. Y.; A. J. Roat, Kingston, Pa.; W. H. Taylor, Scranton, Pa.; G. D. Palmer, Rochester, N. Y.; S. Spencer Scott, of the Seltzer-Klahr Co., Philadelphia, Pa.; Geo. D. Krause, Lebanon, Pa., and J. H. Ritter, of the Biddle Hardware Co., Philadelphia, Pa.

The presence at the meeting of T. James Fernley, the ever genial secretary-treasurer of the National Hardware Association, added considerable zest and interest to the proceedings. Mr. Fernley having had opportunities of an experience so extended along the lines of association work, was able to give the gentlemen present considerable valuable information, which, without doubt, culminated in beneficial results to the members of these two organizations, who were so congenially brought together by the Wilkes-Barre gentlemen.

After adjournment of the business meeting, the members of both organizations were elaborately entertained at a banquet served by the local members of the Westmoreland Club.

In addition to the following houses, which were represented at this meeting, representatives of the Hardware Jobbers' organization of the city of Philadelphia were in evidence by the presence of the following well known gentlemen, who were in attendance owing to their sympathy with organization work of this kind in general, and particularly with the Pennsylvania Association:

T. James Fernley, National Hardware Association; F. W. Huff, Supplee Hardware Co.; James H. Ritter, Biddle Hardware Co.; S. Spencer Scott, Seltzer-Klahr Hardware Co.

The following houses connected with the two associations were represented:

Pennsylvania Association.—Bright & Co., Reading, Pa.; J. H. Obold & Co., Reading, Pa.; Stichter Hardware Co., Reading, Pa.; Bard, Schlott & Co., Reading Pa.; Bittenbender & Co., Scranton, Pa.; Foot & Shear Co., Scranton, Pa.; Chas. B. Scott, Scranton, Pa.; Scranton Supply and Machine Co., Scranton, Pa.; Reilly Bros. & Raub, Lancaster, Pa.; Geo. Krause & Co., Lebanon, Pa.; C. Driesbach's Sons, Lewisburg, Pa.; A. J. Roat, Kingston, Pa.; C. Morgan's Sons, Wilkes-Barre, Pa.; Pennsylvania Supply Co., Wilkes-Barre, Pa.; Phelps, Straw & Co., Wilkes-Barre, Pa.

New York State Association.—Syracuse Hardware and Iron Co., Syracuse, N. Y.; Burhans & Black Co., Syracuse, N. Y.; Barker, Rose & Clinton Co., Elmira, N. Y.; Irving D. Booth, Elmira, N. Y.; Weaver, Palmer & Richmond, Rochester, N. Y.; Albany Hardware and Iron Co., Albany, N. Y.

The names of the after-dinner speakers of the occasion follow, and it is needless to say that they fulfilled the demands of the occasion admirably, and added greatly to the entertainment and interest of the occasion.

G. D. Palmer, Rochester, N. Y.; Gen. H. W. Palmer, Wilkes-Barre, Pa.; T. James Fernley, Philadelphia, Pa.; W. H. Taylor, Scranton, Pa.; J. M. Kemmerer, Scranton, Pa.; Chas. H. Turner, Albany, N. Y.; J. H. Ritter, Philadelphia, Pa.

The Iowa Retail Hardware Dealers' Association convention, which was to have met at Des Moines on February 18, 19 and 20, has been postponed to meet at Cedar Rapids March 4, 5 and 6. The headquarters will be at the Grand Hotel, and the program as originally formulated will be carried out.

### ILLINOIS RETAIL HDWE. DEALERS' ASSN.

The Illinois Retail Hardware Dealers' Association held their fourth annual meeting in the Elk's Hall, Decatur, on Wednesday and Thursday, Feb. 12 and 13, and was considered by the delegates present to be the largest ever held by the Association in the history of the organization, over 200 dealers being present. The meeting was called to order by President H. G. Cormick, of Centralia, at 11 o'clock, and introduced Michael Fahey, who represented the Hardware dealers of Decatur. Mr. Fahey said upon being introduced:

"Mr. Chairman and gentlemen of the convention: Not having the privilege of meeting with you last year and meeting with you this year, as a member of your convention, upon behalf of the Decatur dealers we bid you welcome to our city. On behalf of the different clubs of the city of Decatur we extend to you their use during your stay in Decatur. I now take pleasure in introducing to you the Mayor of the city of Decatur, Charles F. Shilling."

Mayor Shilling then addressed the convention as follows: "Mr. President and Gentlemen of the Retail Hardware Dealers' Association: As a representative of the city of Decatur I extend to you a most cordial welcome and invitation to accept the hospitalities of our city, where you are to hold your fourth annual convention. In anticipation of your coming I have had all the gates opened; all of the doors unlocked, and invite you to join with us in making this your home and having a good time. Enjoy yourselves so that when the time comes for you to leave for your homes there will not be one among you who will not be glad he came, and all can leave for their homes with a good word for the city of Decatur and say that her people are all right. I thank you."

This was responded to by D. McLaughlin, of Chicago, who said:

"Mr. Chairman and your Honor: On behalf of the Retail Hardware Dealers' Association of Illinois, I sincerely thank your Honor, and also the clubs which have extended us their courtesies; and we assure you, Mr. Mayor, and also the representatives of the clubs, that there is nothing that the Hardware Dealers' Association will appreciate as much as the kindness and respect of the people of Decatur. Again I thank you."

Secretary G. R. Lott, of Chicago, then called the roll, after which President Cormick announced the following committees:

Committee on Location of Next Place of Meeting—J. M. Hunter, Leon Nish, W. J. Krueger, L. H. Clark, F. W. Slecke, H. N. Murphy, Z. T. Miller, C. M. Hurst.

Finance and Auditing—George A. Krueger, F. B. McKinney, D. Reflor.

Resolutions—L. Babst, Charles Williams, W. F. Gormley, Geo. A. Neeb, J. L. Hudson.

By-Laws—F. F. Porter, G. B. Churchill, L. M. Reeves, J. D. Barnett, J. H. Vawter.

Nominations—D. McLaughlin, Wm. Bittle, R. G. Schuerer, Chas. McGuire, Fred Kurtz.

Press-W. B. Costello, H. H. Roberts.

Question Box—D. E. Styles, J. Bellamy, J. L. Smith.

The convention then took a recess until 1.30 p. m.

WEDNESDAY AFTERNOON SESSION.

Upon calling the convention to order Wednesday afternoon at 2 p. m., President Cormick then delivered his annual address as follows:

#### PRESIDENT'S ANNUAL ADDRESS.

In presenting my annual address to this, our fourth convention, let me congratulate you upon your apparent good health, and the prosperity of your business. While in the year past some sections of our State were visited by a drought that materially injured business locally, I think, taken as a whole, the State has experienced a good business year, and prices have been well maintained.

Our State Association began comparatively a short time ago, and where the aims and objects have been fully set forth, and a personal canvass been made, the trade has awakened to a lively interest, and an increase of membership resulted. In my own trips in the southern part of the State, with few exceptions, I found the dealers realized the necessity of a concerted action towards an effort to relieve the business of many evils that have been the growth of years; and I am of the opinion that if this missionary work can be kept up, by the time our convention meets in 1903 we shall have the most of the dealers in the State that are worth having as members. In view of the prosperity we are now enjoying, it is a question whether we can fully realize the necessity of an association, but when the reaction comes, as it is sure to, when the manufacturer and jobber begin to reach out for the trade that properly should be the retailers, all can readily see what our organization can do to check this illegitimate competition. However, to the member who is a close student of events, it is apparent that with the membership and resources at our command the results have been worthy of our efforts.

When was there a time when the members of this association were shown the respect and consideration by the people of whom they buy goods that they are at present? Can any one remember a time when any manufacturer was as anxious to cause the retailer to believe that he did not cater to the catalogue house and department store trade as now? While these results have more than compensated the membership for the time and money expended in association work, yet we must not lose sight of the social pleasures and broadening influence of our annual meeting. Were there no other objects to be gained, these alone would, in my opinion, pay the intelligent dealer many times for his expenditure. If this work continues along the lines that are dictated by experience, with the cooperation of the National Association, it will not be long before the staple brands of goods will be found only in the hands of the retailer.

While we still have the catalogue house and the department store competition, yet much relief is in sight, in the fact that makers of some of the standard lines have assured our officers that this class of dealers will not sell their lines in the future; while others who are not willing to go so far, have assured us that if they sell these people, they will bind them by contracts not to sell the goods below certain prices. In striving to alter conditions that now make this class of establishments popular, would it not be well to, in some way, stimulate the efforts of the noble societies that are in many cities endeavoring to punish the violation of the child labor law, the iniquities of the sweat-shops, and to ameliorate the condition of those who labor for insufficient salaries, that high salaries may be given to managers and low prices given to the public?

During the year the work of the secretary's office has been done with an unusual efficiency, energy and enthusiasm. At all times Secretary Lott promptly responded to calls upon his time and finances to forward the interests of this association and deserves the thanks and kindly consideration of every member. On occasions he has visited other cities to talk and work for our increase, and in such instances with marked success, as his report will show. Your executive committee has had but one meeting during the year, December 11, in this city, but through the year have been of inestimable value to me by their letters on subjects submitted to them for their judgment. They have shown patience, forethought and ability in the conduct of their duties, and I would bespeak for them your kindly consideration. The individual members with whom I have come in contact during the year have treated me with such kindness that it is worthy of mention here. The brotherly feeling of the membership at this time augurs well for our future, and I trust will labor for its continuance and extension.

President Cormick's address was listened to attentively, many points made being received with hearty applause.

Secretary G. R. Lott then presented his report, which is substantially as follows:

#### SECRETARY'S REPORT.

The collection of annual dues was about the first thing undertaken and has not been quite completed at the present time, although the list of delinquents has dwindled down to about fifteen. The amount owing has in every case been small, and probably considered of not great importance by some of our members, as the process of collecting annual dues has been slow and laborious. Three or four statements were sent out to those who had not yet paid their dues, and finally upon order of your executive committee your secretary made sight drafts on members, resulting in nine being honored and seven returned, the members refusing to pay the same.

The entire Hardware trade of the State has been communicated with by mail from this office several times during the year. The members of the association have received a number of official communications besides the regular quarterly bulletin of the National Retail Hardware Dealers' Association, informing them of what was being done. Early in the year a grievance was presented by one of our members in Pekin against a certain bicycle manufacturing concern. This matter was taken up with the manufacturer and satisfactorily adjusted without any difficulty. Later on a grievance was received from one of our new members of Springfield against a manufacturer of gasoline stoves. Your secretary was unable to adjust this matter. In fact, it was turned over to the grievance committee for consideration and adjustment if possible. This committee has not reported to the secretary's office, but I presume it still has the question pending.

The money necessary to successfully finance the association for the ensuing year should receive proper consideration before we adjourn. It has not been the policy of this association to accumulate money in the treasury. The officers upon whom the management has been shouldered for the past year have cheerfully performed their duties regardless of what the loss to them amounted before the expiration of their terms of office. In all new organizations similar to ours such experience must be had, but sooner or later we must place the business management of this association on a more solid foundation.

Under present laws we have no good form of procedure in suspending members who are in arrears. I would suggest that we frame a new article setting forth the manner of suspension where a person fails to pay his annual dues. As we stand at present, we have members who paid their dues when they originally signed their applications for membership and have not paid one cent into the treasury since. These parties are receiving all the benefits of the association just the same as though they were fully paid up. The officers have not the power to cancel such members. These delinquents may possibly have good intentions, and may want to pay their indebtedness at a future time.

#### BOOK OF PROCEEDINGS.

Our executive committee met in December, and considered various matters before this association, among which we considered a proposition of issuing an illustrated book of the proceedings of our annual meeting, embodying in the same advertisements of the various Hardware and stove manufacturers and jobbers. Your secretary was instructed to obtain more information on this subject from those who had issued similar books. Some associations have handled the entire matter themselves, and found it very laborious work. Others have contracted with persons in that line of business, and have let the contract to these outside parties, receiving a percentage of the net profit as their share.

| MEMBERSHIP REPORT.  Membership at last annual meeting            |
|------------------------------------------------------------------|
| Total                                                            |
| Leaving a balance of                                             |
| Total membership                                                 |
| Balance on hand as per last annual report \$88.21 Received since |
| Total                                                            |
| Leaving balance on hand                                          |

Secretary Lott's report was received with every demonstration of approval.

Treasurer F. F. Porter, of Chicago, then read his report, showing the amount on hand February 19, 1901, to be \$401. During the year receipts had been \$854, expenditures \$654.35, which left a balance on hand of \$199.65.

M. L. Corey, secretary of the National Retail Hardware Dealers' Association, was then introduced by President Cormick, who referred to him as an able and conscientious worker, who represented the dealers individually. Mr. Corey then addressed the convention at considerable length on the work he had accomplished in building up the retail associations, and predicted good results from the future work of the National Association.

The secretary read a letter which had been received from Robert F. Bell, of the Texas Association, covering several points of interest that he deemed it advisable all the associations should harmoniously entertain and do their best to accomplish the work suggested. Some discussion followed the reading of the latter, which resulted in it being the sense of the convention that more could be accomplished, especially upon such matters as referred to Governmental measures, like the parcels post bill, which confirmed a portion of the suggestions contained in Mr. Bell's letter, by using the proper influence through the members of Congress in the several Congressional districts where the dealers resided. Mr. Fahey, of Decatur, said: "It is the duty of the Illinois Retail Hardware Dealers' Association to go on record against the parcels post bill, which is an injury to every dealer in Illinois. It brings matters to the door of every house. Dealers should not support Congressmen who vote in favor of this law, and should let them know their opinion of this piece of proposed legislation."

This seemed to be the sense of the convention after discussion. On motion, the letter from Mr. Bell was referred to the Committee on Resolutions.

H. C. Peppler, of Chicago, then read a paper on "Co-operative Buying and How it is Working in the Chicago Retail Association," which proved to be a very interesting subject for the convention, and was listened to with a great deal of pleasure. We make several extracts from this paper:

CO-OPERATIVE BUYING AND HOW IT IS WORKING IN THE CHICAGO RETAIL HARDWARE ASSOCIATION.
